ADAMS D. H.: A note on constructible lattices	296
AHUJA J. C.: Concavity properties for certain linear combinations of stirling numbers . . .	145
AN CHUNG-MING.: A note on a functional equation	385
ANDERSON I. W.: <i>See</i> R. P. Hunter	7
APPLEBAUM C. H. The recursive equivalence type of a decomposition of an ω -group: The RET of a decomposition	172
BASU N. K.: Harmonic inversions in $PG(4, 3)$ and some related configurations	54
BERTMAN M.: Double ideals in compact semirings	123
BOYTE J. M.: Point (Countable) paracompactness	138
CHOY S. T. L.: On central primitive idempotent measures	415
CLEMENTS D. L.: Two contact problems in anisotropic elasticity	35
CORNISH W. H.: Annulets and α -ideals in a distributive lattice	70
D'ARISTOTILE A. J.: Quasicompactness and functionally Hausdorff spaces	319
DAVIS G.: Representation and extension of semi-prime rings	353
DOW M. A.: Elementary proof of Peano's existence theorem	366
EBERHART C.: Idempotent generated regular semigroups	27
FOULIS D. J.: <i>See</i> C. H. Randall	94
GAGRAT M. S.: Wallman compactifications and Wallman realcompactifications	417
GRIFFITHS R. C.: An expansion for the permanent of a doubly stochastic matrix	504
GUPTA R. G.: <i>See</i> K. D. Sharma	193
HARRIS V. C.: An arithmetic sum with an application to quasi k -free integers	272
HAUPTFLEISCH G. J.: A note on central group extensions	428
HEINIG H. P.: On the existence of solution of the Greenspan-Carrier equation	373
HEROD J. V.: The uniform limit of Lipschitz functions on a Banach space	325
HOGAN J. W.: Homomorphisms and congruences on ω^x -bisimple semigroups	441
HOLTON D. A.: A report on stable graphs	163
HOLTON D. A. Stable trees	476
HUNTER R. P. Homomorphisms having a given H class as a single class	7
JAKIMOVSKI A. Tauberian theorems for $\delta[J, f(x)]$ transformations	202
JANOWITZ M. F. <i>See</i> C. H. Randall	94
KINCH I.: <i>See</i> C. Eberhart	27
KINGSTON J. G.: <i>See</i> C. Rogers	179
KLUVANEK I.: On product of vector measures	22
KRISHNA J. G.: On orders and types of an entire function over C^k	393
LIVINE A.: <i>See</i> A. Jakimovski	202
MARCUS M.: A relation between the permanental and determinantal adjoints	270
MATHIAS A. R. D.: On sequences generic in the sense of Prikrý	409
MERRIS R.: <i>See</i> M. Marcus	270
MILNES P.: Compactifications of semitopological semigroups	488
MOON J. W.: Random walks on random trees	42
NAIMPALLY S. A.: <i>See</i> M. S. Gagrát	417

ORDMAN E. T.: Factoring a group as an amalgamated free product	222
PIZIAK R. Orthomodular posets from sesquilinear forms	265
PRASAD S.: <i>See</i> D. Suryanarayana	148
RAHA A. B.: Maximal topologies	279
RANDALL C. H.: Orthomodular generalizations of homogeneous Boolean algebras	94
RAO I. H. N.: <i>See</i> J. G. Krishna	393
ROGERS C.: Application of Baecklund transformations to the Stokes-Beltrami equations	179
ROHATGI V. K.: On sequential estimation of a certain estimable function of the mean vector of a multivariate normal distribution	291
SAG T. W.: Minimal presentations for groups of order 2^n , $n \leq 6$	461
SCHULTZ F.: The endomorphism ring of the additive group of a ring.	60
SELDEN J.: <i>See</i> M. Bertman	123
SHANKER O.: On generating functions for classical polynomials	389
SHARMA K. D.: A one-step method for the numerical solution of ordinary non-linear second-order differential equations based upon Lobatto four-point quadrature formula	193
SHENG T. K.: Distribution of rational points on the real line	243
SMRZ P. K.: Gauge invariance of the Diract equation	117
————— Fibre bundles and Yang-Mills fields	482
SPEED T. P.: A note on commutative Baer rings III	15
STREET R. Homotopy classification of filtered complexes	298
SUBBARAO M. V.: <i>See</i> V. C. Harris	272
————— The divisor-problem for (k, r) - integers	430
SURYANARAYANA D.: Sum functions of k -arty and semi- k -sum divisors	148
————— <i>See</i> M. V. Subbarao	430
————— A remark on "Uniform 0-estimates of certain error functions connected with k -free integers"	177
TAM K. K.: <i>See</i> H. P. Heinig	373
TASTOGI S. C.: <i>See</i> V. K. Rohatgi	291
TONG A.: Weak and norm sequential convergence in $M(S)$	1
USTINA F.: On a lemma of L. Lorch and D. J. Newman	78
VARMA A. K.: Hermite-Birkhoff trigonometric interpolation in the $(0,1,2,M)$ case.	228
VAUGHAN-LEE M. R.: Centre-by-metabelian Lie algebras	259
VYBORNY R.: <i>See</i> M. A. Dow	366
WAMSLEY J. W.: <i>See</i> T. W. Sag	461
WATSON D.: A refinement of theorems of Kirchberger and Carathéodory	190
WILDE C.: Characterization of finite amenable transformation semigroups	86
WILKEN D.: <i>See</i> A. Tong	1
WILLIAMS W.: <i>See</i> C. Eberhart	27
WIRTH A.: Compatible tight Riesz orders	105
WORLEY R. T.: Denominator sequences of continued fractions I	112
————— Denominator sequences of continued fractions II	470
YAMADA M.: Exclusive semigroups	332
YAMAMURO S.: On the semigroup of bounded C^1 mappings	129
