# THE JOURNAL OF THE SOCIETY OF DAIRY TECHNOLOGY

17 DEVONSHIRE STREET, LONDON, W.1. *Tel. Langham 5059*

The Journal is issued in quarterly parts, four parts constituting a volume. The parts are usually issued in January, April, July and October each year.

The Subscription rate to non-members of the Society, payable in advance, is £2. 12s. net per volume (post free): single numbers, 15s. net. Subscriptions and all business enquiries should be sent to the Secretary, Society of Dairy Technology, 17 Devonshire Street, London, W. 1.

Each member of the Society receives one free copy of each number. One further copy of each number may (if available) be bought by members for 10s.

## CONTENTS OF THE JANUARY ISSUE

### General Meeting

Dairy Water Conservation and Effluent Disposal, by M. M. MUERS

### 21st Annual General Meeting

The Gravimetric Measurement of Milk Total Solids in Large Numbers, by R. WAITE and J. MCPHILLIPS

The Problems of Management in the Larger Dairy Herd, by G. R. STEWART SANDEMAN

### Personalia

Chemical Cleaning and Sterilizing on Dairy Farms, by WENDY McCULLOCH

Trends in Milk Production, by D. L. ARMSTRONG

The Milk and Milk Products Technical Advisory Committee

### Obituary

### Section Notes

The Society's 21st Anniversary Celebration

The Society's Committees, 1964-65

## CONTENTS OF THE JULY ISSUE

### General Meeting

Subject: The Milk Quality Control Schemes: Hygienic Aspects

England and Wales, by D. I. JENKINS

Scotland, by I. A. MCALPINE

Northern Ireland, by G. CHAMBERS and J. G. MURRAY

A Producer's View, by T. B. BODEN

A Processor's View, by R. C. WRIGHT

### Personalia

Developments in Dairy Equipment, by A. GRAHAM ENOCK

Ten-day Study Tour of the Dutch Dairy Industry, by W. ATKINSON

Circulation Cleaning of Pipeline Milking Machines in Parlours: The Value of a Pre-milking Chlorinated Rinse, by MARJORIE S. MIDDLETON, J. J. PANES, DORINE R. WIDDAS and G. WILLIAMS

### Correspondence

The Swedish Study Tour, 1964, by T. FOLEY

The Accuracy of Milk Meters, by J. B HOYLE.

### Book Reviews

### Section Notes

*The Journal publishes not only papers read at meetings of the Society,  
but also papers on dairy technology by members and non-members*

*Advertising Offices: 9 COUGH SQUARE · LONDON · E.C. 4*

COMMONWEALTH BUREAU OF DAIRY SCIENCE & TECHNOLOGY  
SHINFIELD · READING · ENGLAND

The Bureau is the world's information centre on all matters concerned with dairy husbandry, science and technology. It prepares abstracts, review articles, Technical Communications in book form, and undertakes to answer technical enquiries from authentic dairy scientists.

PUBLICATIONS INCLUDE

## DAIRY SCIENCE ABSTRACTS

COMPILED MONTHLY FROM WORLD LITERATURE

*Annual Subscription* 70s. to subscribers in the Commonwealth and the Republic of Ireland, whose Governments contribute to the Commonwealth Agricultural Bureaux

140s. to subscribers in non-contributing countries

THE MILK FAT GLOBULE MEMBRANE by N. KING

*Cloth bound* 99 pp. *Price* 15s. 0d.

MILK AND BUTTERFAT RECORDING by E. D. ASHTON

*Cloth bound* 205 pp. *Illustrated* *Price* 30s. 0d.

*Orders and subscriptions should be sent to*

COMMONWEALTH AGRICULTURAL BUREAUX · CENTRAL SALES BRANCH  
FARNHAM ROYAL · BUCKS · ENGLAND

## Indian Journal of Dairy Science

Established in 1948 as a medium for the advancement and dissemination of knowledge in regard to dairy science. Published quarterly in March, June, September and December. Subscription £1 sterling or \$4.00 in dollar areas. For further particulars apply to the Hon. Joint Secretaries, Indian Dairy Science Association, Hosur Road, Bangalore 1 (India).

Editor: Dr NOSHIR N. DASTUR, M.SC., PH.D., A.I.I.S.C.

(CONTENTS OF VOL. XVII, No. 2, JUNE 1964)

### REVIEW ARTICLE No. 1

Review of the Investigations on the Physiology of Indian Buffaloes. D. N. MULLICK.

Some Technological Aspects of Kumiss Production. K. C. MAHANTA.

Quantitative Changes in the Microbial Population during the Manufacture of Butter. V. B. SINGH, Y. S. RAO and S. N. SINGH.

The Application of Dye Binding Methods for the Estimation of Proteins in Buffaloes' Milk and Dairy Products. M. H. ABD-EL-SALAM.

Studies on Rapid Methods for Determining Concentration of Spermatozoa in Hariana and Buffalo Semen. J. C. TYAGI and U. D. SHARMA.

Milking by Machine under Indian Farm Conditions. D. SUNDARESAN, S. S. MALIK and M. P. TIWARI.

Effect of Season of Calving on Milk Production and Age at First Calving and its Effect on First Lactation and Subsequent Production. S. P. SIDHU.

Influence of Length of Preceding Dry Period on the Subsequent Lactation Performance of Murrah Buffaloes. D. VENKAYYA and C. P. ANANTAKRISHNAN.

### SHORT COMMUNICATIONS

Boric Acid, an Inhibitor of Milk Enzymes in Commercial Liquid Rennet. N. C. GANGULI and V. R. BHALERAO.

---

# ANIMAL PRODUCTION

## JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

Contents of Volume 7, Part 3, October 1965 include:

- HADJIPIERIS, G., JONES, J. G. W. and HOLMES, W. The effect of age and live-weight on the feed intake of grazing wether sheep.
- HOLME, D. W. and ROBINSON, K. L. A study of water allowances for the bacon pig.
- ROBERTSON, ALAN. The interpretation of genotypic ratios in domestic animal populations.
- HOLME, D. W., COEY, W. E. and ROBINSON, K. L. The effect of level of dietary protein on the carcass composition of bacon pigs.
- BOWERS, H. B., PRESTON, T. R., MACLEOD, N. A., McDONALD, I. and PHILIP, EUPHEMIA B. Intensive beef production. 5. The effect of different sources on nitrogen retention.
- LARGE, R. V. The effect of concentration of milk substitute on the performance of artificially reared lambs.
- MCCARTHY, J. C. Genetic and environmental control of foetal and placental growth in the mouse.
- WIENER, G. and SLEE, J. Maternal and genetic influences on follicle and fleece developments in Lincoln and Welsh Mountain sheep—study involving egg transfer.
- SMITH, C. and ROSS, C. J. S. Genetic parameters of British Landrace bacon pigs.
- PRESTON, T. R., BOWERS, W. B., MACLEOD, N. A. and PHILIP, EUPHEMIA B. Intensive beef production. 6. A note on the nutritive value of high moisture barley stored anaerobically.
- BOWLAND, J. P., BRAUDE, R. and ROWELL, J. G. A note on relations between carcass characteristics of bacon pigs and weaning weight, rate of gain and length.
- LAWRENCE, T. L. J. and PEARCE, J. A note on the effect of certain variables on the performance of early-weaned calves.
- ROBERTSON, K. J. A note on the influence of parity of dam on daughter heifer performance and on selection of replacements in dairy cattle.

This Journal is published three times a year in February, June and October.

The annual subscription rate is 65s. (U.S.A. \$11.00) single copy 25s. (U.S.A. \$4.00). Orders and subscriptions may be sent to any bookseller or direct to:

**OLIVER AND BOYD LTD.,**  
Tweeddale Court, 14 High Street, Edinburgh, 1

Variations of conception rates. P. SHANNON  
Variances in herd fertility. J. R. SPEARS

# The Journal of General Microbiology

Editors

B. C. J. G. KNIGHT  
and A. F. B. STANDFAST

Vol. 40, No. 3. September 1965

## CONTENTS

- L. K. DUNICAN and H. W. SEELEY, JUN. Extracellular polysaccharide synthesis by members of the genus *Lactobacillus*: conditions for formation and accumulation.
- T. H. MELVILLE. A study of the overall similarity of certain Actinomycetes mainly of oral origin.
- M. SHILO and B. BRUFF. Lysis of gram-negative bacteria by host-independent ectoparasitic *Bdellovibrio bacteriovorus* isolates.
- W. B. MOORE. Separation, characteristics and minimal amino-acid requirements of six variants derived from a strain of *Bacillus cereus*.
- R. G. MITCHELL and S. K. R. CLARKE. An Alcaligenes species with distinctive properties isolated from human sources.
- L. M. EVISON and A. H. ROSE. A comparative study on the biochemical bases of the maximum temperatures for growth of three psychrophilic micro-organisms.
- I. SASAKI and G. BERTANI. Growth abnormalities in Hfr derivatives of *Escherichia coli* strain C.
- J. KLECZKOWSKA. Mutations in symbiotic effectiveness in *Rhizobium trifolii* caused by transforming DNA and other agents.
- T. S. THEODORE and A. L. SCHADE. Carbohydrate metabolism of iron-rich and iron-poor *Staphylococcus aureus*.
- R. WILSENACH and M. KESSEL. On the function and structure of the septal pore of *Polyporus rugulosus*.
- R. WILSENACH and M. KESSEL. The role of lomasomes in wall formation in *Penicillium vermiculatum*.
- A. S. JONES, J. R. TITENSOR and R. T. WALKER. The chemical composition of the nucleic acids and other macromolecular constituents of *Mycoplasma mycoides* var. *capri*.

The subscription rate is 80s. net per volume of three parts.  
Single parts 35s. each, plus postage.

Four volumes will be issued each year.  
Orders should be sent to

Cambridge University Press,  
Bentley House, 200 Euston Road,  
London, N.W. 1

# The Journal of Applied Bacteriology

Edited by  
G. Sykes, M.Sc.  
and F. E. Skinner

*The Journal of Applied Bacteriology* (previously known as the proceedings of the Society for Applied Bacteriology) is published for the Society to advance the study of microbiology, particularly bacteriology, in its application to industry.

Long established as an international medium for original papers embracing the many aspects of *applied bacteriology* the Journal serves the widening interests of microbiologists in all fields of research.

The Journal is published three times a year (comprising one volume) in April, August and December.

The Editors are ready to consider for publication papers appearing on all aspects of applied microbiology. Review articles may also be accepted.

Papers submitted for consideration should be addressed to:

G. Sykes,  
Microbiology Division,  
Boots Pure Drug Co. Ltd.,  
Pennyfoot Street,  
Nottingham, England

## SUBSCRIPTIONS

Vol. 28, 1965 \$18.00/126s. per annum.  
Postage outside England 3s. per year.  
Certain back volumes are obtainable from the publishers. All enquiries regarding subscriptions/advertisements should be addressed to the publishers.

London, W. 1,

## DIRECTIONS TO CONTRIBUTORS

### GENERAL

The onus of preparing a paper in a form suitable for publication in the *Journal of Dairy Research* lies in the first place with the author. In their own interests authors are strongly advised to follow these directions carefully and to consult a current issue for guidance on details of layout and use of headings.

Typescripts may be sent to the Editors at any time, and submission of a paper will be held to imply that it reports unpublished original work which is not under consideration for publication elsewhere.

### FORM OF PAPERS

Papers should be typed with double spacing, and the title followed by the names and initials of the authors, women supplying one Christian name. The name and postal address of the laboratory must be stated.

Papers should be divided into the following parts in the order indicated: (a) Summary, brief and self-contained; (b) Introductory paragraphs, briefly explaining the object of the work but without giving an extensive account of the literature; (c) Experimental or Methods; (d) Results; (e) Discussion and Conclusions; (f) Acknowledgements without a heading; (g) References. Only with some exceptional types of material will headings different from (c), (d) and (e) be necessary.

The spelling adopted is that of the *Shorter Oxford English Dictionary*. Underlining should be used only to indicate italics. Every effort should be made to avoid the use of footnotes. Proper nouns, including trade names, should be given a capital initial letter.

### TABLES

Each table should be numbered and should have a heading that enables its contents to be understood without reference to the text. Tables must be typed on separate sheets and their approximate positions indicated in the text.

### ILLUSTRATIONS

Line drawings, which must be originals, should be numbered as Figures and photographs as Plates, in Arabic numerals. Drawings should be in indian ink, on Bristol board or cartridge paper. However, a technique which may be more convenient to authors is to use a double-sized piece of tracing paper, or translucent graph paper faintly lined in blue or grey, folded down the centre with the drawing on one half and the other acting as a flyleaf.

Attached to every figure and plate there should be a translucent flyleaf cover on the outside of which should be written legibly: (a) title of paper and name of author; (b) figure or plate number and explanatory legend; (c) the figures and lettering, which is intended to appear on the finished block, in the correct position relative to the drawing underneath. For each paper there should also be a separate typed sheet listing figure and plate numbers with their legends, and the approximate position of illustrations should be indicated in the text.

As a rule the photographs and diagrams should be about twice the size of the finished block and not larger over-all than the sheets on which the paper itself is typed. For general guidance in preparing diagrams, it is suggested that for a figure measuring 9 in. × 6 in. all lines, axes and curves, should have a thickness of 0.4 mm, thus ———. Graph symbols in order of preference should be ○ ●, △ ▲, □ ■, × +, and for a 9 in. × 6 in. graph the open circles should be  $\frac{1}{2}$  in diameter. The open triangles should be large enough to contain circles  $\frac{3}{8}$  in. diameter and the open squares circles of  $\frac{1}{2}$  in. diameter. The crosses should have lines  $\frac{1}{2}$  in. long. The block symbols should be slightly smaller than the corresponding open symbols. Scale marks on the axes should be on the inner side of each axis and should be  $\frac{1}{2}$  in. long.

### REFERENCES

In the text references should be quoted by whichever of the following ways is appropriate: Arnold & Barnard (1900); Arnold & Barnard (1900a); Arnold & Barnard (1900a, b); (Arnold & Barnard, 1900). Where there are more than two authors all the surnames should be quoted at the first mention, but in subsequent citations only the first surname should be given thus, Brown *et al.* (1901). If there are six or more names *et al.* should be used in the first instance. Also, if the combinations of names are similar the names should be repeated each time, e.g. Brown, Smith & Allen (1954); Brown, Allen & Smith (1954).

References should be listed alphabetically at the end of the paper, title of journals being abbreviated as in the *World List of Scientific Periodicals*. Authors' initials should be included, and each reference should be punctuated in the typescript thus: Arnold, T. B., Barnard, R. N. & Compound, P. J. (1900). *J. Dairy Res.* 18, 158. References to books should include name of author, year of publication, title, town of publication and name of publisher in that order, thus, Arnold, T. B. (1900). *Dairying*. London: Brown and Chester.

It is the duty of the author to check all references and to ensure that the correct abbreviations are used.

### SYMBOLS AND ABBREVIATIONS

The symbols and abbreviations used are those of British Standard 1991: Part 1: 1954, *Letter Symbols, Signs and Abbreviations*.

### DESCRIPTIONS OF SOLUTIONS

Normality and molarity should be indicated thus: N-HCl, 0.1 M-NaH<sub>2</sub>PO<sub>4</sub>. The term '‰' means g/100 g solution. For ml/100 ml solution write '‰ (v/v)' and for g/100 ml solution write '‰ (w/v)'.

### REPRINTS

Order forms giving quotations for reprints are sent to authors with their proofs.
