

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

OLIVER & BOYD, LTD.
EDINBURGH AND LONDON

FEBRUARY 1964

VOL. 6 PART 2

INFORMATION FOR CONTRIBUTORS TO *ANIMAL PRODUCTION*

Animal Production publishes papers on original research provided that they have not been and, with the exception of authors' summaries, will not be published elsewhere without the Editors' written permission. Authors' summaries can be reproduced if full acknowledgement of the source is made.

Contributions may be in the field of animal production, or in any related scientific field. Reports on techniques will also be considered but only as appendices to scientific papers.

Manuscripts should be typewritten in double spacing with wide margins and the lines on each page should be numbered. *Two* copies of the typescript (one of illustrations) should be sent to

Dr. Gerald Wiener,
A.R.C. Animal Breeding Research Organisation,
West Mains Road, Edinburgh 9.

Manuscripts are not returned with the proofs; authors should therefore retain copies.

Length of papers should not normally exceed the equivalent of 6,000 words, inclusive of tables, text figures and references.

Illustrations (figures and plates) should be simple and few, otherwise a charge may have to be made to authors. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board or stout tracing paper. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil. Costs of touching-up diagrams found to be incomplete or unsuitable for line-block reproduction will be charged to authors.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors. Part of their cost may have to be borne by authors.
- (c) Colour plates will not be accepted unless authors bear the cost.

Tables should be as simple and as few as possible; if they are very large or numerous a charge may have to be made to authors. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

Single number, 17s. 6d. or \$2.75 net. Annual subscription, 45s. or \$7.50

BRITISH POULTRY SCIENCE

CONTENTS OF VOLUME 5, PART 1, JANUARY 1964

- TYLER, C. and GEAKE, F. H. Egg shell strength and its relationship to thickness, with particular reference to individuality in the domestic hen.
- TYLER, C. and GEAKE, F. H. The testing of methods for cracking egg shells, based on paired readings from individual eggs and the measurement of some effects of various treatments.
- TYLER, C. and GEAKE, F. H. The testing of methods for crushing egg shells, based on paired readings from individual eggs and the measurement of some effects of various treatments.
- TYLER, C. and GEAKE, F. H. A direct comparison of certain cracking and crushing methods used for measuring shell strength.
- HUNTON, PETER. Genetics of egg shell colour: covariance with egg number and egg size.
- PAYNE, C. G., LAMMING, G. E. and LEWIS, D. Synthetic oestrogens in the production of roasting fowl. I. Dietary energy—protein balance.
- WENTWORTH, B. C. and MELLEN, W. J. Effects of spermatozoal antibodies and method of insemination on the fecundity of domestic hens.
- MERRITT, E. S. Pre-incubation storage effects on subsequent performance of chickens.
- TEMPERTON, H. and CASSIDY, J. Phosphorus requirements of poultry. I. The utilisation of phytin phosphorus by the chick as indicated by balance experiments.
- TEMPERTON, H. and CASSIDY, J. Phosphorus requirements of poultry. II. The utilisation of phytin phosphorus by the chick for growth and bone formation.
- TEMPERTON, H. and CASSIDY, J. Phosphorus requirements of poultry. III. The effect of feeding a vegetable type diet without supplementary phosphorus to turkey poults.
- FARRELL, A. J. and BARNES, ELLA M. The bacteriology of chilling procedures used in poultry processing plants.

This journal is published three times a year. The annual subscription is 60s. (U.S.A. \$10.00), single parts 22s. 6d. (U.S.A. \$3.75). Orders and subscriptions may be sent to any bookseller or direct to the publishers:

OLIVER AND BOYD LTD

JOURNAL OF DAIRY SCIENCE

OFFICIAL PUBLICATION OF THE AMERICAN DAIRY SCIENCE ASSOCIATION
 SINCE 1917

S. T. COULTER, President, University of Minnesota, St Paul
 H. F. JUDKINS, Secretary-Treasurer, 32 Ridgeway Circle, White Plains, N.Y.
 E. O. HERREID, Editor-in-Chief, University of Illinois, Urbana

Some Papers published in the February issue:

- G. C. KRESHECK, Q. VAN WINKLE and I. A. GOULD. Physical Changes in Milk Proteins at Elevated Temperatures as Determined by Light Scattering. I and II.
- E. BERLIN, N. M. HOWARD and M. J. PALLANSCH. Specific Surface Areas of Milk Powders Produced by Different Drying Methods.
- C. A. KIDDY, J. O. JOHNSTON and M. P. THOMPSON. Genetic Polymorphism in Caseins of Cow's Milk. I.
- B. R. BAUMGARDT, W. J. BYER, H. F. JUMAH and C. R. KRUEGER. Digestion in the Steer, Goat and Artificial Rumen as Measures of Forage Nutritive Value.
- C. A. ZITTE, L. A. RICHARDSON, E. F. MCFARREN, J. E. CAMPBELL, R. G. JENSEN, L. A. WISHNER, W. F. SHIPE and B. L. HERRINGTON. Symposium: Dynamic State of Milk.

This Journal is published monthly. The annual subscription rate is \$20.00 in the United States and Canada and is \$20.50 in all other countries, post paid.
 Subscriptions should be sent to the Garrard Press, 510 North Hickory Street, Champaign, Illinois.

Membership dues to the Association are \$12.50 per year, including the *Journal of Dairy Science*. Dues should be sent to Dr H. F. Judkins, Secretary-Treasurer, 32 Ridgeway Circle, White Plains, New York.

ANIMAL BEHAVIOUR

Editor: Alastair N. Worden (Huntingdon)

- **Animal Behaviour** is the official journal of the *Association for the Study of Animal Behaviour* and of the *Section of Animal Behavior and Sociobiology (Ecological Society of America and the American Society of Zoologists)* and publishes original papers on animal behaviour and related subjects from contributors in many countries, as well as reports of researches, book reviews and reports of the proceedings of the Association and the Section.

Animal Behaviour is one of the foremost journals in this field; in recent years it has been considerably enlarged and it is now published three times a year in issues of about 200 pages. Volume XII is current in 1964. This expansion reflects the increasing importance of the subject and the extent to which **Animal Behaviour** is used by behaviourists and others as one of their major sources of information on the progress of research in this field.

Annual Subscription 100s., U.S.A. and Canada \$17.50

A MONTHLY REVIEW OF VETERINARY SCIENCE

Editor: J. A. LAING Chairman of Editorial Board: SIR JOHN RITCHIE

The British Veterinary Journal

This, the oldest veterinary periodical in the British Commonwealth, has always maintained the broadest interest in animal welfare including regular articles on breeding and nutrition

Annual Subscription 70s.
U.S.A. & Canada \$12.00

Recent and future Papers include:

Sinclair: Studies on the Anaemia of Ovine Fascioliasis. *Carnaghan, Crawford*: Relationship between Ingestion of Aflatoxin and Primary Liver Cancer. *Young*: Artificial Insemination and Genetic Improvement of British Sheep. *Fisher, Pirie*: Malformations of the Ventricular Septal Complex in Cattle. *Loomis, Keep*: Choroid Plexus Papilloma in a Dog. *Schipper*: Rates and Routes of Sulphonamide Excretion in the Cow: Blood Levels following Single Intravenous and Oral Administrations. *Black*: The Development of a Preventive Routine against Nematodirus Disease of Lambs. I. Administration of Bephenium Compounds at 21-Day Intervals. *Imes*: Pathology and Pathologists.

THE EMPIRE JOURNAL OF EXPERIMENTAL AGRICULTURE

THIS JOURNAL offers agricultural research workers a medium for disseminating the records and results of their investigations on the feeding and management of livestock, cultivation and manuring of crops, trial of farm machinery, agricultural economics, and experimental technique.

Vol. XXXII. No. 126

CONTENTS

April 1964

- W. J. A. PAYNE: The Origin of Domestic Cattle in Africa.
- R. ROSE INNES and G. L. MABEY: Studies on Browse Plants in Ghana. I. Chemical Composition: (a) Monthly Chemical Analyses of seven Species of Trees, Shrubs and Vines Browsed by Free-ranging Cattle on the Accra Plains.
- G. L. MABEY and R. ROSE INNES: Studies on Browse Plants in Ghana: II. Digestibility: (a) The Digestibility of *Griffonia Simplicifolia* from Accra Plains using Local Cattle as Experimental Animals.
- E. CRESSWELL and W. THOMSON: An Introductory Study of Air Flow and Temperature at Grazing-sheep Heights.
- R. M. MEREDITH: The Effects of Planting Density and Manuring on the Yields of Bunch-type Groundnuts.
- J. M. MUNRO and R. A. WOOD: Water Requirements of Irrigated Maize in Nyasaland.
- S. H. EVELYN and I. THORNTON: Soil Fertility and the Response of Groundnuts to Fertilisers in the Gambia.
- R. L. DAVIDSON: Natural Regeneration of Grassland on Fallows with and without Fertilizers in South Africa.
- V. ABEYWARDENA: Statistical Control of Variability in Coconut Experiments.
- B. A. C. ENYI: Note on the effect of Split Application of Ammonium Sulphate on the Growth and Yield of Rice.

NUTRITION ABSTRACTS AND REVIEWS

published by the

COMMONWEALTH BUREAU OF ANIMAL NUTRITION

Rowett Research Institute, Bucksburn, Aberdeen, Scotland

A quarterly publication bringing together in abstracts whatever is available of the world literature on human and animal nutrition in all its aspects. Each number contains a Review Article dealing with some subject of current interest.

Volume 34, for 1964, costs 220s. and orders are now being recorded. Certain concessions are available to Commonwealth subscribers; details may be obtained from the Secretary, Nutrition Abstracts and Reviews, at the address shown above.

CONSULTATION SERVICE

The Bureau is prepared, within the limits of its information, to answer enquiries from workers in laboratory research, field investigations or nutritional planning, but not from commercial sources, who do not themselves have access to the necessary literature.

**VETERINARY ENTOMOLOGY AND ACAROLOGY
FOR INDIA**

by S. K. Sen and T. B. Fletcher

834 pp. (6½" × 9½") 1962. 232 figs. 50 plates. 45s. (\$6.00)

This publication by the two eminent Entomologists deals with the insects, ticks and mites which are of great importance from the veterinary point of view. They have been classified to suit the needs of the veterinary workers. Bionomics, breeding techniques and measures for control of important species have been exhaustively dealt with. Exhaustive lists of reference to literature have been given at the end of each species. This truly informative book aims to meet the requirements of all categories of veterinary workers whether in field work, research or teaching.
