

Subscription rates

Subscription rates (post free) for the 1980 volume of the *Journal* are as follows:

Subscribers in North, Central and South America, and Australia:

US\$75.00, \$A.66.00, £39.00 for libraries and institutions;

US\$25.00, \$A.22.00, £13.00 for individuals belonging to a recognised scientific society.

All other subscribers:

£33.00 for libraries and institutions;

£11.00 for individuals belonging to a recognised scientific society. Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

All enquiries about the *Journal*, as well as other subscriptions, should be sent to the Executive Editor, Miss M. Hitchcock, Department of Probability and Statistics, The University, Sheffield S3 7RH, England. The price of back numbers varies from volume to volume, and enquiries should be sent to the Executive Editor. Cheques, money orders, etc., should be made out to *Applied Probability*; cheques on U.S., U.K. and Australian banks will be acceptable.

Notes for contributors

Submission of papers. It is a condition of publication in the *Journal of Applied Probability* that papers shall not previously have appeared elsewhere, and will not be reprinted without the written permission of the Trust. It is the general policy of the *Journal* not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Authors will receive 50 reprints of their papers free, and joint authors a proportional share of this number. Additional reprints will be provided at cost.

Papers should be written in English or French; papers in other languages may be accepted by the Editors, but will appear (subject to the author's agreement) in English or French translation in the *Journal*. Scripts should be typewritten, using double spacing, and at least one copy should be on one side of the paper only. Each paper should be accompanied by

(i) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results;

(ii) a list of keywords detailing the contents for the purpose of computerised information retrieval.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained on application to the Applied Probability Office.

Authors are requested to comply with the following instructions: Authors in Britain, Europe, the Middle East, Africa, North and South America should send three copies of their submissions to the Applied Probability Office in Sheffield. Authors in Australasia and the Far East should send three copies of their submissions to the Editor-in-Chief, Dr J. Gani, in Canberra.

The Editor-in-Chief and the Applied Probability Office are in direct contact by Telex, and full details of the papers submitted either in Sheffield or Canberra are available in both centres.

Alternatively, authors may submit papers to any of the Editors listed on the inside front cover. In this case, two copies of the submission should be sent to the Editor concerned, and one copy, with a copy of the covering letter, should be sent to the Applied Probability Office in Sheffield. Authors overseas are asked to ensure that their submissions are sent by air mail.

Copyright. The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

The appearance of the code at the top of the first page of a paper in this journal indicates the Trust's consent that copies of the article may be made for personal or internal use by the copier or his specific clients. This consent is given on the condition, however, that the copier pay the stated per-copy fee through the Copyright Clearance Center, Inc., P.O.Box 765, Schenectady, New York 12301, U.S.A. for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying for general distribution, for advertising for promotional purposes, for creating new collective works, or for resale.

Research Papers

- 895 ERIC RENSHAW. The spatial distribution of *Tribolium confusum*
 912 RAY WATSON. On the size distribution for some epidemic models
 922 WOLFGANG MERGENTHALER. A state-dependent lifetime process of individuals subject to external perturbations
 939 D. J. DALEY AND PRAKASH NARAYAN. Series expansions of probability generating functions and bounds for the extinction probability of a branching process
 948 K. RAMA MURTHY. Convergence of age and type distributions in multitype critical Bellman–Harris processes
 956 H. L. MacGILLIVRAY. The moment ratios of particle size distributions in some simple growth models
 968 JOHN C. WIERMAN. Weak moment conditions for time coordinates in first-passage percolation models
 979 LAWRENCE GRAY, JOHN C. WIERMAN AND R. T. SMYTHE. Lower bounds for the critical probability in percolation models with oriented bonds
 987 VALERIE ISHAM. Dependent thinning of point processes
 996 D. R. ROBINSON. Optimality conditions for a Markov decision chain with unbounded costs
 1004 Y. C. KAN AND S. M. ROSS. Optimal list order under partial memory constraints
 1016 K. D. GLAZEBROOK. On stochastic scheduling with precedence relations and switching costs
 1025 MICHAEL PINEDO. Scheduling spares with exponential lifetimes in a two-component parallel system
 1033 C. M. WOODSIDE, B. PAGUREK AND G. F. NEWELL. A diffusion approximation for correlation in queues
 1048 S. S. LAVENBERG AND M. REISER. Stationary state probabilities at arrival instants for closed queueing networks with multiple types of customers
 1062 WARD WHITT. The effect of variability in the $GI/G/s$ queue

Short Communications

- 1072 L. BILLARD, H. LACAYO AND N. A. LANGBERG. Generalizations of the simple epidemic process
 1079 C. C. HEYDE. On a probabilistic analogue of the Fibonacci sequence
 1083 PRAJNESHU. Time-dependent solution of the logistic model for population growth in random environment
 1087 RICHARD C. HERTZBERG AND VINCENT F. GALLUCCI. First-order stochastic chemical reactions and oscillations in the variance
 1094 F. THOMAS BRUSS. A counterpart of the Borel–Cantelli lemma
 1102 J. HAEZENDONCK AND F. DE VYLDER. A comparison criterion for explosions in point processes
 1108 GUNNAR ENGLUND. Remainder term estimate for the asymptotic normality of the number of renewals
 1114 ROGER HARTLEY. A simple proof of Whittle’s bridging condition in dynamic programming
 1117 L. VALADARES TAVARES. An exponential Markovian stationary process
 1121 GERHARD SCHROETER. The application of the Hankel transformation to spherically symmetric coverage problems
 1127 Y. S. SATHE, MEENA PRADHAN AND S. P. SHAH. Inequalities for the probability of the occurrence of at least m out of n events
 1133 A. O. PITTENGER. Success probabilities for second guessers
 1138 JAN ENGEL AND MYNT ZIJLSTRA. A characterization of the gamma distribution by the negative binomial distribution
