

<b>Contents</b>	<b>Page</b>
Guest editorial: The usefulness of stochastic mortality modelling. By P. J. Sweeting	139
A trend-change extension of the Cairns-Blake-Dowd model. By P. J. Sweeting	143
Matrix-form recursive evaluation of the aggregate claims distribution revisited. By Kok Keng Siaw, Xueyuan Wu, David Pitt and Yan Wang	163
A Bayesian approach to parameter estimation for kernel density estimation via transformations. By Qing Liu, David Pitt, Xibin Zhang and Xueyuan Wu	181
Minimizing the ruin probability through capital injections. By Ciyu Nie, David C. M. Dickson and Shuanming Li	195
A natural hedge for equity indexed annuities. By Carole Bernard and Phelim P. Boyle	211
Automated graduation using Bayesian trans-dimensional models. By R. J. Verrall and S. Haberman	231
Papers from actuarial journals worldwide	253
Book reviews	293

# Guidelines for Contributors

## Annals of Actuarial Science

*Annals of Actuarial Science* (AAS) is published twice yearly by the Institute and Faculty of Actuaries.

Papers on any area of actuarial research or practice are welcome and will be considered for publication. Suitable topics include, but are not restricted to: new developments in actuarial practice; original research in actuarial science and related fields; or reviews of developments in a field of interest to the actuarial profession.

All papers should be written in English (UK). The style should be reasonably formal, but should be as clear and understandable as possible. Enough information should be included to allow a reader to reproduce any mathematical or numerical results.

All papers are peer-reviewed by anonymous referees appointed by the Editor. Papers may need minor or major revisions before they can be accepted for publication, or they may be considered to be unsuitable for AAS. The Editor's decision is final.

Each paper must include an abstract, keywords and contact details of relevant authors. The abstract, which should be about 100–200 words, should be written so that others are encouraged to read the paper. It should give the main objectives and conclusions of the paper.

Papers should be submitted electronically to the Editor, using pdf format. If the paper is accepted, a Word or LaTeX version will be required and all diagrams and figures must be provided separately in tif, gif, jpeg or eps format.

All published work must be acknowledged, and references given. The author is responsible for securing written permission to include any copyrighted material. Notwithstanding any scrutiny and any alterations made, authors remain solely responsible for the accuracy of all material provided and views expressed. Papers must not have been copyrighted or submitted for publication elsewhere at the same time as being submitted to AAS. Any previous publication, for example in conference proceedings, must be notified to the editor at the time of submission. If the paper is accepted for publication the author(s) must sign a copyright declaration, transferring copyright to the Institute and Faculty of Actuaries.

All correspondence should be addressed to the Editor below.

JOURNALS

# Journal of Pension Economics and Finance

## Editors

Steven Haberman, *Cass Business School, UK*

Moshe Milevsky, *York University, Canada*

J. Michael Orszag, *Watson Wyatt, UK*

The *Journal of Pension Economics and Finance (JPEF)* is the only academic journal focusing on the economics and finance of pensions and retirement income. The ageing population, together with the shrinking workforce, heralds a growing pensions crisis, which has become a key public policy issue in developed countries and elsewhere. *JPEF* provides a valuable and influential forum for international debate in this area.

The journal publishes original research papers, covering a variety of topics, including pension fund management, the regulation of pensions, and pensions and labour markets.
