

Journey into the deep.

Specimen: Humpback Whale (Genus: Megaptera)
Instrument: The Naked Eye

Journey into the deeper.

Specimen: Paralia Sulcata (Phytoplankton)
Instrument: Hitachi S-4700 FE-SEM

The journey to discover and understand that which cannot be readily seen has often inspired bold exploration.

Hitachi seeks to further that journey by manufacturing leading instrumentation built on a solid foundation of reliability, technology, and technical acumen. Hitachi's nanotechnology tools — a wide variety of ELECTRON MICROSCOPES — will empower countless applications to produce stronger, faster, smarter materials that promise to enhance our lives for the better.

Inspire the Next

The — Zen — of — TEM

Take the simplest path to great discoveries at the nano level and beyond. Let JEOL help you discover the elusive details in your TEM samples.

Stability, cleanliness, and simplicity -- the essence of our new TEM technology -- produce unmatched image and data quality. JEOL's expertise in cryo-tomography, electron diffraction, in-situ microscopy, analytical EM, aberration-corrected sub-angstrom imaging, and holography will guide you through your most challenging explorations.

View our panorama of images at www.jeol.com/temgallery, contact your local JEOL representative, or speak with us at 978-535-5900.
