CAMBRIDGE
UNIVERSITY PRESS

Physics

Books and Journals from
Cambridge University Press

Cambridge University Press is a leading publisher of textbooks, handbooks and monographs that span all areas of physics, from condensed matter physics, to theoretical and mathematical physics.

We also publish a key cluster of journals including the *Journal of Plasma Physics*, *Journal of Fluid Mechanics*, and *High Power Laser Science and Engineering*.

For further details visit:

CAMBRIDGE
UNIVERSITY PRESS

- 510 Drop impact on small surfaces: thickness and velocity profiles of the expanding sheet in the air
Y. Wang & L. Bourouiba
- S 535 Air-levitated platelets: from take off to motion
D. Soto, H. de Maleprade, C. Clanet & D. Quéré
- 547 Analysis of the flow field around a rudder in the wake of a simplified marine propeller
R. Muscari, G. Dubbioso & A. Di Mascio
- 570 Weakly nonlinear modelling of a forced turbulent axisymmetric wake
G. Rigas, A. S. Morgans & J. F. Morrison
- 592 Snowflakes in the atmospheric surface layer: observation of particle–turbulence dynamics
A. Nemes, T. Dasari, J. Hong, M. Guala & F. Coletti
- 614 CORRIGENDUM

JFM Rapids (online only)

- S R1 Observations of gravity–capillary lump interactions
N. Masnadi & J. H. Duncan
- R2 Comparison of turbulence profiles in high-Reynolds-number turbulent boundary layers and validation of a predictive model
J.-P. Laval, J. C. Vassilicos, J.-M. Foucaut & M. Stanislas

S indicates supplementary data or movies available online.

- 1 Deep learning in fluid dynamics
J. N. Kutz
- 5 Modelling steady shear flows of Newtonian liquids with non-Newtonian interfaces
P. T. Underhill, A. H. Hirsra & J. M. Lopez
- 24 Viscosity effect on the longwave instability of a fluid interface subjected to horizontal vibrations
D. V. Lyubimov, G. L. Khilko, A. O. Ivantsov & T. P. Lyubimova
- 42 Temporally resolved measurements of heavy, rigid fibre translation and rotation in nearly homogeneous isotropic turbulence
L. Sabban, A. Cohen & R. van Hout
- 69 Influence of slip on the three-dimensional instability of flow past an elongated superhydrophobic bluff body
Y. L. Xiong & D. Yang
- 95 Boundary-layer development and gravity waves in conventionally neutral wind farms
D. Allaerts & J. Meyers
- 131 Numerical investigation of the water entry of cylinders without and with spin
A. Kiara, R. Paredes & D. K. P. Yue
- 165 Statistics of kinetic and thermal energy dissipation rates in two-dimensional turbulent Rayleigh–Bénard convection
Y. Zhang, Q. Zhou & C. Sun
- 185 One-dimensional refraction properties of compression shocks in non-ideal gases
N. Alferez & E. Touber
- S 222 Two-layer electrified pressure-driven flow in topographically structured channels
E. Dubrovina, R. V. Craster & D. T. Papageorgiou
- 249 Small perturbation evolution in compressible Poiseuille flow: pressure–velocity interactions and obliqueness effects
Z. Xie, M. Karimi & S. S. Girimaji
- 277 Colliding drops as coalescing and fragmenting liquid springs
C. Planchette, H. Hinterbichler, M. Liu, D. Bothe & G. Brenn
- 301 Effect of thermocapillary stress on slip length for a channel textured with parallel ridges
M. Hodes, T. L. Kirk, G. Karamanis & S. MacLachlan
- 325 Near-critical swirling flow of a viscoelastic fluid in a circular pipe
Z. Rusak, N. Ly, J. A. Tichy & S. Wang
- 361 Large eddy simulation of propeller wake instabilities
P. Kumar & K. Mahesh
- S 397 Curvature instability of a curved Batchelor vortex
F. J. Blanco-Rodríguez & S. Le Dizès
- 416 Very-large-scale motions in rough-bed open-channel flow
S. M. Cameron, V. I. Nikora & M. T. Stewart
- 430 Linear proportional–integral control for skin-friction reduction in a turbulent channel flow
E. Kim & H. Choi
- 452 Droplet dynamics and fine-scale structure in a shearless turbulent mixing layer with phase changes
P. Götzfried, B. Kumar, R. A. Shaw & J. Schumacher
- 484 Optimal convection cooling flows in general 2D geometries
S. Alben
