

## CORRIGENDA

### **Studies on the digestibility and utilization of the nitrogen of irradiated rumen bacteria by rats**

BY V. C. MASON AND R. PALMER

*J. agric. Sci.* **76**, 567–572

The authors regret that the column in Table 3 on p. 570 headed:

mg DAPA/100 g faecal nitrogen (mean  $\pm$  S.E.)

Should read:

g DAPA/100 g faecal nitrogen (mean  $\pm$  S.E.)

### **The digestion of bacterial mucopeptide constituents in the sheep**

#### **I. The metabolism of 2,6-diaminopimelic acid**

BY V. C. MASON AND F. WHITE

*J. agric. Sci.* **77**, 91–98

The labelling of the abscissa in Figs 4 and 5 should be transposed.

### **The effect of urea on the utilization of ground, pelleted roughage by penned sheep**

#### **III. Mineral supplements**

BY J. B. COOMBE, K. R. CHRISTIAN AND M. D. HOLGATE

*J. agric. Sci.* **77**, 159–174

The authors regret that all serum urea values in this paper should be multiplied by 0.4.

# Grassland Ecology

C. R. W. SPEDDING

This book has been written for all who are interested in forming a coherent view of whole grassland ecosystems; of the animals that live in, on, or under the plant populations as well as the plants themselves. Agriculturally useful plants and animals are emphasized because of the great importance of grassland in world food production. An understanding of whole systems is required, not only to manipulate them safely and successfully for our purposes, but also in order to decide on the best use of resources.
