Scope of the Journal

Clay Minerals - Journal of Fine Particle Science publishes electronically and in paper form research papers about clays, clay minerals and related materials, natural or synthetic. Aspects covered include: Earth Processes (interactions in 'system earth' ± soil science, and geology/mineralogy) including genesis/synthesis, phase transformations, stability, weathering, soil-organic interactions, ion-exchange, basin analysis, clay petrology; Solid State Chemistry/Materials Science ± synthesis, structure and dynamics, reactivity, crystal chemistry, mechanical, thermal, electrical properties, micro and nanophase materials; Environmental Science ± analytical methods, elemental distribution, waste containment, health issues, environmental impact assessment, conservation of cultural heritage; Colloid/Surface Science ± adsorption, colloid stability, surface chemistry, reactivity; and Applied Science and Technology ± industrial uses and technical applications, including mining and processing of clay, zeolite (and other) deposits and application in ceramics, paper, paint, polymer, ion-exchange, sorption, catalysis etc.

Submission of manuscripts

In a letter accompanying the manuscript, the submitting author must state that all authors agree with the final version of the manuscript. The letter must also state that the manuscript has not previously been published elsewhere, either in full or in part, and that, while under review for Clay Minerals, it will not be submitted to any other publication. Authors are encouraged to suggest up to three possible reviewers for their papers.

All manuscripts are to be submitted online at <http://www.edmgr.com/clayminerals/>. The current set of instructions for authors is available at: <https://www.cambridge.org/CLM>

All authors are allowed, free of charge, an e-print of their papers published in the journal.

Join the Mineralogical Society today

If you are a regular reader of Mineralogical Magazine consider joining the Society and receiving your own copy six times a year at a very modest cost. Membership currently starts at £55 per annum. For this, you will receive bi-monthly copies of Elements, our international membership magazine (in full colour) on mineralogy, geochemistry and petrology as well as online access to Mineralogical Magazine, Clay Minerals and Elements. You may also opt to pay an additional premium in order to continue receiving paper copies of our journals. Full details on how to join the Society and an application form can be found on the Society's website at www.minersoc.org. Membership of the Society introduces you to a vibrant community of those interested in the mineral sciences. Through membership of one or more of the Society's eight special interest groups you can take an active part in the Society's numerous scientific meetings and conferences as described on the website.

Mineralogical Society Journals

Mineralogical Magazine

International journal of mineral sciences which covers the fields of mineralogy, crystallography, geochemistry, petrology, environmental geology and economic geology. This journal is available primarily as an e-journal.

Clay Minerals

International journal of clay minerals and fine particle science, published four times a year, including research papers about clays, clay minerals and related materials, natural or synthetic. The journal includes papers on Earth processes, soil science, geology/mineralogy, chemistry/material science, colloid/surface science and applied science and technology. The journal is available primarily as an e-journal.

Copyright

For both the paper and electronic versions, copyright of all papers accepted shall be assigned to the Mineralogical Society before publication, except where Crown Copyright is reserved.

CLAY MINERALS

Journal of Fine Particle Science

VOLUME 53, NUMBER 3, SEPTEMBER 2018

CONTENTS

Peter Vrolijk, David Pevear, Michael Covey and Allan Lariviere. Fault gouge dating: history and evolution	305
Hanan J. Kisch. Full width at half maximum of low-angle basal phyllosilicate X-ray diffraction reflections: fitted peaks vs. diffraction traces	325
Laurence N. Warr. A new collection of clay mineral 'Crystallinity' Index Standards and revised guidelines for the calibration of Kübler and Árkai indices	339
Annette Süssenberger, Solveig Pospiech and Susanne Theodora Schmidt. [MnO SiO ₂ , Al ₂ O ₃ , FeO, MgO] balanced log-ratio in chlorites: a tool for chemo-stratigraphic mapping and proxy for the depositional environment	351
Francisco Colmenero, Vicente Timón, Laura J. Bonales and Joaquín Cobos. Structural, mechanical and Raman spectroscopic characterization of the layered uranyl silicate mineral, uranophane- α , by density functional theory methods	377
Jian Zhao, Wei Gao, Zhi-Gang Tao, Hong-Yun Guo and Man-Chao He. Investigation, using density function theory, of coverage of the kaolinite (001) surface during hydrogen adsorption	393
Nedjima Bouzidi, Athmane Bouzidi, Raphael Oliveira Nunes and Djoudi Merabet. Study of the microstructure and mechanical properties of halloysite-kaolinite/BaCO ₃ ceramic composites	403
Letizia Ceccarelli, Maurizio Pietro Bellotto, Marco Caruso, Cinzia Cristiani, Giovanni Dotelli, Paola Gallo Stampino, Giuseppina Gasti and Luca Primavesi. Characterization of clays and the technology of Roman ceramics production	413
A. Nkalih Mefire, R. Yongue Fouateu, A. Njoya, J.R. Mache, P. Pilate, F. Hatert and N. Fagel. Mineralogy and geochemical features of Fouban clay deposits (west Cameroon): genesis and potential applications	431
A. Pountouenchi, D. Njoya, A. Njoya, D. Rabibisao, J.R. Mache, R.F. Yongue, D. Njopwouo, N. Fagel, P. Pilate and L. Van Parys. Characterization of clays from the Fouban region (west Cameroon) and evaluation for refractory brick manufacture	447
Mouhssin El Halim, Lahcen Daoudi, Meriam El Ouahabi, Valérie Rousseau, Catherine Cools and Nathalie Fagel. Mineralogical and geochemical characterization of archaeological ceramics from the 16th century El Badi Palace, Morocco	459
Angel Sanz, Joaquín Bastida, Angel Caballero and Marek Kojdecki. X-ray diffraction Warren-Averbach mullite analysis in whiteware porcelains: influence of kaolin raw material	471
T. Miura, A. Sasaki, N. Suzuki and M. Endo. Caesium desorption from layer silicate minerals using quaternary ammonium salts	487
Marie Claverie, François Martin, Christel Careme, Christophe Le Roux, Pierre Micoud, Olivier Grauby and Cyril Aymonier. Flow supercritical synthesis of brucite and magnesian T-O, T-O-T phyllosilicates: an opportunity to tune the structure with the solvent composition	497
Kaihua Chen, Jiannan Pei, Shaohua Yin, Shiwei Li, Jinhui Peng and Libo Zhang. Leaching behaviour of rare earth elements from low-grade weathered crust elution-deposited rare earth ore using magnesium sulfate	505
Gürsel Yanık, Rasim Ceylantekin and Eda Taşçı. The Gümüşköy (Kütahya, Turkey) kaolin deposit and its ceramic properties	515
Mohamed Hajjaji, Abdellah Beraa, Yannick Coppel, Régis Laurent and Anne-Marie Caminade. Adsorption capacity of sodic- and dendrimers-modified stevensite	525
Andrew Parker. Obituary	545
Chris Breen. Obituary	547
