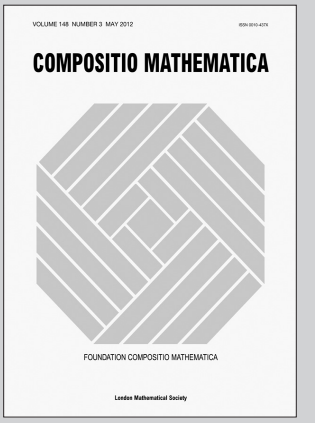
CAMBRIDGE JOURNALS

Compositio Mathematica

Produced, marketed and distributed for
The London Mathematical Society



Managing Editors
Bas Edixhoven, *Leiden University, The Netherlands*
Ben Moonen, *University of Amsterdam, The Netherlands*
Burt Totaro, *Cambridge University, UK*

Compositio Mathematica is a prestigious, well-established journal publishing first-class research papers that traditionally focus on the mainstream of pure mathematics. *Compositio Mathematica* has a broad scope which includes the fields of algebra, number theory, topology, algebraic and analytic geometry and (geometric) analysis. Papers on other topics are welcome if they are of broad interest. All contributions are required to meet high standards of quality and originality. Publications in this journal benefit from the added value of careful reviewing and editing. The journal has an international editorial board reflected in the journal content.

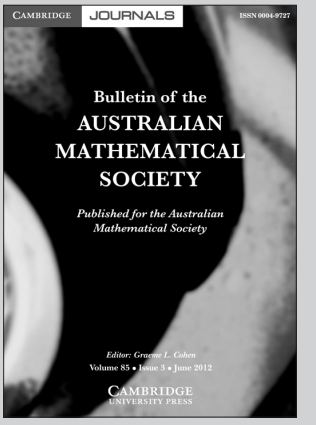
CAMBRIDGE JOURNALS

Bulletin of the Australian Mathematical Society

Published for
The Australian Mathematical Society



Editor-in-Chief
Donald E. Taylor, *The University of Sydney, Australia*

Bulletin of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Papers are accepted only after peer review but editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. The *Bulletin* concentrates on presenting new and interesting results in a clear and attractive way.

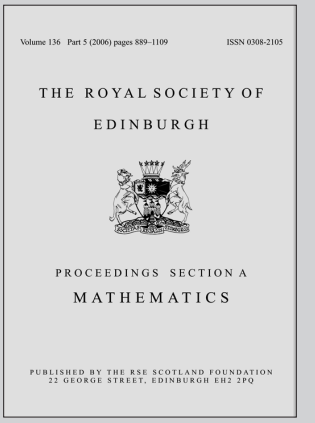
CAMBRIDGE JOURNALS

Proceedings of the Royal Society of Edinburgh, Section A: Mathematics

Marketed and Distributed for the Royal Society of Edinburgh



Chairman and Executive Editor
B. P. Rynne, *Heriot-Watt University, UK*

A flagship publication of The Royal Society of Edinburgh, Proceedings A is a prestigious, general mathematics journal publishing peer-reviewed papers of international standard across the whole spectrum of mathematics, but with the emphasis on applied analysis and differential equations. An international journal, publishing six issues per year, Proceedings A has been publishing the highest-quality mathematical research for nearly 70 years. Recent issues have included a wealth of key contributors and considered research papers.

CAMBRIDGE JOURNALS

Glasgow Mathematical Journal

Published for
The Glasgow Mathematical Journal Trust

Editor-in-Chief
I. A. B. Strachan, *University of Glasgow, UK*

Glasgow Mathematical Journal publishes original research papers in any branch of pure and applied mathematics. An international journal, its policy is to feature a wide variety of research areas, which in recent issues have included ring theory, group theory, functional analysis, combinatorics, differential equations, differential geometry, number theory, algebraic topology, and the application of such methods in applied mathematics.

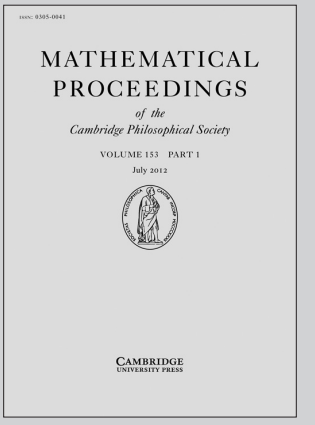
Mathematical Proceedings
of the Cambridge Philosophical Society

Published for The Cambridge Philosophical Society



Editor
G. P. Paternain, *University of Cambridge, UK*

Mathematical Proceedings is one of the few high-quality journals publishing original research papers that cover the whole range of pure and applied mathematics, theoretical physics and statistics. All branches of pure mathematics are covered, in particular logic and foundations, number theory, algebra, geometry, algebraic and geometric topology, classical and functional analysis, differential equations, probability and statistics. On the applied side, mechanics, mathematical physics, relativity and cosmology are included.

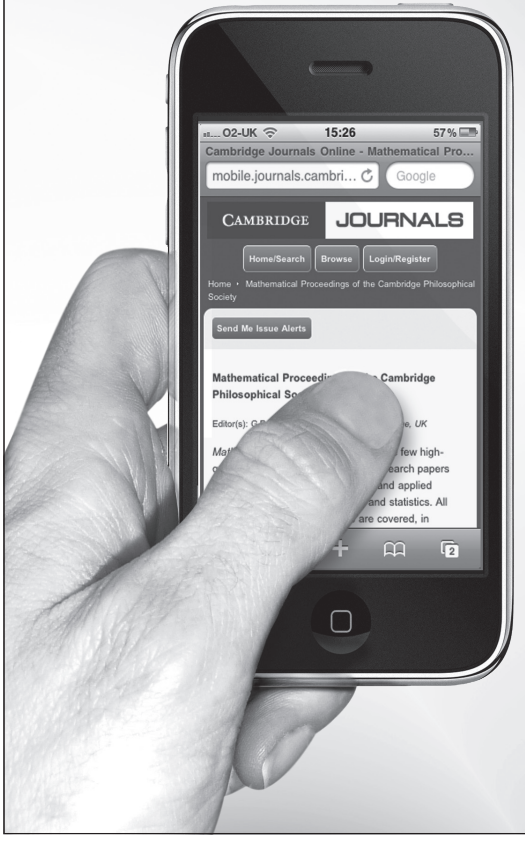
Go Mobile

CJO Mobile (CJOm) is a streamlined Cambridge Journals Online (CJO) for smartphones and other small mobile devices



- Use CJOm to access all journal content including *FirstView* articles which are published online ahead of print
- Access quickly and easily thanks to simplified design and low resolution images
- Register for content alerts or save searches and articles – they will be available on both CJO and CJOm
- Your device will be detected and automatically directed to CJOm via: journals.cambridge.org

JOURNAL OF THE AUSTRALIAN MATHEMATICAL SOCIETY

Submission of research papers in pure mathematics and statistics is invited under the condition that the paper has not been published and is not being considered for publication anywhere else.

The Journal is seeking articles of more general interest and of moderate length, preferring papers with a good introduction explaining the meaning and value of results. In view of the presssure on space, only papers highly rated by assessors can be accepted.

For information on submission of papers, and to submit a paper, see the journal's submission system: http://journal.austms.org.au/ojs/. It is also possible to submit the files by emailing a PDF file to jamsed@austms.org.au.

PREPARATION OF MANUSCRIPTS

1. Papers should be double spaced and have a generous margin. Authors should keep copies of all files.

2. Files must be prepared using LaTeX or another variant of TeX, and must not contain definitions of additional commands. A style file can be downloaded by following appropriate links on the Journal website.

3. Each manuscript should include an abstract of no more than 150 words, preferably containing no formulae, a list of keywords, a 2010 Mathematics subject classification, and a short title of no more than 40 characters.

4. For the style of references consult recent issues of the journal. The current usage is either the number referencing [1], [2], [3], or the letter referencing, such as [DS1], [DS2], [DS3] if the authors are N. Dunford and J. T. Schwartz, and the reference is to the 3 volumes of their monograph. In either style, references should be ordered alphabetically by the first author's name. Abbreviations of journal names should follow Mathematical Reviews.

5. Avoid abbreviations such as Thm., Prop., Eq., Ex., iff. In the text do not use the symbols $\forall$, $\exists$, $\Longrightarrow$ and $\Longleftrightarrow$. For more information about our stylistic requirements, see the Journal website accessible through www.austms.org.au.

6. Graphics should be prepared to professional standards, preferably using Postscript or LaTeX drawing facilities. Charges may apply if the typesetters have to recreate a graphics file because the original is not suitable for printing.

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are registered with the CCC may therefore copy material beyond the limits permitted by sections 107 and 108 of US copyright law subject to payment to CCC of the per-copy fee of $16.00. This consent does not extend to multiple copying for promotional and commercial purposes. Code 1446-7887/2012 $16.00.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions. For all other use, permission should be sought from Cambridge or the American branch of Cambridge University Press.

Table of Contents

A variant of Hofstadter's sequence and finite automata
Allouche, J.-P. & Shallit, J. 1

Complex numbers with bounded partial quotients
Bosma, W. & Gruenewald, D. 9

Continued fractions for a class of triangle groups
Calta, K. & Schmidt, T. A. 21

Twin squareful numbers
Chan, T. H. 43

Classification and symmetries of a family of continued fractions with bounded period length
Cheng, K. H. F., Guy, R. K., Scheidler, R. & Williams, H. C. 53

A note on the distribution function of $\varphi(p-1)/(p-1)$
Deshouillers, J.-M. & Hassani, M. 77

On a variation of a congruence of Subbarao
Dujella, A. & Luca, F. 85

Rings on water and their entropy
Mendès France, M. & Tokieda, T. 91

On the Rankin–Selberg zeta function
Ivić, A. 101

Relations in the 2-class group of quadratic number fields
Lemmermeyer, F. 115

Approximation of an algebraic number by products of rational numbers and units
Levesque, C. & Waldschmidt, M. 121

On the optimal continued fraction expansion of a quadratic surd
Matthews, K. R. 133

Between the problems of Pólya and Turán
Mossinghoff, M. J. & Trudgian, T. S. 157

Weak proper distribution of values of multiplicative functions in residue classes
Narkiewicz, W. 173

On divisibility of binomial coefficients
Sun, Z.-W. 189
