

## Index of Subjects

- Abomasum, acid secretion, effect of digesta protein content, sheep 307
- Acetate, incorporation into lipids and tissue distribution, relation to food intake, sheep 71
- Amino acids *see* Methionine, N<sup>T</sup>-methylhistidine
- Artificial rearing, pig, effect of replacing dried skim-milk by single-cell protein 161
- Artificial rearing, pig, replacement of dried skim-milk by soya-bean protein isolate 171
- Berberi, chronic cardiac form, results of autopsy, man 273
- Bile secretion, relation to abomasal lipolysis and digesta flow, milk substitute diets, preruminant calf 141
- Biotin, dietary supplement, effect on egg-laying performance, hen 151
- Calcium metabolism, effect of dose-rate of 1- $\alpha$ -hydroxycholecalciferol, sheep 183
- Calf 25, 141
- Cathepsins, A, C and D, hepatic and muscular activities, relation to feeding regimen, rat 61
- Cattle *see also* Calf
- Cattle 25, 33, 99, 141, 343
- Child *see also* Man
- Child 211
- Cholesterol, Serum, effect of dietary animal and vegetable protein sources, rat 113
- Chromium, daily intake, effect on breast milk content, man 257
- Cobalt, deficiency, relation to feeding regimen, forage or pasture, effect of supplement, dairy calf 25
- Copper, deficiency, relation to feeding regimen, forage or pasture, effect of supplement, dairy calf 25
- Diet, low-fluoride, preparation of experimental diet from single-cell organisms, rats and mice 371
- Dietary restriction, effect on small intestinal mucosal enzymes, lactating rat 89
- Digesta flow, abomasum, endogenous (biliary) lipids, lipolysis, relation to intake, milk-substitute diet, preruminant calf 141
- DNA synthesis, deoxyuridine suppression test, effect of vitamin B<sub>12</sub> deficiency, fruit bat (*Rosettus Aegyptiacus*) 229
- Deoxyuridine suppression test, study of DNA synthesis, vitamin B<sub>12</sub>-deficient fruit bat (*Rosettus Aegyptiacus*) 229
- Energy balance, effect of high-energy formulas, preterm infants 13
- Energy metabolism, relation to environmental temperature, early-weaned pig 313
- Environmental temperature, effect on energy metabolism, early-weaned pig 313
- Enzymes *see also* Cathepsins
- Fatty acids *see also*  $\alpha$ -Linolenic acid
- Fatty acids, milk, effect of restricted grazing, sheep 47
- Fats *see* Polyunsaturated fats
- Feeding regimen, effect on hepatic and muscular cathepsin A, C and D and serum free amino acids, rat 61
- Feeding regimen, high-energy formulas, effect on energy balance, preterm infants 13
- Fluoride, dietary, preparation of low-F diet from single-cell organisms, rats and mice 371
- Folate, liver metabolism, regulation by vitamin B<sub>12</sub> and methionine, rat 361
- Follicle-stimulating hormone, serum levels, relation to onset of puberty, effect of neonatal under-nutrition, rat 179
- Food intake, effect on acetate incorporation into lipids, distribution among tissues, sheep 71
- Food restriction, effect on number and diameter of skeletal muscle fibres, young rat 123
- Food restriction, liver enzyme activities, effect of subsequent *ad lib.* feeding, laying hen 81
- Forage, dietary form, effect on plasma lipid composition, sheep 333
- Fruit bat (*Rosettus Aegyptiacus*) 229
- Gastric transit time, measurement technique, <sup>24</sup>Na absorption from proximal small bowel, man 1
- Gluconeogenesis, lactation, glucose and urea kinetics, cow 33
- Goat 295, 355
- Glucose, total body metabolism, relationship with body- and organ weight, piglet model for human baby, 193
- Hen 81, 151
- Hormone(s) *see* Follicle-stimulating hormone, Insulin
- 1- $\alpha$ -Hydroxycholecalciferol, dose rate, effect on calcium and phosphorus metabolism, sheep 183
- Infant *see* Man
- Insulin, stimulatory effect on rumen epithelium mitosis, sheep 325
- Japanese quail (*Coturnix coturnix japonica*) 287
- Lactation, effect of diet on small intestinal mucosal enzymes, rat 89
- Lactation, fatty acid composition of milk, effect of grazing restriction, sheep 47
- Lactation, milk-protein-nitrogen, relation to glucose and urea kinetics, cow 33
- Lactation, relation between chromium intake and breast milk content, man 257

- $\alpha$ -Linolenic acid, metabolism, foetal brain, relation to docosahexaenoic acid requirement, rat 205
- Lipid, plasma composition, effect of type of dietary roughage and concentrate, sheep 333
- Lipogenesis, liver, relation to feeding regimen, laying hen 81
- Lipoprotein metabolism, effect of polyunsaturated-fat feeding on plasma lipoproteins and adipose tissue fatty acids, man 265
- Magnesium, dietary content, metabolic effects, pigs 53
- Man *see also* Child
- Man 1, 13, 211, 257, 265, 273, 275
- Methionine, effect on liver folate metabolism, vitamin B<sub>12</sub>-deficiency, rat 361
- N<sup>T</sup>-Methylhistidine, excretion rate, relation to myofibrillar protein breakdown, effect of dietary protein intake, rat 381
- N<sup>T</sup>-Methyl histidine, urinary excretion, validity as index of muscle protein breakdown, sheep 129
- Milk, chromium content, relation to Cr intake, man 257
- Milk, total vitamin D content, human and cow's 7
- Milk-protein-nitrogen, relation to glucose and urea kinetics, cow 33
- Milk-substitute diets, artificially-reared pig 161, 171
- Minerals calcium, chromium Cobalt, Copper, Fluoride Magnesium, Phosphorus, Zinc
- Mouse 371
- Muscle, skeletal, number and diameter of fibres, effect of starvation and refeeding, young rat 123
- Muscle protein breakdown, effect of dietary protein intake, relation to N<sup>T</sup>-methylhistidine excretion, rat 381
- Muscle protein breakdown, validity of index, urinary excretion of N<sup>T</sup>-methyl histidine, sheep 129
- Nitrogen, dietary supplements, urea, soluble or digestible by-pass protein, effects on roughage utilization, cattle 343
- Nitrogen balance, relation to obesity, effect of reducing diet, man 275
- Nitrogen status, effect of dietary protein intake, relation to N<sup>T</sup>-methylhistidine excretion and myofibrillar protein breakdown, rat 381
- Nucleic acids, degradation in small intestine, relation to diet, steer 99
- Nutrition survey, food energy and nutrient intakes in different groups of people in Great Britain (1968-1971) 243
- Nutrition survey, one-parent families in Newcastle-upon-Tyne in 1970 237
- Obesity, bipiperidyl mustard-induced, animal model, rat 253
- Obesity, dietary, effect of early undernutrition, adult rat 215
- Obesity, nitrogen balance, effect of reducing diet, man 275
- Phosphorus metabolism, effect of dose rate of 1- $\alpha$ -hydroxycholecalciferol, sheep 183
- Phrynoderma (follicular hyperkeratosis), aetiology, role of vitamin E, interrelationship with B-vitamins, child 211
- Fig 53, 161, 171, 193, 313
- Polyunsaturated fats, dietary, effect on plasma lipoproteins and adipose tissue fatty acids, man 265
- Prealbumin, thyroxine-binding, plasma, changes in relation to somatic growth, Japanese quail (*coturnix coturnix japonica*) 287
- Protein *see also* Single-cell protein
- Protein, abomasal digesta content, effect on acid secretion, sheep 307
- Protein, animal and vegetable sources, hypocholesteraemic activity, rat 113
- Protein, soluble or digestible by-pass forms, effects on roughage utilization, oaten-chaff diet, cattle 343
- Rat 61, 89, 113, 123, 179, 205, 215, 253, 361, 371, 381
- Retinol-binding protein, plasma, changes in relation to somatic growth, Japanese quail (*coturnix coturnix japonica*) 287
- Rosettus Aegyptiacus* (fruit bat) 229
- Roughage, utilization, effects of urea, soluble protein or digestible by-pass protein, oaten-chaff diet, cattle 343
- Rumen, epithelial cell mitosis, stimulation by insulin, sheep 325
- Rumen, site of transfer of recycled urea from blood, goat 295
- Sheep 47, 71, 129, 183, 307, 325, 333
- Single-cell protein (Pruteen), evaluation as milk-protein substitute, artificially-reared pig 161
- Small intestine, mucosal enzymes, relation to nutrient availability, lactating rat 89
- Soya-bean oil, dietary level, effect on plasma lipid composition, sheep 333
- Soya-bean-protein isolate, effect as milk-substitute, artificially-reared pig 171
- Technique, measurement of mean gastric transit time, <sup>24</sup>Na absorption from proximal small bowel, man 1
- Thiamine deficiency, chronic cardiac beriberi, results of autopsy, man 273
- Trace elements *see also* Chromium, Cobalt, Copper, Fluoride, Zinc
- Trace mineral deficiency, Copper and cobalt, effect of supplementation, relation to feeding regimen, dairy calf 25
- Undernutrition, neonatal, effect on sexual maturation, rat 179
- Undernutrition, suckling period, effect on growth and the development of obesity in later life, rat 215
- Urea, dietary supplement, effect on roughage utilization, oaten-chaff diet, cattle 343
- Urea, recycled, site of transfer from blood, role of rumen, goat 295
- Vitamin(s) *see also* Biotin, Folate, 1- $\alpha$ -Hydroxycholecalciferol, Retinol-binding protein, Thia-

- mine deficiency, Vitamin B<sub>12</sub>, Vitamin-B complex, Vitamin D, Vitamin E.
- Vitamin B<sub>12</sub>, deficiency, effect on DNA synthesis, deoxyuridine suppression test, fruit bat (*Rosettus Aegyptiacus*) 229
- Vitamin B<sub>12</sub> deficiency, interrelationship of vitamin B<sub>12</sub> with folate and methionine, rat 361
- Vitamin-B complex, interrelationship with Vitamin E in aetiology of follicular hyperkeratosis, child 211
- Vitamin D, total content, human and cow's milk 7
- Vitamin E, role in aetiology of follicular hyperkeratosis, interrelationship with B-vitamins, child 211
- Zinc, binding in cytosol of tissues, effect of Zn in jection, goat kid 355
