## SOCIAL FORMATIONS AND POWER IN LATIN AMERICA

edited by **JORGE GRACIANRENA** and **ROLANDO FRANCO**,  
*United Nations Economic Commission for Latin America,  
Santiago, Chile*

Two perspectives are presented concerning the political development of Latin America over the last three decades—the political process in relation to inherent values and ideological frames of reference, and as it has been reflected in the social sciences—through a discussion of regional contributors.

# LATIN AMERICA AND WORLD ECONOMY: A Changing International Order

edited by JOSEPH GRUNWALD

How do nations of Latin America interact with other countries in the world community? This anthology approaches the region's relations with the outside world from both an economic and a political perspective, examining Latin America's desire to integrate with the world economy, as well as its struggle for self-reliance. Latin American and non-Latin American contributors discuss a range of subjects including the character of the "special relationship" between Latin America and the United States, and the ambiguous nature of Latin America's relations with other countries of the Third World.

### Part V. Commentary

The Good Neighbor Policy Revisited, BRYCE WOOD  
Notes on SELA, GABRIEL VALDES S.

*"As long as the notion persists that Latin America is unimportant for the United States and other developed countries, it will be difficult to persuade Latin American countries that they are living in an interdependent world. One-sided importance creates a one-sided dependency relationship. Such a perception results in demands, not cooperation. Cooperation for development becomes meaningful only when there is a recognition of interdependence on both sides of the North-South relationship."*

### **Political Attitudes in Venezuela Societal Cleavages and Political Opinion**

By Enrique A. Baloyra and John D. Martz

In providing a definitive portrait of the political Venezuelan, this book breaks new ground in quantitative research methods. The authors interviewed over 1,500 voters to determine relationships between class, status, community, context, religion, ideology, and partisanship on the one hand and political attitudes and preferences on the other.

336 pages, 22 tables, 27 figures, \$19.95

### **Brazil and the Quiet Intervention, 1964**

By Phyllis R. Parker

It has become apparent, largely through government documents declassified during the course of research for this book, that the United States had an invisible but pervasive part in the overthrow of Brazilian President João Goulart in 1964. Relying principally on documents from the Johnson and Kennedy presidential libraries, Phyllis Parker unravels the events of the coup in fascinating detail.

### **Contemporary Portugal The Revolution and Its Antecedents**

Edited by Lawrence S. Graham  
and Harry M. Makler

Foreword by Juan J. Linz

This volume brings together for the first time the majority of the leading social science experts on Portugal. The result is a comprehensive collection of essays discussing in detail the events leading up to the Portuguese Revolution of 1974, the causes of the military coup, and the movement of a society on the brink of upheaval toward open, democratic parliamentary elections.

# LEADERS OF REVOLUTION

by MOSTAFA REJAI with KAY PHILLIPS

*"Professor Rejai's Leaders of Revolution is a comprehensive report of a major research undertaking. It is the first general comparative study of revolutionary elites; no one to my knowledge has tried anything so broad in scope and historical depth. The empirical work is solid, given the limitation of the sources. The comparative evidence on the life experiences and ideological orientations of revolutionary leaders is a particularly valuable contribution. The 'situational theory' of revolutionary leadership is plausible, especially in the light of the evidence which gives it substance. The clarity of style is exemplary. A distinguished addition to the empirical literature on revolutionary movements."*

— Ted Robert Gurr, Northwestern University

*"LEADERS OF REVOLUTION fills a long-standing void in the literature of revolution and violence. The study presents a remarkable and ingenious comparative analysis of revolutionary elites, using quantified data. At times I had thought it impossible to get any quantifiable comparability between leaders. LEADERS OF REVOLUTION has changed my mind. A bold and pioneering venture."*

# handbook of INTERCULTURAL COMMUNICATION

Edited by: **MOLEFI K. ASANTE, EILEEN NEWMARK,**  
and **CECIL A. BLAKE**, all at *SUNY—Buffalo*

The *Handbook of Intercultural Communication* is a state-of-the-art review of theoretical and methodological findings in the field of communication studies. The original essays in the collection—contributed by an interdisciplinary assemblage of psychologists, anthropologists, and communication specialists—set out ground rules designed to direct research on intercultural communication into a unified field

of inquiry. Illuminating both the similarities that enhance, and the differences that impede communication across cultural boundaries, the *Handbook* will find applications in the areas of diplomacy, immigrant education and counseling, training for service abroad, and the improvement of both interpersonal and international relations.

*"We present this work as a foundation upon which to build. It is interdisciplinary and innovative. Because our intention has been to create a volume which practices what it preaches, we have included manuscripts from differing cultural as well as disciplinary views. It is not enough to discuss the theory of intercultural communication; we must begin to act on the basis of our theory. A book on intercultural communication that presents views from a single perspective indicts itself. Consequently, we have tried scrupulously to avoid that posture. It is to be hoped that other scholars will find instructive value in the structure and substance of this work."*

# INTERNATIONAL NEWS: FREEDOM UNDER ATTACK

edited by Congressman Dante B. Fascell,  
U.S. House of Representatives

Freedom of the press and the free flow of news and information is under attack around the world today. The conflict over media access and independence has developed on several levels: from attempts by a growing number of countries to bar American reporters to restrictive resolutions in UNESCO; from calls for redistributing radio bands to movements toward creating government monopolies on the distribution of information.

Four specialists on these questions have written timely studies touching on every aspect of contemporary international media affairs. Topics include the politics of international broadcasting, the Third World challenge to Western news services, the quality of American foreign coverage, and the ways in which various states are trying to censor news. This is an important and unique book which should be of vital interest to all who make and write the news, as well as the millions of Americans who depend on the media for their knowledge of global events.

# THE WORLD SYSTEM OF CAPITALISM: Past and Present

Edited by Walter L. Goldfrank,

*University of California, Santa Cruz*

The "world-system approach," formulated by Immanuel Wallerstein, series editor of these POLITICAL ECONOMY OF WORLD-SYSTEM ANNUALS, serves to unify the contributions included in this volume. The social scientists who are published here have rejected the traditional ahistorical approach of Western social research in favor of this interdisciplinary, historically oriented, often radical approach to the study of the capitalist world-system. Contributions include theoretical articles and case studies from both the seventeenth and twentieth centuries. Notable is a tantalizing preview of Wallerstein's forthcoming second volume of THE MODERN WORLD-SYSTEM, dealing with stagnation in seventeenth century Europe and its effects.

# CHALLENGES TO AMERICA

## United States Foreign Policy in the 1980s

edited by **CHARLES W. KEGLEY, Jr.**, *University of South Carolina*  
**PATRICK J. McGOWAN**, *University of Southern California*

This, the fourth volume of the Sage International Yearbooks of Foreign Policy Studies, marks the inauguration of a new format for the series—the present and all subsequent volumes will each focus on a specific aspect of foreign policy. *Challenges to America* sets a high standard for all future Yearbooks in considering two important theoretical questions: How is foreign policy shaped by the environmental changes encountered by natural actors? What are the linkages which exist between a state's foreign policy and its domestic and international environments?

In the selected "case-for-analysis"—the United States—the contributors explore the relationship between environmental change and foreign policy response by examining long term secular trends which are likely to present special problems to U.S. society and foreign policy into the 1980s. Topics covered include the strategic arms balance, foreign perceptions of the United States, and the probable nature of the future relations between the United States, Europe, and Japan.

# METROPOLITAN LATIN AMERICA: The Challenge and the Response

Latin American Urban Research, Volume 6

edited by WAYNE A. CORNELIUS, *Massachusetts Institute of Technology*  
ROBERT V. KEMPER, *Southern Methodist University*

This volume focuses on the most critical problems confronting nine major Latin American and Caribbean cities, and the actual responses of local and national governments to these problems. Each chapter provides a comprehensive overview of urban development problems and government performance in dealing with them in a single metropolitan area. Contributors also discuss the role of the metropolitan area in regional and national development, and the tensions between government policies aimed at the problems of the metropolitan area and policies for national and regional development. The volume provides indispensable source material for scholars doing research on specific cities as well as an empirical base for comparative urban studies. It also includes a 1,600-item bibliography of studies on urban Latin America published during the 1974-1976 period.

# EVALUATION RESEARCH AND DEVELOPMENT ACTIVITIES

by FRANCIS W. HOOLE

This study concerns the methodology used to evaluate the impact of development activities. The book presents the methodology of the evaluation research approach, illustrates its use in the development field, and discusses its advantages and limitations. These topics have significant practical importance today as it becomes apparent that numerous development programs of national governments are ineffective and as various technical assistance agencies undergo crises concerning their abilities to accomplish objectives. The book concludes by summarizing the implications which result from this discussion, and makes suggestions for further research.
