

Reading the Isotopic Clocks.

Your research in age determination and stable isotopes requires reliable data and custom service. Teledyne Isotopes has the expertise and experience to meet these requirements.

We have been pioneers in the industry since 1955 and are the only commercial laboratory that offers all major age determination techniques.

We can assure you of reliable data because of well-staffed and well-equipped labs, intercalibration with major universities and government facilities, and through use of N.B.S. and international standards.

For the most reliable reading of the isotopic clocks, come to the experts.

Archaeological Method and Theory 5

Michael B. Schiffer, ed.

This fifth series volume contains a variety of contributions from authors observing and participating in the latest developments in archaeology.

Although most of the chapters focus on aspects of production, the approaches vary, including the historical bases of Marxist and feminist theories, the uses of political economy, methods of ascertaining early animal domestication, and physicochemical methodology. In addition, the volume contains an important chapter on the question of archaeologists' responsibility to the descendants of the people and cultures they study.

CONTENTS:

1. Ethics and Ownership of the Past: The Reburial and Repatriation Controversy, by Shirley Powell, Christina Elnora Garza, and Aubrey Hendricks
 2. Archaeological Approaches to the Political Economy of Non-stratified Societies, by Charles R. Cobb
 3. Archaeology and Marxism, by Randall H. McGuire
 4. Marxism in Contemporary Western Archaeology, by Bruce G. Trigger
 5. Early Animal Domestication in the Middle East and Europe, by Pam J. Crabtree
 6. The Analysis of Organic Residues and the Study of Pottery Function, by Carl Heron and Richard P. Evershed
- \$40.00

Between Desert and River

Hohokam Settlement and Land Use in the Los Robles Community

Christian E. Downum — *Anthropological Papers, No. 57*

Downum's work along the lower Santa Cruz River enlarges our understanding of the Hohokam by describing settlement and land use along secondary streams between the major river basins and the interior desert. The monograph highlights the Cerro Prieto Site, the largest *cerro de trincheras* site in the United States. Most investigators have presumed a defensive function for *cerros de trincheras* and have overlooked important evidence regarding their use as habitations and their potential significance as symbolic features on the prehistoric landscape. Downum proposes a new interpretation of *cerros de trincheras* that focuses on their role in early Classic period (Soho phase) Hohokam society.

The Missions of Northern Sonora

A 1935 Field Documentation

Buford L. Pickens, ed.

The "Kino Missions" were surveyed in 1935 by the National Park Service to prepare for the restoration of the mission at Tumacacori, Arizona. This volume reproduces that previously unpublished report in its entirety, focusing on sixteen missions and including two maps, 52 drawings, and 76 photographs.

"This book is a time capsule, indispensable to anyone studying the missions." —James S. Griffith, author of *Beliefs and Holy Places*

"The entire work is excellent. . . . The mission drawings will fascinate the public as well as the scholar."

—Charles W. Polzer, S.J., author of *Kino Guide II*

Now in paperback—

The Mesoamerican Ballgame

Vernon L. Scarborough and David R. Wilcox, eds.

"This is without any doubt the single most important volume ever written on the hip-ball game of the ancient Mesoamericans."

—Michael D. Coe

"A balanced synthesis of archeological field research and iconographic interpretation." —*Science*

\$18.95

The Origin and Development of the Pueblo Katsina Cult

E. Charles Adams

Examines the concept of the katsina and the religion that developed around it, focusing on what makes katsinas unique, why the concept was developed, and what adaptive value it had for prehistoric Pueblo culture.

"Both in scale and scope, the book is large; the interpretations are adventurous." —*Choice*

Ancient Chiefdoms of the Tombigbee

John H. Blitz

"Readers will welcome Ancient Chiefdoms as a careful rethinking of the political, economic, and religious roles of leaders in small-scale Mississippian societies."—Vernon James Knight, Jr.

The University of Alabama
256pp. 1993 \$24.95, paper

Prehistoric Peoples of South Florida

William E. McGoun

McGoun outlines a cultural system that maintained an impressive continuity for 10,000 years—before being destroyed by two centuries of European contact.

176pp. 1993 \$19.95, paper

The Development of Southeastern Archaeology

Jay K. Johnson, ed.

A multifaceted overview from ten scholars, with specialties ranging from ethnohistory to bioarchaeology, who chronicle the changes in the way prehistory in the Southeast has been studied since the 19th century.

352pp. 1993 \$29.95, paper

Mississippian Village Textiles at Wickliffe

Penelope Ballard Drooker

Drooker presents the first comparative analysis of preserved fabric impressions on Wickliffe pottery and the most inclusive available summary of information on Mississippian textiles. 312pp. 1992 \$29.95, paper

Early Pottery in the Southeast Tradition and Innovation in Cooking Technology

Kenneth E. Sassaman

Sassaman questions the value of using technological traits alone to mark temporal and spatial boundaries of prehistoric cultures and shows how social process shapes the prehistoric archaeological record.

312pp. 1993 \$27.95, paper

The De Soto Chronicles

The Expedition of
Hernando de Soto to
North America in 1539–1543

Lawrence A. Clayton, Vernon James Knight, Jr., and Edward C. Moore, eds.

A compilation of the surviving De Soto chronicles, some in new translation, of the only eyewitness records of native cultures that vanished in the wake of European contact.

ARCHAEOLOGY FROM CAMBRIDGE

Ancient Mesoamerica

A Comparison of Change in Three Regions
Second Edition

*Richard E. Blanton,
Stephen A. Kowalewski,
Gary M. Feinman, and
Laura M. Finsten*

Between 10,000 years ago and the arrival of the Spanish in 1521, some very significant changes in the evolution of human societies occurred in Mesoamerica. In this revised and updated edition of a book first published in 1981, the authors synthesize recent research, focusing on three intensively studied regions, the Valleys of Oaxaca and Mexico and the Maya lowlands.

New Studies in Archaeology
44053-X Hardcover \$69.95

The Prehistoric Exploration and Colonisation of the Pacific

Geoffrey Irwin

This book represents a major advance in the knowledge of and models for the settlement of the Pacific by suggesting that exploration was rapid and purposeful, undertaken systematically and that navigation methods progressively improved. Irwin claims that rather than sailing randomly downwind in search of the unknown, Pacific Islanders expanded settlement by the cautious strategy of exploring upwind so as to ease their safe return. The author has tested this hypothesis against the chronological data from archaeological investigation, with a computer simulation of demographic and exploration patterns, and by sailing throughout the region himself.

40371-5 Hardcover \$49.95

Agriculture and the Onset of Political Inequality Before the Inka

Christine A. Hastorf

Looking at the nature of power and political differentiation in the Andean region of central Peru from AD 200 to the Inka conquest in the fifteenth century, Hastorf argues that no one model or theory can usefully explain all social change, and that archaeologists should instead focus on a specific region in order to understand the context of change. Examining political inequality from different perspectives, Hastorf suggests a series of "cultural" principles that shaped political developments and also traces changes in agricultural production within the region, considered fundamental to its social and political evolution.

New Studies in Archaeology
40272-7 Hardcover \$69.95

The Chaco Anasazi

Sociopolitical Evolution in the
Prehistoric Southwest

Lynne Sebastian

The immense size and beauty of the ruins of the Chaco culture sites in northwestern New Mexico and the apparent social complexity achieved by the people of Chaco, despite the harsh and forbidding environment in which they lived, have given rise to worldwide interest in the "Chaco Phenomenon." The author argues that previous explanations of Chaco do not hold up well under scrutiny and presents a radically different explanation.

Ancient Metallurgy in the USSR

The Early Metal Age

E. N. Chernykh

A leading Russian archaeologist describes the development of ancient mining and metallurgy in the northern half of Eurasia, where significant levels of mining date back to the fifth millennium BC. Professor Chernykh details the successive periods of metallurgical activity in different regions, provides information about the groups of artifacts, analyzes the international metallurgical trade, and documents the final collapse of the socio-cultural systems in these metallurgical centers in the first millennium BC.

Chiefdoms: Power, Economy and Ideology

Timothy Earle, Editor

The study of chiefdoms has moved from a preoccupation with their formal characteristics to a concern with their dynamics as political institutions. These ten case studies look at particular chiefdoms, originating in specific historical conditions.

Ground Breaking Titles

New.

The Aztecs, Maya, and Their Predecessors

Archaeology of Mesoamerica

THIRD EDITION

Muriel Porter Weaver

The Third Edition of this highly successful introduction to the archaeology of Mesoamerica includes full coverage of the Aztec and Maya areas in one volume. Beginning with the settling of the New World and continuing through the Spanish conquest of Mesoamerica in 1521, this completely updated textbook contains the latest information on new approaches, theories, sites, and areas of investigation. This information reflects the work of a new generation of researchers whose recent discoveries have shed new light on many of the ideas that have shaped the last 50 years of Mesoamerican archaeology.

Key Features

- All-in-one textbook covering the Aztecs (central Mexico) and the Maya (Yucatan and Central America) in one volume
- Spans the period from the settling of the New World until the Spanish Conquest of Mexico
- Shows the growth and collapse of the Olmec, Teotihuacan, Maya, Toltec, and Aztec empires
- Includes a chapter on Mesoamerica's relationship to the northeast (southeastern United States) and to the Andean region of South America
- Illustrates the importance of trade, domestication of plants, and the rise of urbanism in relation to other cultures in the New World

CONTENTS: Introduction: Man Finds Mesoamerica. Man Becomes a Farmer. Setting The Mesoamerican Pattern and the Role of the Olmec. Monuments, Wealth and Complex Societies. Codices, Calendars and Maya Writing. **Teotihuacan and Its Neighbors:** The Maya Kings and a New Order. Tula and The Toltecs. **Final Scenes:** The Maya, The Tarascans and the Aztecs. Mesoamerica in Perspective. Glossary. References. Index.

Deciphering A Shell Midden

edited by
Julie K. Stein

This book presents the latest research on shell middens—sites that contain shell located near coastal and fluvial settings around the world. The shell imparts certain characteristics to such sites such as complex discontinuous strata, low densities of artifacts, large volumes of deposits, alkaline chemistry, and proximity to fluctuating sea level.

1992, 375 pp., \$89.95/ISBN: 0-12-664730-5

New.

Prehistoric Subsistence on the Southern New England Coast

The Record from Narragansett Bay

David J. Bernstein

This book examines long-term trends in prehistoric subsistence in the Narragansett Bay region of Southern New England. The results suggest that, unlike other areas of Eastern North America, specialized agricultural economies did not develop in this region prior to European contact. It also suggests that subsistence intensification was achieved through diversification and cultural modification of the landscape. This book incorporates specific observations and raw data in easy-to-use appendices. It also reviews results and features usable summary tables and figures. As such, the book is accessible to both the general reader as well as scholars and students interested in consulting the original data for their own research and analysis.

CONTENTS: Introduction. The Greenwich Cove Site and Narragansett Bay: Setting and Archaeological Fieldwork. Chronology of Occupation at Greenwich Cove. Initial Exploitation of Shellfish in the Narragansett Bay. Prehistoric Utilization of Shellfish at Greenwich Cove. Vertebrate Fauna. Prehistoric Use of Plant Foods. History of Land Modification. Seasonality. Summary and Conclusions. List of Tables. List of Figures. Appendices. References.

January 1993, 208 pp., \$55.00
ISBN: 0-12-092870-1

A Marxist Archaeology

Randall H. McGuire

This book is an introduction to marxist theory as it applies to archaeology. It explores long-term historical change and cultural evolution, and advocates a dialectical and historical approach to the study of the past. It will be of interest to students and professionals in archaeology, and to science historians, theoreticians, and philosophers.

**59th ANNUAL MEETING
SOCIETY FOR AMERICAN ARCHAEOLOGY**

Disneyland Hotel
Anaheim, California
Wednesday, April 20–Sunday, April 24, 1993

Program Committee Chair: J. Daniel Rogers
Department of Anthropology
N.H.B. 112
Smithsonian Institution
Washington, DC 20560

GUIDELINES FOR CONTRIBUTIONS

The privilege of participating in the annual meeting as a presenter, organizer, chair, or discussant is restricted to paid-up members. However, under extraordinary circumstances, representatives of other disciplines, or archaeologists who are not North American residents, may request a waiver of the membership requirement from the Program Chair. Please note that all requests for space for allied meetings should be made in writing and sent to the SAA Office no later than *October 1, 1993*.

Society policy states that a person may not be the first author of more than one paper, although that person may, at the same meeting, chair a session or serve as junior author of a paper presented by someone else or as a discussant. However, no paper should list more than five authors, and no individual may have more than three roles (author, organizer, chair, or discussant) in the meeting. Under extraordinary circumstances exceptions to these policies may be granted by the Program Chair.

Complete symposia proposals (with abstracts of papers), abstracts of contributed papers, abstracts of research reports, and abstracts for poster sessions must reach the SAA Office no later than *September 23, 1993*. All proposals and abstracts must be submitted on appropriate SAA forms, which are mailed to all SAA members with the ballot. Please submit all materials in English.

In case of coauthorship of papers, *only the senior author* should submit a Participant Information Form containing the information on all of the associated authors. The Participant Information Form is in two parts: Page one (Submission Information) and page two (Short Abstract Information). Copies of the Participant Information Form must be submitted by all participants, including symposia organizers, chairs, and discussants, as well as all senior authors of symposia papers, contributed papers, research reports, and posters.

Because it is no longer possible to accommodate all individuals wishing to make oral presentations at the annual meeting, the Program Committee will evaluate each submission for professionalism, timeliness of receipt, substance of contribution, and redundancy with other submissions. Poster Sessions are especially encouraged and are particularly effective for presentations involving mapping, remote sensing, and various quantitative methods. The Program Committee may request that individual papers or entire symposia be converted to poster format. Symposia organizers and first authors of presentations not in symposia will be notified of the Program Committee's decision to accept or decline the submission by January 15, 1994. Abstracts of all papers, research reports, and posters accepted for presentation will be published in a separate *Abstracts* volume available at the annual meeting.

SYMPOSIA—A symposium consists of a group of papers on a common theme. Symposia are limited to 4 hours or less. The symposium topic and the individual papers within it will be reviewed. Changes, such as consolidation of two symposia or changes in the individual papers, may be recommended. Symposia organizers should contact the SAA office no later than *September 1, 1993* in order that the Guidelines for Symposium Organizers and a special symposium form can be sent to them. Complete symposia proposals must be submitted as a package to the SAA Office by the symposium organizer(s) and must be received by *September 23, 1993*.

The package must include three (3) copies of the Symposium Proposal Form and one (1) copy of the Participant Information Form for each senior author, discussant, chair, and organizer (whether or not the organizer is chairing the symposium). The package must also include the registration form and fee.

CONTRIBUTED PAPERS (20 minutes)—Contributed papers are distinguished from Research Reports in that they generalize, synthesize, or compare and are addressed to problems of theory, method, culture history, or culture process. Contributed papers must follow the same format as the symposia papers, and each proposed presentation must include one (1) copy of the Submission Information Form and three (3) copies of the Short Abstract Form. Registration form and fee must be included.

RESEARCH REPORTS (10 minutes)—A research report is a presentation that describes the results of a recent field or laboratory research project. Each proposed presentation must include one (1) copy of the Submission Information Form and three (3) copies of the Short Abstract Form. Registration form and fee must be included.

POSTER SESSIONS—The poster session is particularly appropriate for research results that can be described graphically. Poster sessions will be listed in the program and will be displayed in prominent locations. Each proposed presentation must include one (1) copy of the Submission Information Form and three (3) copies of the Short Abstract Form. Registration form and fee must be included.

REGISTRATION FEES—All presenters, chairs, and discussants are required to pay the established registration fee for the annual meeting; registration form and fee must accompany all proposals. Under extraordinary circumstances non-North American residents may request waiver of registration fee to present papers or attend meetings. Waiver requests should be sent to the Program Chair. Registration and/or membership fees will be refunded upon written request before the preliminary program goes to press and for any paper that is declined.

ABSTRACTS will be published as a separate volume and will not be included in the registration fee. Participants who wish to receive a copy of the *Abstracts* when they pick up their badge at the meeting should order and prepay for it on their registration form.
