

METHODS AND APPLICATIONS OF PLANT PALEOECOLOGY

Edited by
William A. DiMichele and Scott L. Wing

Originally prepared as notes for the workshop sponsored by
The Paleobotanical Section of The Botanical Society of America
and held August 9, 1987

**THE PALEONTOLOGICAL SOCIETY
SPECIAL PUBLICATION NO. 3
1988**

**Kenneth R. Walker
Series Editor**

Edited and Published for The Paleontological Society at
The Department of Geological Sciences
The University of Tennessee - Knoxville
Knoxville, TN 37996-1040

Paleontological Society Special Publication 3
ISBN 0-931377-02-1
University of Tennessee Publication E0-1-1040-004-89

The University of Tennessee, Knoxville, does not discriminate on the basis of race, sex, color, religion, national origin, age, handicap, or veteran status in provision of educational opportunities or employment or benefits.

UTK does not discriminate on the basis of sex or handicap in the educational programs and activities which it operates, pursuant to requirements of Title IX of the Educational Amendments of 1972, Public Law 92-318; and section 504 of the Rehabilitation Act of 1973, Public Law 93-112; respectively. This policy extends both to employment and admission to the University.

Inquiries concerning Title IX and Section 504 should be directed to the Director of Affirmative Action; 403-B Andy Holt Tower; The University of Tennessee, Knoxville, Tennessee 37996-0144; (615) 974-2498. Charges of violation of the above policy should be directed to the Office of the Director of Affirmative Action.

TABLE OF CONTENTS

DEPOSITIONAL ENVIRONMENTS OF PLANT BEARING SEDIMENTS.....	1
Scott L. Wing	
Plant pieces as sedimentary particles.....	2
Sedimentary characteristics of modern depositional environments.....	3
Summary.....	10
References.....	12
CONSPECTUS OF PHYTOTAPHONOMY.....	14
Robert A. Gastaldo	
Necrology.....	14
Biostratinomy.....	18
Diagenesis.....	22
Conclusions.....	25
References.....	26
QUANTITATIVE SAMPLING OF PLANT MEGAFOSSIL ASSEMBLAGES.....	29
Robert A. Spicer	
Sampling objectives.....	29
Some theoretical considerations.....	31
Abundance measures.....	33
Determining quadrat size.....	40
Minimizing sampling effort.....	44
Sampling coal assemblages.....	46
Summary.....	49
References.....	50
SOME STATISTICAL METHODS USEFUL IN THE ANALYSIS OF PALEOECOLOGICAL DATA.....	52
Warren Lamboy and Alicia Lesnikowska	
Problem 1—Testing whether, based on taxon abundances, two communities are similar enough to be considered examples of the same community.....	53
Problem 2—Assessing whether different ways of measuring abundances give statistically different results.....	59
Problem 3—Measuring the association between two taxa.....	63
Problem 4—Fitting data on taxon abundances to theoretical dominance–diversity models.....	65
References.....	70
MULTIVARIATE METHODS OF ANALYZING PALEOECOLOGICAL DATA.....	72
Warren L. Kovach	
General discussion of methods.....	72
Comparison of methods on plant paleoecological data.....	82
Conclusions.....	97
References.....	103
PALEOECOLOGICAL APPROACHES TO ANALYZING STRATIGRAPHIC SEQUENCES.....	105
Robyn J. Burnham	
Uses of paleoenvironmental reconstructions in stratigraphic sequences: an example from the Eocene.....	106
Paleoecological heterogeneity: the plant data.....	111

Conclusions.....	121
Recommendations.....	121
References.....	122
ENVIRONMENTAL VARIATION, PALYNOFLORAS, AND PALEOECOLOGICAL INTERPRETATION.....	126
Martin B. Farley	
General method.....	126
Palynological data collection.....	127
Analysis of data.....	128
Paleoecological model for interpretation of palynological data.....	129
Palynomorph taphonomy.....	130
Examples.....	136
References.....	142
Paleoenvironmental and paleoecological examples (references).....	145
THE EFFECT OF VEGETATION HETEROGENEITY ON SHORT STRATIGRAPHIC SEQUENCES.....	147
Ralph E. Taggart	
Predictive value of macrofloral assemblages.....	150
Variability and dynamics in the source vegetation mosaic.....	155
Holistic ecosystem reconstruction.....	167
Summary.....	168
References.....	170
