Within this article an incorrect figure was included. The correct figure is shown below.

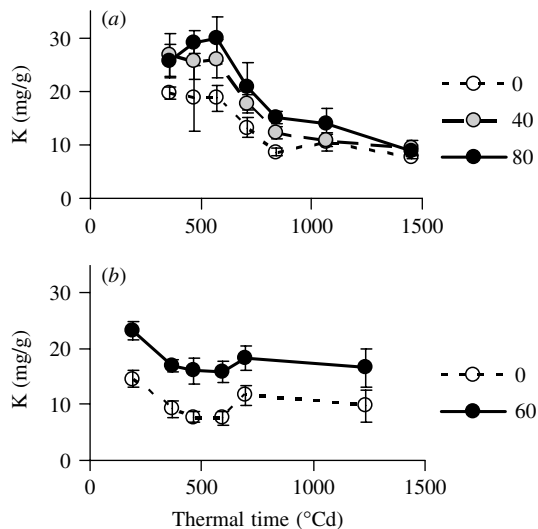

Fig. 7. Leaf potassium concentrations for different K treatments in the Aplahoué-2004 (a) and Savalou-2005 (b) experiments. K was applied to the soil at 130 °Cd post-emergence. K was determined for whole plant leaves and expressed on a dry weight basis. Vertical bars are confidence intervals at $P < 0.05$.
