

NOTES FOR AUTHORS

Submitting a paper

Full details on submitting a paper, including the style guide and L^AT_EX class file and macro package, can be found at <https://www.cambridge.org/core/journals/proceedings-of-the-royal-society-of-edinburgh-section-a-mathematics/information/instructions-contributors>

Proceedings of the Royal Society of Edinburgh: Section A considers for publication papers in all areas of mathematics. Please note that this journal does not consider simultaneous submissions from the same author.

- Authors will be asked to state the primary AMS 2010 Classification Number and between three and six keywords.
- Authors should nominate the most appropriate Editor for their paper.
- It is assumed that the author uploading the paper will be responsible for correspondence. A paper by more than one author should be approved in its entirety by the joint authors. An acknowledgement e-mail will be sent to all authors.
- Proceedings A has a page limit of 25pp but may consider papers up to five pages longer to allow for variation in final typeset length. Authors must prepare their papers as concisely as possible. Longer papers can be difficult to review in a reasonable time and can be judged more harshly.
- Each paper must be accompanied by an abstract, in general not exceeding 200 words, which will be printed.
- References should be listed at the end of the paper in alphabetical order, numbered sequentially. References within the text should be indicated by numbers in square brackets.

To submit your paper visit https://rse.msp.org/submit_new.php?jpath=rse_proc_a_math and follow the instructions for uploading.

Once a paper has been accepted for publication, authors will be asked to supply the appropriate file. This should be a single file, with any relevant macros included in the preamble, and named after the article reference number (e.g. 150421-authorname.tex). Figures should be submitted as eps or pdf files at the same time as the code for the paper. Detailed instructions will be given on acceptance.

Language

We recommend that non-English-speaking authors have their manuscripts checked by an English language native speaker before submission, to ensure that submissions are judged exclusively on academic merit. Third-party services specialising in language editing and/or translation can be found here: <https://www.cambridge.org/core/services/authors/language-services>. Use of any of these services is voluntary, and at the authors' own expense.

Proofs and offprints

Authors will be sent proofs of their paper by e-mail in pdf format for checking. A pdf of the final 'publisher's version' of the paper will be sent to the corresponding author shortly after print publication in lieu of hard copy offprints.

Copyright/Open Access

The RSE now operates a 'hybrid' Open Access model for its journals, for accepted papers submitted on or after 1 April 2013. On acceptance, authors will be given the option of having their paper published **either** under a regular publication agreement **or** under a fully Open Access agreement. Under the regular publication option, authors will be asked to sign the Journal's standard transfer of copyright form.

If authors choose the Open Access option, they will be asked to sign the alternative Open Access form and, upon payment of a one-off Article Processing Charge of UK£1780/US\$2835 (in 2017), the final published Version of Record shall be made freely available to all in perpetuity, and will be published under a creative commons licence, enabling its free re-use and re-distribution.

Please note that publication under a fully Open Access agreement is part of the Cambridge Open option. (For more details, please see: <https://www.cambridge.org/core/services/open-access-policies>)

Authors are also asked to ensure that any electronic versions of their paper clearly state the official place of publication.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, papers published in *Proceedings A* may only be reproduced, stored or transmitted with the prior permission of the copyright holder, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society permits the making of a single photocopy of an article from an issue (under Sections 29 & 38 of the Act) for an individual for the purposes of research or private study.

CONTENTS

A. SKOPENKOV Classification of knotted tori	549–567
DAT CAO AND LUAN HOANG Long-time asymptotic expansions for Navier-Stokes equations with power-decaying forces	569–606
K. KALIMERIS AND A.S. FOKAS Explicit asymptotics for certain single and double exponential sums	607–632
K. BARAŃSKI, N. FAGELLA, X. JARQUE AND B. KARPIŃSKA Fatou components and singularities of meromorphic functions	633–654
V. AMBROSIO Multiplicity and concentration results for a fractional Schrödinger-Poisson type equation with magnetic field	655–694
I.S. EUM, J.K. KOO AND D.H. SHIN Binary quadratic forms and ray class groups	695–720
S. TROFIMCHUK AND V. VOLPERT Existence of bistable waves for a nonlocal and nonmonotone reaction-diffusion equation	721–739
A. DIXIT AND B. MAJI Generalized Lambert series and arithmetic nature of odd zeta values	741–769
A. KRISTÁLY Nodal solutions for the fractional Yamabe problem on Heisenberg groups	771–788
Y. NAITO Asymptotically self-similar behaviour of global solutions for semilinear heat equations with algebraically decaying initial data	789–811
Y. CHEN AND W. HU Approximations, ghosts and derived equivalences	813–840
A. KHATIB AND L.A. MAIA A note on a positive solution of a null mass nonlinear field equation in exterior domains	841–870
J.A. BARMAK AND E.G. MINIAN A new test for asphericity and diagrammatic reducibility of group presentations	871–895
T.V. ANOOP, U. DAS AND A. SARKAR On the generalized Hardy-Rellich inequalities	897–919
F. GAO, E.D. DA SILVA, M. YANG AND J. ZHOU Existence of solutions for critical Choquard equations via the concentration-compactness method	921–954
Z. DI, Z. LIU AND J. WEI On triangle equivalences of stable categories	955–974
F. FERRARI An application of the theorem on Sums to viscosity solutions of degenerate fully nonlinear equations	975–992
G. DONADZE, M. LADRA AND P. PÉEZ-GUILLÁN Schur's theorem and its relation to the closure properties of the non-abelian tensor product	993–1002
S.K. KIM, H.J. LEE, M. MARTÍN AND J. MERÍ On a second numerical index for Banach spaces	1003–1051
G. M. FIGUEIREDO, M.F. FURTADO AND J.P.P. DA SILVA Existence and multiplicity of positive solutions for a fourth-order elliptic equation	1053–1069
M. KALANTAR, P. KASPRZAK, A. SKALSKI AND P.M. SOŁTAN Induction for locally compact quantum groups revisited	1071–1093
