**The Basic Papers of George M. Humphrey
As Secretary of the Treasury, 1953-57**

Edited by Nathaniel R. Howard

The Basic Papers report in Mr. Humphrey's own words the fiscal progress he made in four and a half years of federal service in the Eisenhower administration – an immediate and continuous reduction of government expense, a decrease in the first annual impending deficit by half, a tax cut which was the largest historically at its time, and two balancings of the federal budget in his third and fourth years. He brought to his office a businessman's faith in sound fiscal management, and proved that the public would support the soundness of the dollar if its importance to the national economy was fully explained. This book provides a valuable record of the papers of one of our most articulate Secretaries of the Treasury.
