Reducing the hidden costs of nosocomial UTI

Are you even on the map?

The BARDEX® I.C. Foley Catheter can save your hospital up to \$322,000 per year.¹

There are over 900,000 NUTIs each year, costing an average of \$3,800 apiece in non-reimbursable expenses.² These costs often remain hidden because of the complexity of tracking NUTIs.

The silver and hydrogel-coated BARDEX® I.C. Foley Catheter has been proven to reduce the incidence of costly NUTIs by 22-80%. The individual examples shown are just a few of the more than 500 success stories involving hospitals that significantly reduced infection rates – and costs – after converting to the BARDEX® I.C. system.

For more information on the BARDEX® I.C., contact your BARD Representative or call 1-800-526-4455. You can also visit our website at www.bardmedical.com.

Ingelwood, CA
11,381 annual admissions

BE A PART OF THE NEW VA DIRECTOR, NATIONAL CENTER HEALTH PROMOTION & DISEASE PREVENTION DURHAM, NC

The Department of Veterans Affairs (VA) is seeking a board certified physician to join its Primary and Ambulatory Care Strategic Healthcare Group (SHG) as Director of the National Center for Health Promotion and Disease Prevention (NCHPDP), located in Durham, NC. The Primary and Ambulatory Care SHG develops VA policies to assure accessibility and availability of high quality health promotion and disease prevention services in VA facilities nationwide and monitors delivery of services to assure that they are effectively and efficiently provided. Active liaison with VA clinical leaders in both headquarters and the field, and with external health care organizations will enable participation in a broad range of health care areas. The Director will report to the Chief Consultant, Primary and Ambulatory Care SHG located in Headquarters, Washington D.C. The Director coordinates the Veterans Health Administration (VHA) health promotion and disease prevention activities with other program offices such as Quality Assurance, Employee Education System and Research. The VA operates an integrated healthcare system providing one million acute hospitalizations and over 30 million outpatient visits per year, with a staff that includes 12,000 physicians, 600 dentists and over 30,000 nurses.

U.S. citizenship, an M.D. degree with a current license to practice medicine and board certification are required. Board certification in Preventive Medicine is preferred; full consideration will be given to applicants boarded in other specialties with appropriate background and experience. Salary ranges from \$110,000 to \$150,000, depending on experience and previous federal service. Selected candidate will be appointed for an initial period of 4 years, with possibility of extensions and/or reappointment. Location of assignment is in Durham, NC. The Director may continue his or her involvement in direct patient care. Current employees of the VA must include a copy of latest annual proficiency report, and all applicants must include three letters of reference.

Other factors considered include:

- Clinical background with current knowledge and experience particularly in evidence based medicine
- Knowledge of education and research programs related to health promotion and disease prevention
- Demonstrated record of creative problem solving, especially in large organizations
- History of successful participation in interdisciplinary teamwork
- Knowledge of evolving trends in provision of prevention services
- Demonstrated ability to work effectively in large administrative organizations
- Effective communication skills, both verbal and written

VA is an equal opportunity employer. Women and minorities are encouraged to apply. Applicants should forward a complete curriculum vita, including any publications, and three letters of recommendations to:

Alex Kutner
Administrative Assistant (112)
Department of Veterans Affairs (VACO-VHA)
Primary and Ambulatory Care SHG (112)
810 Vermont Avenue, NW
Washington, D.C. 20420

Curriculum vita and other documentation should arrive no later than 1 June 2000.

The Society for Healthcare Epidemiology of America

2000 SHEA/CDC Training Course in Hospital Epidemiology

Program

The program will be held October 14-17, 2000 at the Cincinnati Marriott at RiverCenter, Covington, Kentucky. Timothy W. Lane, M.D., Julie Gerberding, M.D., and Gina Pugliese, R.N., M.S., will co-chair the program. This program, developed by the Society for Healthcare Epidemiology of America (SHEA), and the Centers for Disease Control and Prevention (CDC), is intended for infectious disease fellows and new hospital epidemiologists. It emphasizes hands-on exercises in which participants work in small groups to detect, investigate, and control epidemiological problems encountered in the hospital setting. These work sessions are supplemented with lectures and seminars covering fundamental aspects of hospital epidemiology and surveillance, epidemic investigation, transmission and control of nosocomial infections, disinfection and sterilization, employee health, isolation systems, regulatory compliance, and quality improvement.

Who Should Attend

You should attend if you are a hospital epidemiologist or an infection control practitioner or if you are looking for a course that will provide you with the most current information concerning infection control practices and epidemiological methods in health care. This fundamental program will provide you with opportunities to find solutions to real situations that will occur in the hospital setting. Intensive problem solving sessions are supplemented with lectures and seminars presented by leading authorities.

Scholarships

Scholarships in the amount of \$1,000 will be awarded to infectious disease fellows for the program to defray the special course fee for fellows of \$400 and expenses incurred in attending the training program.

Interested fellows must submit a letter of no more than one page describing why they would like to have additional training in hospital epidemiology. A letter from the fellow's program director outlining the applicant's qualifications and suitability

for the course also is required. The deadline for receipt of scholarship applications for the course is September 1, 2000. The SHEA Educational Activities Committee will select the scholarship recipients based on review of these letters. Winners will be notified in late September.

Nominations

Please send scholarship applications to:

Timothy W. Lane, M.D.
c/o The Society for Healthcare Epidemiology of America
19 Mantua Road
Mt. Royal, NJ 08061

Fees

Individual Registrants \$575
Fellows in Infectious Disease \$400

Credits

The Society for Healthcare Epidemiology of America (SHEA) is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians.

The Society for Healthcare Epidemiology of America designates this continuing education activity for up to 23 hours in Category 1 of the Physician's Recognition Award of the American Medical Association.

General Course Information

Information regarding the schedule, hotel and travel accommodations, discount airfare, and course fees are available from SHEA (856) 423-7222. Note that application for a scholarship does not constitute enrollment in the program. This must be done separately.

Scholarship Awards provided in part by an educational grant from Pfizer Pharmaceuticals.
