

Nutrition Research Reviews, published annually by Cambridge University Press, presents authoritative and critical reviews of research that advance new concepts and encourage fresh thinking on a variety of nutritional problems. The journal's main objective is to encourage the exchange of fundamental ideas on nutritional well-being. The subscription (excluding VAT) to volume 8, 1995, is £49 including postage (US \$89 in USA, Canada and Mexico).

The Proceedings of the Nutrition Society, published by Cambridge University Press, in part record meetings of the Symposium type, at which experts in a particular field are invited by Council to make contributions on specific parts of it and at which general discussion follows these invited contributions. The meetings also include sessions at which papers are communicated by members and others on original work. It is proposed at present to publish summaries of the papers read at each meeting, each communication being recorded in the Society's *Proceedings* by means of an abstract not exceeding in length 400 words or the equivalent space in print. The *Proceedings* are published three times a year.

The subscription (excluding VAT) to the *Proceedings* is £126.00 (US \$240.00 in USA, Canada and Mexico). Single issues are £44.00 (US \$85.00 in the USA, Canada and Mexico) each; postage extra.

Copying. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to C.C.C. of the per-copy fee of \$11.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-1145/95 \$11.00+.10. Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

CONTENTS

Editorial

On the quality of nutritional data. *D. A. T. Southgate* 335-336

Body composition

Energy intake, physical activity and body weight: a simulation model. *Klaas R. Westerterp, Jeroen H. H. L. M. Donkers, Elisabeth W. H. M. Fredrix & Piet Boekhoudt* 337-347

Multi-frequency impedance for the prediction of extracellular water and total body water. *Paul Deurenberg, Anna Tagliabue & Frans J. M. Schouten* 349-358

Dietary intake in the elderly

Variation in food group and nutrient intake with day of the week in an elderly population. *Susan Maisey, Julie Loughridge, Susan Southon & Robert Fulcher* 359-373

Pregnancy and purine metabolism in sows

Endogenous purine and pyrimidine derivative excretion in pregnant sows. *S. M. Martin Orue, J. Balcells, J. A. Guada & C. Castrillo* 375-385

Effects of fatty acid composition of the diet

Erythrocyte levels compared with reported dietary intake of marine *n*-3 fatty acids in pregnant women. *Sjúrður F. Olsen, Harald S. Hansen, Brittmari Sandström & Benny Jensen* 387-395

Gestation length and birth weight in relation to intake of marine *n*-3 fatty acids. *Sjúrður F. Olsen, Harald, S. Hansen, Niels J. Secher, Benny Jensen & Brittmari Sandstrom* 397-404

Long-chain polyene status of preterm infants with regard to the fatty acid composition of their diet: comparison between absolute and relative fatty acid levels in plasma and erythrocyte phospholipids. *Magritha M. H. P. Foreman-van Drongelen, Adriana C. V. Houwelingen, Arnold D. M. Kester, Andre E. P. de Jong, Carlos E. Blanco, Tom H. M. Hasaart & Gerard Hornstra* 405-422

Resistant starch and diet-induced thermogenesis

Replacement of digestible by resistant starch lowers diet-induced thermogenesis in healthy men. *Marie-Louise A. Heijnen, Paul Deurenberg, Johan M. M. van Amelsvoort & Anton C. Beynen* 423-432

Effects of octacosanol on lipid metabolism

Octacosanol affects lipid metabolism in rats fed on a high-fat diet. *S. Kato, K.-I. Karino, S. Hasegawa, J. Nagasawa, A. Nagasaki, M. Eguchi, T. Ichinose, K. Tago, H. Okumori, K. Hamatani, M. Takahashi, J. Ogasawara, S. Masushige & T. Hasegawa* 433-441
