# Main Economic Policy Areas of the EEC

edited by Peter Coffey *Europa Institute, University of Amsterdam, the Netherlands*

1983, 168 pp., cloth  
Dfl. 65.00 (approx. US\$ 28.00)

ISBN 90-247-2793-6

*Main Economic Policy Areas of the EEC* is one of the most up-to-date, constructive and critical assessments of the Common Market's principal economic policy areas, written by a group of leading European experts. It appears at a most opportune time when the Common Market, faced with grave economic problems, is most likely to adopt more protectionist policies. Each of the community's main economic policy areas is examined from an applied, as well as a theoretical, standpoint. The authors assess the results of these policies and, taking into consideration the difficulties likely to arise from further enlargement of the Community, make their own proposals for the future. This work is a vital handbook for all those interested in the field, especially those concerned with Portugal's and Spain's membership of the European Economic Community.

## CONTENTS
