

INDEX OF AUTHORS

Antoine, J. M.	429	Hatfield, D. L.	300	Perez, P. F.	407
Barbeito, S.	354	Irons, R.	300	Perris, P.	354
Basso, A.	290	James, M.	316	Piacenza, F.	290
Bell, I.	442	Jirillo, E.	279	Pierpaoli, S.	290
Benyacoub, J.	407	Klein, P.	416	Pozo, T.	347, 390
Calder, P. C.	373	Kremmyda, L.-S.	373	Prescott, S. L.	366
Cantorna, M. T.	286	Lattanzio, F.	290	Proudman, S.	316
Capitán-Cañadas, F.	454	Leclerc, M.	407	Raguzzini, A.	273
Carlson, B. A.	300	Levenez, F.	407	Requena, P.	454
Cipriano, C.	290	Lorente-Cebrián, S.	324	Romeo, J.	341, 390, 400
Cleland, L.	316	MacDonald, T. T.	442	Sánchez de Medina, F.	454
Costarelli, L.	290	Magrone, T.	279	Santacruz, A.	434
Cunningham, K.	400	Malavolt, M.	290	Sanz, Y.	347, 434
Daddaoua, A.	454	Marcos, A.	271, 341, 347, 390, 400	Schiffirin, E. J.	407
de Moreno de LeBlanc, A.	421	Martínez-Augustín, O.	454	Segura-Roggero, I.	407
Dolores Suárez, M.	454	Martínez, J. A.	324	Serafini, M.	273
Donnet-Hughes, A.	407	Meyer, A. L.	416	Serrant, P.	407
Doré, J.	407	Miles, E. A.	373	Shrimali, R. K.	300
Elmadfa, I.	416	Mocchegiani, E.	290	Slobodianik, N. H.	354
Estruch, R.	333	Moreno-Aliaga, M. J.	324	Strasnoy, I.	354
Feliu, M. S.	354	Moretó, M.	447	Tesei, S.	290
Ferraro, M.	354	Muñoz, S.	381	Thornton, C. A.	357
Franchello, A.	354	Noakes, P. S.	373	Vlachava, M.	373
Gómez-Llorente, C.	381	Nova, E.	347	Wärnberg, J.	341, 390, 400
Gauffin, P.	434	Pérez-Bosque, A.	447	Yaqoob, P.	311
Giacconi, R.	290	Park, J. M.	300	Yoo, M.-H.	300
Gil, A.	381	Peluso, I.	273	Zarzuolo, A.	454
Gladyshev, V. N.	300	Perdigón, G.	421		

Session 5: Early programming of the immune system and the role of nutrition

Chairs: R. Rueda, *Abbott Laboratories, Granada, Spain*; **A. Gil**, *University of Granada, Spain*

- Immunology of pregnancy
C. A. Thornton 357–365
- Allergic disease: understanding how *in utero* events set the scene
S. L. Prescott 366–372
- Is there a role for fatty acids in early life programming of the immune system?
P. C. Calder, L.-S. Kremmyda, M. Vlachava, P. S. Noakes & E. A. Miles 373–380
- Role of Toll-like receptors in the development of immunotolerance mediated by probiotics
C. Gómez-Llorente, S. Muñoz & A. Gil 381–389

Session 6: Role of physical activity on immune function

Chairs: L. Harbige, *University of Kent and University of Greenwich, UK*; **R. Valdés-Ramos**, *Autonoma University of Estado de México, Toluca, Mexico*

- Physical activity, immunity and infection
J. Romeo, J. Wärnberg, T. Pozo & A. Marcos 390–399
- Physical activity, exercise and low grade systemic inflammation
J. Wärnberg, K. Cunningham, J. Romeo & A. Marcos 400–406

Session 7: Prebiotics and probiotics usefulness against pathologies

Chairs: P. Yaqoob, *University of Reading, UK*; **G. Perdigón**, *Cerela, University of Tucumán, Argentina*

- Potential role of the intestinal microbiota of the mother in neonatal immune education
A. Donnet-Hughes, P. F. Perez, J. Doré, M. Leclerc, F. Levenez, J. Benyacoub, P. Serrant, I. Segura-Roggero & E. J. Schiffrin 407–415
- Immune-stimulating effects of lactic acid bacteria *in vivo* and *in vitro*
I. Elmadfa, P. Klein & A. L. Meyer 416–420

Session 8: Probiotics in the defence and metabolic balance of the organism

Chairs: Y. Sanz, *IATA, National Scientific Research Council, Valencia, Spain*; **J. M. Antoine**, *Danone Research Unit, Paris, France*

- The application of probiotic fermented milks in cancer and intestinal inflammation
A. de Moreno de LeBlanc & G. Perdigón 421–428
- Probiotics: beneficial factors of the defence system
J. M. Antoine 429–433
- Gut microbiota in obesity and metabolic disorders
Y. Sanz, A. Santacruz & P. Gauffin 434–441
- Probiotics and the immune response to vaccines
T. T. MacDonald & I. Bell 442–446

Session 9: Food ingredients, immunity and inflammation: animal and *in vitro* models

Chairs: M. Moretó, *University of Barcelona, Spain*; **J. M. Planas**, *University of Barcelona, Spain*

- A rat model of mild intestinal inflammation induced by *Staphylococcus aureus* enterotoxin B
A. Pérez-Bosque & M. Moretó 447–453
- New insights into the immunological effects of food bioactive peptides in animal models of intestinal inflammation
F. Sánchez de Medina, A. Daddaoua, P. Requena, F. Capitán-Cañadas, A. Zarzuelo, M. Dolores Suárez & O. Martínez-Augustín 454–462

Proceedings of the Nutrition Society

Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the **Directions to Contributors** on the Nutrition Society web pages at <http://www.nutritionociety.org> or contact the Publications Office on +44 20 7605 6555 (telephone), +44 20 7602 1756 (fax) or edoffice@nutsoc.org.uk (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to complete a copy of the 'Licence to Publish' (in lieu of copyright transfer) at the proof stage.

Page format. The *Proceedings of the Nutrition Society* is printed in double-column format (column width of 85 mm) with a text area of 235 × 177 mm.

Text. Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (.rtf) files. The typescript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.**

Synopsis. Each paper must commence with a carefully prepared, accurate, informative synopsis, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

Illustrations. All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

1. Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4)'. If a reference is cited more than once the same number should be used each time.

Proofs. PDF page proofs will be accessible to authors from the typesetter's website and should be returned within 48 hours (by email or Express mail) to:

Monica Nelson
2 Leicester Road, Wanstead
London
E11 2DP
UK
email nelsononline@btinternet.com

Typescripts. The electronic version of the paper should be emailed to:

pns@nutsoc.org.uk

10 Cambridge Court
210 Shepherds Bush Road
London W6 7NJ
UK
email edoffice@nutsoc.org.uk

Contents

Platja D'Aro, Girona, Spain, 21–24 October
3rd International Immunonutrition Workshop

Prologue

- Immunonutrition: an international emerging task force
A. Marcos 271–272

Session 1: Antioxidants and the immune system

Chairs: **C. Seal**, *University of Newcastle, UK*; **E. Nova**, *National Scientific Research Council, Madrid, Spain*

- Flavonoids as anti-inflammatory agents
M. Serafini, I. Peluso & A. Raguzzini 273–278
- Polyphenols from red wine are potent modulators of innate and adaptive immune responsiveness
T. Magrone & E. Jirillo 279–285

Session 2: Micronutrients and the immune system

Chairs: **S. Meydani**, *Tufts University, Boston, USA*; **E. Mocchegiani**, *Italian National Research Centres on Ageing, Ancona, Italy*

- Mechanisms underlying the effect of vitamin D on the immune system
M. T. Cantorna 286–289
- Zinc, metallothioneins and immunosenescence
E. Mocchegiani, M. Malavolt, L. Costarelli, R. Giacconi, C. Cipriano, F. Piacenza, S. Tesi, A. Basso, S. Pierpaoli & F. Lattanzio 290–299
- Role of selenium-containing proteins in T-cell and macrophage function
B. A. Carlson, M.-H. Yoo, R. K. Shrimali, R. Irons, V. N. Gladyshev, D. L. Hatfield & J. M. Park 300–310

Session 3: Fatty acids and the immune system

Chairs: **W. Savino**, *Oswaldo Cruz Institute, Río de Janeiro, Brazil*; **N. Slobodianik**, *University of Buenos Aires, Argentina*

- Mechanisms underlying the immunomodulatory effects of *n*-3 PUFA
P. Yaqoob 311–315
- Fish oil and rheumatoid arthritis: past, present and future
M. James, S. Proudman & L. Cleland 316–323
- Regulation of adipokine secretion by *n*-3 fatty acids
M. J. Moreno-Aliaga, S. Lorente-Cebrián & J. A. Martínez 324–332

Session 4: Dietary strategies to prevent and mitigate inflammatory diseases

Chairs: **P. Calder**, *University of Southampton, UK*; **R. Estruch**, *University of Barcelona, Spain*

- Anti-inflammatory effects of the Mediterranean diet: the experience of the PREDIMED study
R. Estruch 333–340
- Drinking pattern and socio-cultural aspects on immune response: an overview
J. Romeo, J. Wärnberg & A. Marcos 341–346
- Dietary strategies of immunomodulation in infants at risk for coeliac disease
E. Nova, T. Pozo, Y. Sanz & A. Marcos 347–353
- Inflammatory biomarker profile in children with cystic fibrosis: preliminary study
N. H. Slobodianik, M. S. Feliu, P. Perris, S. Barbeito, I. Strasnoy, A. Franchello & M. Ferraro 354–356

(Contents continued facing inside back cover)
