ROYAL SOCIETY OF EDINBURGH
22, 24 GEORGE STREET, EDINBURGH, 2

THE PREPARATION FOR PUBLICATION OF PAPERS IN THE TRANSACTIONS AND IN THE PROCEEDINGS (SECTIONS "A" AND "B") OF THE SOCIETY

IN view of the high cost of publication, authors of papers are requested to write their communications in as concise a form as possible and to avoid excess of tables and illustrations.

An author is advised to retain a copy of his paper, as the Society cannot undertake any responsibility in relation to the custody of papers entrusted to it. The MS. must be easily legible, preferably typewritten on one side of quarto or foolscap paper and with pages numbered. *It must be absolutely in its final form for printing.* Each paper must be accompanied by three copies of a brief summary or synopsis, which should not normally exceed 200 words. This summary would be printed in small type at the beginning of the paper. A table of contents (for a long paper), references to plates, etc. must be in their proper places, and positions indicated for the insertion of illustrations that are to appear in the text. Names of genera and species should be in italics. Footnotes, where possible, should be avoided.

Additions to a paper after it has been finally handed in for publication will, if accepted by the Council, be treated and dated as separate communications, and may, or may not, be printed immediately after the original paper.

References to literature should be placed at the end of the paper, alphabetically arranged, under authors' names, with abridged titles of journals, thus:—

SANDEMAN, I., 1929. "The Fulcher Bands of Hydrogen", *Proc. Roy. Soc. Edin.*, XLIX, 48–64.

WHITTAKER, E. T., and ROBINSON, G., 1923. *A Short Course in Interpolation*, London.

Titles of papers should be quoted exactly, and all references to literature should be carefully checked by the authors before submitting the paper. References to literature in the text should be made by quoting the author's name and the year of publication thus (Sandeman, 1929) or (Whittaker and Robinson, 1923), and adding the page when necessary.

All illustrations must be in a form immediately suitable for reproduction, preferably of a size to permit reduction to about two-thirds the linear dimensions of the original, and should be capable of reproduction by photographic processes. Drawings and diagrams to be reproduced as line blocks should be made with fixed Indian ink, preferably on fine white bristol board, free from folds or creases; smooth clean lines or sharp dots, but no washes or colours, should be used. Graphs should be on a squared paper ruled in *faint blue* lines, unless the lines are to be brought out. If the illustrations are on a large scale to be afterwards reduced, by photography, any lettering must be on a corresponding scale.

WRIGHT, E. M.—The Linear Difference-differential Equation with Constant Coefficients.
Proc. Roy. Soc. Edin., lxii, A, 1947–49, 387–393.

Difference-differential Equation with Constant Coefficients.
E. M. WRIGHT.
Proc. Roy. Soc. Edin., lxii, A, 1947–49, 387–393.

LAWLEY, D. N.—Problems in Factor Analysis.
Proc. Roy. Soc. Edin., lxii, A, 1947–49, 394–399.

Factor Analysis, Problems in.
D. N. LAWLEY.
Proc. Roy. Soc. Edin., lxii, A, 1947–49, 394–399.

DINGLE, H.—The Nature of Scientific Philosophy: Science regarded as a philosophy in
which bare experiences are taken as the fundamental data and are correlated without
regard to their normal association to form physical objects.
Proc. Roy. Soc. Edin., lxii, A, 1947–49, 400–411.

Science, discussed as a particular kind of philosophy.
H. DINGLE.
Proc. Roy. Soc. Edin., lxii, A, 1947–49, 400–411.

CLARK, G. L.—On the Gravitational Mass of a System of Particles.
Proc. Roy. Soc. Edin., lxii, A, 1947–49, 412–423.

Gauss' Theorem, Approximate form of.
G. L. CLARK.
Proc. Roy. Soc. Edin., lxii, A, 1947–49, 412–423.

Mass, Equivalent Gravitational.
G. L. CLARK.
Proc. Roy. Soc. Edin., lxii, A, 1947–49, 412–423.
