ENTERED AT STATIONERS' HALL

We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions.—*British Medical Journal*, May 3, 1890.

LISTERINE is an efficient, non-toxic ANTISEPTIC of known and definite power, prepared in a form convenient for immediate use.

It is a saturated solution of boric acid, reinforced by the antiseptic properties of ozoniferous oils.

It is unirritating, even when applied to the most delicate tissue.

It does not coagulate serous albumen.

It is quite generally accepted as the standard antiseptic preparation for use where a poisonous or corrosive disinfectant can not be safely used.

It is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle or douche in catarrhal conditions of the nose and throat.

In proper dilution, it may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

There is no possibility of poisonous effect through the absorption of Listerine.

A pamphlet descriptive of the antiseptic, and indicating its utility in medical, surgical and dental practice, may be had upon application to the manufacturers, Lambert Pharmacal Co., Locust and Twenty-first Streets, St. Louis, Missouri, U.S.A., or to their British Agents, Messrs. S. Maw, Son & Sons, 7-12, Aldersgate Street, London, Eng., but the best advertisement of Listerine is

Medication by Spray.

**ADRENALIN INHALANT
(P., D. & Co.)**

A 1:1000 solution of Adrenalin Chloride with 3 per cent. of Chloretone, which forms a soothing and antiseptic astringent spray valuable in acute nasal catarrh, hay fever, rhinitis, tonsillitis, pharyngitis, etc.

**THE "GLASEPTIC"
NEBULISER.**

An exceptionally effective appliance for the medication of the respiratory passages. Delivers an extremely fine nebula; does not readily get out of order.

The throat tube shown in the illustration is only sent when specially ordered.

A modified pattern (for carrying in the pocket) is also supplied.

**CHLORETONE INHALANT
(P., D. & Co.)**

A 1 per cent. solution of Chloretone in liquid petrolatum, with camphor, menthol and oil of cinnamon, whose antiseptic and local analgesic properties are very effective in nasal catarrh, asthma, bronchitis, pertussis, laryngitis, etc.

**COMPRESSED TABLET,
NASAL (P., D. & Co., No. 34).**

BURROUGHS WELLCOME & CO., LONDON

Portion of a Royal stele of victory of a Babylonian King of the Fourth Dynasty, conferring a charter upon his Captain of Chariots after a battle with the Elamites. The King is called "Bearer of the mighty bow, fearless in battle," and the Elamites were a great host—"by their dust the face of the sun was darkened." The sculpture represents a seated goddess and an archer—a scorpion-man with the legs of a bird. The archaic embroidery on the robe of the goddess is also shown in greater detail. Date, circa 1140-1123 B.C.
