

CAMBRIDGE HISTORY OF MEDICINE

Professional and Popular Medicine in France, 1770-1830

The Social World of Medical Practice

MATTHEW RAMSEY

Professor Ramsey examines the entire range of practitioners who flourished in pre-industrial and early industrial France, from physicians and surgeons to empirics, travelling quacks, folk healers and witches. He shows how medicine became consolidated as a distinct profession, and analyses the social and economic constraints that helped shape the different medical and paramedical occupations.

Morbid Appearances

The Anatomy of Pathology in the Early Nineteenth Century

RUSSELL C. MAULITZ

Morbid Appearances traces the emergence of pathological anatomy in France and England in the early years of the nineteenth century in political, institutional and administrative contexts. The author examines the forces that moved these medical ideas and techniques across national boundaries and from one culture to another.

Medicine and Society in Wakefield and Huddersfield 1780-1870

HILARY MARLAND

By selecting Wakefield and Huddersfield as contrasting types of Northern towns, and examining in detail their systems of medical care, Dr Marland has written a local history which says something important about medicine and society in the country as a whole.

'... a readable and important addition to the publications on the topic.'

British Medical Journal

Ordered to Care

The Dilemma of American Nursing, 1850-1945

SUSAN M. REVERBY

An engaging story of the problems of the nursing profession in America, covering the ideology, practice, and efforts at reform of both trained and untrained nurses between 1850 and 1945. The development of American nursing is placed alongside the development of women's history and the social history of health care.

'... a timely analysis of the contradictions of caring.'

The latest Keynes Press publication marks the ninetieth anniversary of a major breakthrough in tropical medicine

This day designing God
Hath put into my hand
A wondrous thing. And God
Be praised. At His command,

I have found thy secret deeds
Oh million-murdering Death.

I know that this little thing
A million men will save—
Oh death where is thy sting?
Thy victory oh grave?

Not many scientists are moved to verse by the fruits of their research, but few results are as momentous as the one celebrated by Ronald Ross in *The Great Malaria Problem and its Solution*. Adapted from Ross's memoirs, this Keynes Press edition gives the full story of Ross's discovery of the mode of transmission of malaria by the Anopheles mosquito. Engagingly written, it is the frank and accurate picture of four years' painstaking work, full of hope, despair, elation, frustration, and what Ross describes as the "sacred passion for discovery." It also shows the close and moving scientific partnership between Ross and Patrick Manson, the "father of tropical medicine", as evidenced in the 155 letters exchanged between them over this period.

Fully illustrated, and with an introduction by L J Bruce-Chwatt, emeritus professor of tropical public health at the University of London, this unique volume provides a fascinating insight into the process of scientific research as well as a self portrait of one of the most impressive and colourful individuals in the history of tropical medicine.

(From a Mauritian Newspaper, 1908.)

**Official Journal
of the History of
Science Society**

The leading journal in the field, *Isis* goes to 4,500 subscribers in nearly fifty countries. Its articles, critiques, documents, and news of the profession keep professionals, educators, scholars, and graduate students well informed. Lively essay reviews and over 250 book reviews a year cover every specialty in the history of science, technology, and medicine.

In 1988 *Isis* is publishing

ARTICLES by Russell McCormach on Henry Cavendish, Li Peishan on the 1956 Qingdao Conference on Genetics, and Robert K. Merton on the Matthew Effect in Science Revisited

SPECIAL REVIEW SECTIONS on the history of the social sciences, the history of biology, and the history of Islamic science, technology, and medicine

A SPECIAL ISSUE ON ARTIFACT AND EXPERIMENT with articles by Steven Shapin, Ian Hacking, and Sally Gregory Kohlstedt and essay reviews by Lorraine Daston and Peter Galison
AND MUCH MORE!

Subscription to *Isis* also brings • membership in the History of Science Society • the annual *Critical Bibliography*, listing over 3,000 recent publications in the field • the quarterly *Newsletter*, providing current news on jobs, meetings, fellowships, and other opportunities • the triennial *Guide to the History of Science*, listing members and describing programs, societies, journals, and newsletters in the field • reduced rates for *Osiris*, the Society's research annual.
