Editor-in-Chief

Adam Oliver, *London School of Economics and Political Science, UK*

International trends highlight the confluence of economics, politics and legal considerations in the health policy process. *Health Economics, Policy and Law (HEPL)* provides a forum for inter-disciplinary health policy studies, and will be of use to academics, policy makers, health care managers and professionals. *HEPL* is international in scope, publishing both theoretical and applied work, with articles on all aspects of health policy. *HEPL* is particularly interested in publishing innovative ideas that promise to contribute to improving health and healthcare policy. Considerable emphasis is placed on rigorous conceptual development and analysis, and on the presentation of empirical evidence that is relevant to the policy process. Review articles and debate sections bring readers in touch with current research developments and issues.

Cover Artwork

Winter Seasoning, digitally enhanced watermedia on paper by Thelma Muzik

Thelma Muzik is a native of Redondo Beach, California. Her love of art surfaced in high school, but she set her muse aside to become a lawyer while raising her son, Nat.

In the late 1990s, her love and interest in fine art resurfaced and she became an avid painter. Over the years, she has studied in various workshops with well-known artists, such as Nita Engels and Jeanne Carbonette.

Thelma has participated in several group shows, but the last few years she has focused on creating artwork for the patients at Harbor-UCLA Medical Center in Torrance, California. As an Artist-in-Residence, she has been a member of the Harbor-UCLA Medical Center Arts Team since 2000. Her paintings are hanging in various places around the Medical Center; she has also helped to install other artists' work at the center. The next challenge is working on finding artwork for the new Emergency Department at Harbor-UCLA.

Aims and Scope: The mission of *Prehospital and Disaster Medicine* (PDM) is the distribution of information relevant to the practice of out-of-hospital and in-hospital emergency medical care, disaster health, and public health and safety. PDM provides an international forum for the reporting and discussion of scientific studies, both quantitative and qualitative, that have relevance to the above practices. The major objectives are: (1) the improvement of the types and quality of the care delivered to patients with perceived medical emergencies and to victims of multi-casualty accidents or disasters, including the public health and safety aspects of such events; and (2) the prevention and/or mitigation of the occurrence of such events and of the effects of these events upon the human population and environment.

Call for Papers

Safety and Security of Humanitarian Responders During Public Health Emergencies

Safety and security for humanitarian relief and health workers is a concern during deployment situations. However, in the formal literature there is little scientific or scholarly evaluation of the topic of humanitarian and health response safety and security. The Editorial Board of *Prehospital and Disaster Medicine (PDM)* will devote a future issue to humanitarian and health worker safety and security to support the development of science in this area.

Please submit scientific and scholarly reports on this topic at
<http://mc.manuscriptcentral.com/pdm>

Deadline for submission: March 1, 2013

Prehospital and Disaster Medicine submits all published papers to peer and scientific methods review and adheres to copyediting standards described in the journal Instructions for Contributors.
