JFM ARCHIVE

Journal of
Fluid Mechanics
Digital Archive
1956–1996

*Vital research from
the definitive source*

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

Journal of Plasma Physics

Editors

Bill Dorland, University of Maryland Honors College, USA
Alex Schekochihin, University of Oxford, UK

With two new Editors and seven new Associate Editors joining the editorial team *Journal of Plasma Physics* aspires to be the intellectual home of those who think of plasma physics as a fundamental discipline. The journal will particularly focus on publishing research on laboratory plasmas, space physics and plasma astrophysics that takes advantage of the rapid ongoing progress in instrumentation and computing to advance fundamental understanding of multiscale plasma dynamics.

JOURNALS

The ANZIAM Journal

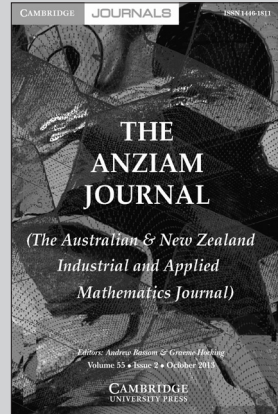

Published for the Australian Mathematical Society

Editors-in-Chief

A. Bassom, *The University of Western Australia, Australia*

G. C. Hocking, *Murdoch University, Australia*

The ANZIAM Journal considers papers in any field of applied mathematics and related mathematical sciences with the aim of rapid publication in print and electronic formats. Novel applications of mathematics in real situations are especially welcomed. All papers should include some indication of applicability, and an introduction that can be understood by non-specialist readers from the whole applied mathematical community.

UNIVERSITY PRESS

- 595 The flow dynamics of the garden-hose instability
F. Xie, X. Zheng, M. S. Triantafyllou, Y. Constantinides & G. E. Karniadakis
- 613 Reynolds stress distribution and turbulence generated secondary flow in the turbulent three-dimensional wall jet
L. Namgyal & J. W. Hall
- 645 Eigenmodes in the water-wave problems for infinite pools with cone-shaped bottom
M. A. Lyalinov
- 666 Three-dimensional instabilities and inertial waves in a rapidly rotating split-cylinder flow
J. M. Lopez & P. Gutierrez-Castillo
- 688 A predictive quasi-steady model of aerodynamic loads on flapping wings
Q. Wang, J. F. L. Goosen & F. van Keulen
- 720 Extension of a viscous thread with temperature-dependent viscosity and surface tension
D. He, J. J. Wylie, H. Huang & R. M. Miura
- 753 The cost of swimming in generalized Newtonian fluids: experiments with *C. elegans*
D. A. Gagnon & P. E. Arratia
- 766 The KP theory and Mach reflection
Y. Kodama & H. Yeh

JFM Rapids (online only)

- S R1 On the trajectory of leading-edge vortices under the influence of Coriolis acceleration
E. Limacher, C. Morton & D. Wood
- R2 Acoustic receptivity simulations of flow past a flat plate with elliptic leading edge
N. Shahriari, D. J. Bodony, A. Hanifi & D. S. Henningson

S indicates supplementary data or movies available online.

- 1 Wrapping up a century of splashes
D. van der Meer
- S 5 Ventilated cavities on a surface-piercing hydrofoil at moderate Froude numbers: cavity formation, elimination and stability
C. M. Harwood, Y. L. Young & S. L. Ceccio
- 57 Dynamics of hemiwicking
J. Kim, M.-W. Moon & H.-Y. Kim
- 72 Reduced-order modelling of the flow around a high-lift configuration with unsteady Coanda blowing
R. Semaan, P. Kumar, M. Burnazzi, G. Tissot, L. Cordier & B. R. Noack
- 111 High-frequency effective viscosity of a dilute suspension of particles in Poiseuille flow between parallel walls
F. Feuillebois, M. L. Ekiel-Jezewska, E. Wajnryb, A. Sellier & J. Bławdziewicz
- 140 Dense gas effects in inviscid homogeneous isotropic turbulence
L. Sciacovelli, P. Cinnella, C. Content & F. Grasso
- 180 The history effect in bubble growth and dissolution. Part 1. Theory
P. Peñas-López, M. A. Parrales, J. Rodríguez-Rodríguez & D. van der Meer
- 213 Gravito-inertial waves in a differentially rotating spherical shell
G. M. Mirouh, C. Baruteau, M. Rieutord & J. Ballot
- S 248 Lift on side-by-side intruders within a granular flow
R. A. López de la Cruz & G. A. Caballero-Robledo
- 264 Interaction forces between microfluidic droplets in a Hele-Shaw cell
I. Sarig, Y. Starosvetsky & A. D. Gat
- 278 Exact solutions to non-classical steady nozzle flows of Bethe–Zel’dovich–Thompson fluids
A. Guardone & D. Vimercati
- S 307 Existence of a sharp transition in the peak propulsive efficiency of a low-*Re* pitching foil
A. Das, R. K. Shukla & R. N. Govardhan
- 327 A self-consistent formulation for the sensitivity analysis of finite-amplitude vortex shedding in the cylinder wake
P. Meliga, E. Boujo & F. Gallaire
- 358 Measurements of passive scalar diffusion downstream of regular and fractal grids
J. Nedić & S. Tavoularis
- 387 Acoustic, hydrodynamic and thermal modes in a supersonic cold jet
S. Unnikrishnan & D. V. Gaitonde
- 433 Flow generated by oscillatory uniform heating of a rarefied gas in a channel
J. Nassios, Y. W. Yap & J. E. Sader
- S 484 Dynamics of red blood cells in oscillating shear flow
D. Cordasco & P. Bagchi
- 517 Transient dynamics of an elastic Hele-Shaw cell due to external forces with application to impact mitigation
A. Tulchinsky & A. D. Gat
- S 531 The effect of thermal boundary conditions on forced convection heat transfer to fluids at supercritical pressure
H. Nemati, A. Patel, B. J. Boersma & R. Pecnik
- 557 Structure and location of branch point singularities for Stokes waves on deep water
P. M. Lushnikov
