BJN

BRITISH JOURNAL OF NUTRITION

Editor-in-Chief

G C Burdge, *University of Southampton, UK*

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multi-disciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology, and the emerging area of nutritional genomics.

JOURNAL OF NUTRITIONAL SCIENCE

Editor-in-Chief

G C Burdge, *University of Southampton, UK*

 **Cambridge
Open**

Journal of Nutritional Science encompasses the full spectrum of nutritional science including public health nutrition, epidemiology, dietary surveys, nutritional requirements, metabolic studies, body composition, energetics, appetite, obesity, ageing, endocrinology, immunology, neuroscience, microbiology, genetics and molecular and cell biology. The Nutrition Society fully engages with the Open Access model of publishing.

NRR

NUTRITION RESEARCH REVIEWS

Editor-in-Chief

Jayne V. Woodside, *Queen's University, Belfast, UK*

Nutrition Research Reviews offers a comprehensive overview of nutritional science today. By distilling the latest research and linking it to established practice, the journal consistently delivers the widest range of in-depth articles in the field of nutritional science and has done so for the past twenty-one years. It presents up-to-date, concise and critical reviews of key topics in nutrition science, advancing new concepts and hypotheses that encourage the exchange of fundamental ideas on nutritional well-being in both humans and animals.

PHN

**PUBLIC HEALTH
NUTRITION**

Editor-in-Chief

Marilyn Tseng, *California Polytechnic State University, USA*

Public Health Nutrition provides an international peer-reviewed forum for the publication and dissemination of research and scholarship aimed at understanding the causes of, and approaches and solutions to, nutrition-related public health achievements, situations and problems around the world. The journal publishes original and commissioned articles, commentaries and discussion papers for debate.

Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the **Directions to Contributors** on the journal's web page at <http://journals.cambridge.org/pns> or contact the Publications Office on +44 1223 347922 (telephone), or pns.edoffice@cambridge.org (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to complete a copy of the 'Licence to Publish' (in lieu of copyright transfer) at the proof stage.

Page format. The *Proceedings of the Nutrition Society* is printed in double-column format (column width of 85 mm) with a text area of 235×177 mm.

Text. Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (.rtf) files. The typescript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures, starting with the objective followed by the key findings and ending in clear conclusion. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing

their content that are comprehensible without reference to the text.

Illustrations. All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

1. Goel V, Cheema SK, Agellon LB, Oraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2–4)'. If a reference is cited more than once the same number should be used each time.

Proofs. PDF page proofs will be accessible to authors from the typesetter's website and should be returned within 48 hours (by email or Express mail) to:

University of Glasgow, 14–17 July 2014

Conference on 'Carbohydrates in health: friends or foes'

Plenary Lecture 1: Boyd Orr Lecture

Malthus is still wrong: we can feed a world of 9–10 billion, but only by reducing food demand
P. Smith 187

Symposium 1: Global challenges and solutions in cereal production

Drought-resistant cereals: impact on water sustainability and nutritional quality
W. T. B. Thomas 191

GM foods: is there a way forward?
H. D. Jones 198

Plenary Lecture 2

Nutritional management of (some) autism: a case for gluten- and casein-free diets?
P. Whiteley 202

Symposium 2: New perspectives on carbohydrates and health

Relevance of liver fat to the impact of dietary extrinsic sugars on lipid metabolism
B. A. Griffin 208

Carbohydrates and obesity: from evidence to policy in the UK
S. A. Jebb 215

Plenary Lecture 3: Waterlow Lecture

The rise and fall of gluten!
I. Aziz, F. Branchi & D. S. Sanders 221

Symposium 3: Non-digestible carbohydrates, gut microbiota and obesity

Gut microbiota and energy balance: role in obesity
M. Blaut 227

The multifactorial interplay of diet, the microbiome and appetite control: current knowledge and future challenges
B. M. Corfe, C. J. Harden, M. Bull & I. Garaiova 235

Postgraduate symposium

Vitamin D and risk of CVD: a review of the evidence
C. M. Fry & T. A. B. Sanders 245

Potential anti-obesogenic properties of non-digestible carbohydrates: specific focus on resistant dextrin
M. R. Hobden, L. Guérin-Deremaux, I. Rowland, G. R. Gibson & O. B. Kennedy 258

New perspectives on bioactivity of olive oil: evidence from animal models, human interventions and the use of urinary proteomic biomarkers
S. Silva, E. Combet, M. E. Figueira, T. Koeck, W. Mullen & M. R. Bronze 268

Is resistant starch protective against colorectal cancer via modulation of the WNT signalling pathway?
F. C. Malcomson, N. D. Willis & J. C. Mathers 282

Plenary Lecture 4

Dietary fibre and health in children and adolescents
C. A. Edwards, C. Xie & A. L. Garcia 292

Nutrition Society Public Health Nutrition Medal Lecture

Empowering people to be healthier: public health nutrition through the Ottawa Charter
M. A. T. Flynn 303

Symposium 4: Whole grains, dietary fibre and grain-derived phytochemicals

Whole-grain foods and chronic disease: evidence from epidemiological and intervention studies
C. J. Seal & I. A. Brownlee 313

Whole grains beyond fibre: what can metabolomics tell us about mechanisms?
A. B. Ross 320

Control of appetite and energy intake by SCFA: what are the potential underlying mechanisms?
E. S. Chambers, D. J. Morrison & G. Frost 328
