VOLUME 6, PART 1 JANUARY 1963

PROCEEDINGS

of the

GLASGOW MATHEMATICAL ASSOCIATION

Published with the support of the University Court of the University of Glasgow

CONTENTS

D. Ž. Djoković, Sur une inégalité. 1

P. H. Diananda, On a cyclic sum. 11

M. Lowengrub and I. N. Sneddon, The solution of a pair of dual integral equations. 14

J. M. Howie, An embedding theorem with amalgamation for cancellative semigroups. 19

C. R. Putnam, Positive matrices and eigenvectors. 27

T. M. MacRobert, Integrals involving *E*-functions. 31

R. P. Agarwal, Some further properties of a *q*-analogue of MacRobert's *E*-function. 34

J. Burlak, On the solution of certain dual integral equations. 39

C. G. Chehata, Extension of partial endomorphisms of abelian groups. 45

D. E. Rutherford, Inverses of Boolean matrices. 49

M. S. P. Eastham, On harmonic continuation. 54

PROCEEDINGS OF
THE GLASGOW MATHEMATICAL ASSOCIATION

THE *Proceedings* are published in Parts and issued twice yearly. Four Parts complete a Volume of approximately 200 pages, and the Title Pages and Index are published in Part 4 of each Volume.

The prepaid subscription for each Volume is Sixty Shillings (U.S.A. $10.00), post free. Single Parts may be supplied at a cost of Fifteen Shillings each (U.S.A. $2.50), net.

Copies may be ordered direct from the publishers or from any bookseller.

Information for Contributors

While the *Proceedings* are intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Proceedings*, especially with regard to line illustrations, references, tables, and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but alocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author*, *title*, *edition*, *place of publication*, *year of publication*, *page reference*;

for references to articles in periodicals—*author*, *title of article*, *short title of periodical*, *series no.* (if any), *volume no.*, *year*, *pagination.*

A proof is supplied once in galley form, together with an Order Form for offprints. Offprints are supplied free to the number of twenty-five; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:

CONTENTS

Agarwal, R. P. Some further properties of a q-analogue of MacRobert's E-function 34

Au Yeung, Yik-Hoi. Another proof of the theorems on the eigenvalues of a square quaternion matrix 191

Blyth, T. S. Residuation theory and Boolean matrices 185

Bonsall, F. F. A polynomial iteration for the spectral family of an operator 65

Bostock, F. A. and Patterson, E. M. A generalisation of Divinsky's radical . 75

Burlak, J. On the solution of certain dual integral equations . . . 39

Burlak, J. On Gordon's method of solving dual integral equations . . 117

Cassels, J. W. S. Corrigendum 116

Chehata, C. G. Extension of partial endomorphisms of abelian groups . 45

Copson, E. T. On the asymptotic expansion of Airy's integral . . . 113

Diananda, P. H. On a cyclic sum 11

Diananda, P. H. Notes on two lemmas concerning the Epstein zeta-function 202

Djoković, D. Ž. Sur une inégalité 1

Eastham, M. S. P. On harmonic continuation 54

Eastham, M. S. P. On polylogarithms 169

Ennola, Veikko. A lemma about the Epstein zeta-function . . . 198

Farahat, H. K. Note on a paper of Tsuzuku 196

Foster, D. M. E. On generating points of a lattice in the region $|x_1^2+x_2^2-x_3^2| \leqq 1$ 141

Halberstam, H. and Laxton, R. R. Perfect difference sets 177

Howie, J. M. An embedding theorem with amalgamation for cancellative semigroups 19

Khandekar, P. R. A note on the associated Legendre polynomials . . 156

Lamont, P. J. C. Arithmetics in Cayley's algebra 99

Laxton, R. R. See Halberstam, H. and Laxton, R. R.
