Characterization of a class of infinite matrices with applications by P. N. Natarajan	161
Isometric multiplication of Hardy-Orlicz spaces by W. Deeb, R. Khalil and M. Marzuq	177
Central automorphisms of finite groups by M. J. Curran and D. J. McCaughan	191
Regression analysis of dependent error models by C. A. McGilchrist	199
On an integral operator for convex univalent functions by Vinod Kumar and S. L. Shukla	211
The free orthomodular word problem is solvable by Gudrun Kalmbach	219
A reversed Hardy inequality by P. F. Renaud	225
A wide Perron integral by D. N. Sarkhel	233
A note on periodic solutions of some nonautonomous differential equations by M. R. Grossinho and L. Sanchez	253
A nil-implies-nilpotent result in Artinian rings by J. H. Meyer	267
Contractive projections on Banach space by Mark Spivack	271
On the additive groups of subdirectly irreducible rings by Yasuyuki Hirano and Isao Mogami	275
A characterization of chaos by K. Janková and J. Smítal	283
A commutativity theorem for semi-primitive rings by Hisao Tominaga	293
Almost Baire class one multi-functions by P. Maritz	297
On the frequency of 3-connected subgraphs of planar graphs by Nicholas C. Wormald	309
ABSTRACTS OF AUSTRALASIAN PhD THESES	
Models of frontogenesis by Michael John Reeder	319

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field.

As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to
The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification. (1985 Revision).

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.
