The best in Nursing at 10% Discount through B.A.R.N.A. BOOK SERVICE

NEW

Nurse Anaesthesia, 2/e

John Nagelhout, PhD, CRNA, Director and Karen Zaglaniczny, PhD, CRNA, Director – both from the US

This comprehensive reference book focuses on the application of sound scientific principles to modern clinical anaesthesia practice for all types of surgical procedures and patient populations.

Features

- Includes the specifics of pharmacokinetics, drug delivery systems, opiate antagonists and several key induction drugs
- Presents the up-to-date clinical knowledge and expertise of over 50 CRNAs from various practice areas

0 7216 8622 2 November 2000
W B Saunders £69.95 Discount Price £62.96

Nursing the Surgical Patient

Rosemary Pudner, Senior Lecturer, UK

This book takes a comprehensive, patient-centred approach to the nursing care of patients requiring a wide variety of surgical procedures. Presented in three sections, the book offers the reader case studies and care plans from which to build knowledge on surgical care.

Features

- Primary focus is on the nursing role
- Includes recent developments such as day surgery and minimal invasive surgery

0 7020 2247 0 August 2000 Paperback 528 pages 245 illus
Baillière Tindall £29.95 Discount Price £26.96

The Intensive Care Manual

Paul N Lanken, MD, Professor, Medical Director; C William Hansen III, MD, Associate Professor, Section Chief and Scott Manaker, MD, PhD, Assistant Professor, Medical Director – all from the US

This manual covers the entire spectrum of care provided to adult ICU patients. Concise and compact, yet comprehensive, it guides readers step by step from diagnosis through the appropriate treatment for a full range of problems.

Features

- Addresses ICU patients with special needs
- Explores management of patients recovering from critical illness

0 7216 2197 X October 2000 Paperback 830 Pages 205 illus
W B Saunders £43.95 Discount Price £39.56

The Post Anesthesia Care Unit, 3/e

A Critical Care Approach to Post Anesthesia Nursing

Cecil B Drain, Fort Sam Houston, TX, US

The latest edition of the highly regarded work formerly entitled *The Recovery Room: A Critical Care Approach*, offers

an extremely in-depth and strong clinical focus. Coverage includes pathophysiology for all body systems including nursing interventions and pharmacologic interventions. Discussions of the various types of anaesthetic agents include the physiology of action and the appropriate nursing interventions to be anticipated in the PACU.

0 7216 4571 2 October 1994 Paperback 640 Pages 423 illus
W B Saunders £42.95 Discount Price £38.66

Aids to Anaesthesia, 2/e

Clinical Practice

T E J Healy, Professor of Anaesthesia, University Hospital of South Manchester, Manchester and B J Pollard, University Hospital of South Manchester, Manchester – both from the UK

A straightforward, concise account of the subject written as a revision aid for postgraduate anaesthetic trainees. The text covers the application of physiological and pharmacological concepts to medical problems in clinical anaesthesia.

Features

- Popular and established revision book
- Reflects the format of postgraduate exams in anaesthesia

0 4430 4233 0 January 1999 Paperback 224 Pages 27 illus
Churchill Livingstone £15.95 Discount Price £14.36

Surgical Nursing, 12/e

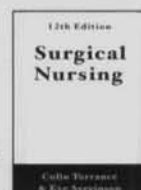

Colin Torrance, Professor, University of Glamorgan and Eve Serginson, Nurse Lecturer, University of Wales – both from the UK

This comprehensive title deals with the core themes and principles of surgical nursing and the overall surgical process. It also covers major common procedures and focuses on the applied anatomy and physiology underpinning surgical interventions and the rationale for nursing care.

Features

- Integrates relevant A & P for each procedure
- Covers most up-to-date procedures such as the impact of day surgery and minimally invasive techniques

0 7020 1969 0 July 1997 Paperback 448 Pages 150 illus
Baillière Tindall £15.95 Discount Price £14.36

Handheld N₂O Monitor

Medigas PM 3010

An economical method of monitoring occupational exposure to anaesthetic gases in hospitals.

Features:

Rapid detection of N₂O levels

N₂O levels displayed in real time or TWA (Time Weighted Average)

Optional alarm protects personnel against high level exposure

Data storage and logging facilities

Applications include:

Risk assessment

Leak detection

Area monitoring

Personal monitoring

Environmental Instruments
Measurement and monitoring solutions - worldwide
