## 1981 CLINICAL AUDIOLOGY COURSE

THE next Clinical Audiology Course is planned by the Audiology Group of ISVR during the period 30 March to 3 April 1981. The course is intended primarily for specialists in otolaryngology and trainees in the speciality and will consist of lectures and demonstrations of the latest audiological and vestibulo-metric techniques. The subjects covered are as follows:—

- The patient with a conductive hearing loss
- The patient with a sensorineural hearing loss
- The medico-legal case
- The dizzy patient
- The patient with central auditory dysfunction
- Paedo-audiology

The course is approved by the Council for Postgraduate Medical Education in England and Wales under its advanced postgraduate training scheme.

To prevent overcrowding of demonstrations, it is necessary to limit the number, and early reservation of a provisional place is therefore advised.

The fees, not yet finalised, will be in the region of £195 non-residential (inclusive of comprehensive lecture notes, all meals daily and the special course dinner). Help will be offered in finding suitable hotel accommodation and if there is sufficient interest, it would be possible to get student accommodation at a hall of residence within walking distance of the University. Current cost for dinner, bed and breakfast in a hall of residence is £11.00.

## TEMPORAL BONE SURGICAL DISSECTION COURSES

OFFERED BY

THE DEPARTMENT OF OTORHINOLARYNGOLOGY

THE UNIVERSITY OF MICHIGAN MEDICAL SCHOOL, ANN ARBOR, MICHIGAN

MALCOLM D. GRAHAM, M.D.—COURSE DIRECTOR

These Courses will be given in the new Temporal Bone Surgical Dissection Laboratory of the Department of Otorhinolaryngology and the Kresge Hearing Research Institute of the University of Michigan.

These intensive one week courses will emphasize the surgical and anatomical approaches to the temporal bone and will be presented in a manner relevant for the otologic surgeon, utilizing lectures and videotape presentations of surgical techniques, as well as temporal bone dissection.

Both mornings and afternoons will be spent in the dissection laboratory, thereby giving extensive drilling experience in both temporal bone anatomy and surgical techniques. Lectures and demonstrations will be provided by members of the faculty of the Department of Otorhinolaryngology and Kresge Hearing Research Institute, thereby uniquely blending basic science and clinical otologic instruction. Drill handpieces and dissection instruments will be provided.

The fee for these courses will be \$1,000.00 for each physician.
