

WE THE PEOPLE

**The
Economic Origins
of the
Constitution
by**

Forrest McDonald

• “Vast, deep, ambitious, unconventional, even audacious . . . A fascinating and significant study.”—RICHARD P. McCORMICK, Rutgers University.

• “McDonald’s labors have been almost incredible. He has actually done all the work Beard himself suggested would be necessary in order to give definitive answers to the questions Beard raised. . . .”—EDMUND MORGAN, Yale University.

• “Had Beard done this work, and had he been true to the evidence as he found it, he must have arrived at the same conclusions.”—ROBERT E. BROWN, Michigan State University.

• “I am amazed at the comprehensiveness of McDonald’s understanding of the period.”—JAMES B. HEDGES, Brown University.

In 1913 CHARLES A. BEARD’S *An Economic Interpretation of the Constitution of the United States* uprooted previous conventions of historical analysis by demonstrating that the Founding Fathers were motivated chiefly by economic self-interest.

Challenging this view, which has itself solidified into a convention, Forrest McDonald has written one of the most important books on American political history to appear in many years. Avoiding Beard’s imposing shadow as he examines Beard’s work, he contributes greatly to a new understanding of the economic and political forces at work in the 1780’s and clears the decks for future fresh interpretations of history. Forrest McDonald is executive secretary, American Research Center, Madison, Wisconsin.

DAVID POTTER, writing in *The Saturday Review of Literature*: “In **WE THE PEOPLE** Forrest McDonald has written what may prove to be one of the most important books on American history in recent years. His formidable study . . . subjects Charles A. Beard’s economic interpretation of the Constitution to one of the most smashing analyses ever mounted in the literature of historical criticism . . . McDonald has done a staggering amount of research . . .” \$7.00

As Unions Mature

An Analysis of the Evolution of American Unionism

By RICHARD A. LESTER

This is a forcefully written book about how American unions got to be what they are, where they stand now, and where they go from here. Richard A. Lester, Princeton University economist and expert on industrial relations, suggests that the missionary zeal and anti-boss militancy have gone out of unions as they have grown older, larger, more powerful, and more settled. He tells how union ideals tend to break down, how democracy in unions tends to collapse, and how corruption can creep in. *As Unions Mature* is an objective appraisal that gives a better foundation for understanding mature unions of today and for intelligent judgment of current proposals for union reform.

184 pages. \$3.75

International Financial Transactions and Business Cycles

By OSKAR MORGENSTERN

This book examines how economic disturbances spread through financial markets and financial operations between the economy of the United States and several other countries, particularly Great Britain, France, and Germany. Through an examination of past policies the author makes an important contribution toward future policy-making. *Published for the National Bureau of Economic Research.*

640 pages. Tables & Charts. \$12.00

The French Economy and the State

By WARREN C. BAUM

This study provides a full view of the French economy and how it affects France as a state. The author deals with government efforts to reconstruct the economic system and control inflation and recession cycles, and shows how the state acts as a regulator of private enterprise. He also discusses the state's traditional role of public financier and its less orthodox role as entrepreneur in a large part of the economy now under public ownership. *A RAND Corporation Research Study.*

GREAT BASIN KINGDOM

AN ECONOMIC HISTORY OF THE LATTER-DAY SAINTS, 1830-1900

By *LEONARD J. ARRINGTON*. The Mormon dream of building a true kingdom of God was a part of a great American dream. Their experiment in group economics, too, can be regarded as a more explicit formulation of the total American experience. For economists and social scientists, this is an invaluable study of an "underdeveloped" American economy; for historians, an exploration of one of the most neglected phases of American history; and for students of religion, a comprehensive treatment of one of the few native American religious movements. \$9.00

NORWAY

THE PLANNED REVIVAL

By *ALICE BOURNEUF*. How closely has Norway's program of economic planning matched the results? This important, detailed statistical and historical analysis may serve as a useful pilot study for other countries engaged in economic planning. In addition, it throws considerable light on how future aid programs may best promote recovery or development. \$5.00

EXETER, 1540-1640

THE GROWTH OF AN ENGLISH COUNTY TOWN

By *WALLACE MacCAFFREY*. This study of life in a provincial capital is focused on Elizabethan-Tudor Exeter, its middle class and its civic administration. Such major issues as the Reformation, the Spanish war and the monarchy are looked at from the point of view of the provincial merchants who subordinated or even pushed aside national concerns if they stood in the way of local interests. Special emphasis is placed on the self-sufficiency of the community and the way in which tight control was maintained over every phase of civic life by a small interrelated group of merchant families. \$5.50

WATER RESOURCE DEVELOPMENT

THE ECONOMICS OF PROJECT EVALUATION

By *OTTO ECKSTEIN*. Designed to improve project evaluation standards, this is a critique of the procedures used by the federal government to justify and evaluate public works in the water resource field. The methods of measuring benefits and costs that have been devised for flood control, irrigation, navigation and electric power projects are examined; the major sources of bias are identified; and suggestions are made to improve evaluation practices. Charts and tables. \$6.50
