ISSN 0022-1120

Journal of Fluid Mechanics

10 December 2011

1 Stability and bifurcation of planetary dynamo models
E. Dormy

5 Helicity generation and subcritical behaviour in rapidly rotating dynamos
B. Sreenivasan & C. A. Jones

S 31 Prandtl and Rayleigh number dependence of heat transport in high Rayleigh number thermal convection
R. J. A. M. Stevens, D. Lohse & R. Verzicco

S 44 Microfluidic propulsion by the metachronal beating of magnetic artificial cilia: a numerical analysis
S. N. Khaderi, J. M. J. den Toonder & P. R. Onck

66 Motion of slender bodies in unsteady Stokes flow
E. Barta

88 Unsteady flow in a rotating torus after a sudden change in rotation rate
R. E. Hewitt, A. L. Hazel, R. J. Clarke & J. P. Denier

120 Turbulence in supersonic boundary layers at moderate Reynolds number
S. Pirozzoli & M. Bernardini

169 Frequency spectra evolution of two-dimensional focusing wave groups in finite depth water
Z. Tian, M. Perlin & W. Choi

195 Eddies and interface deformations induced by optical streaming
H. Chraibi, R. Wunenburger, D. Lasseux, J. Petit & J.-P. Delville

219 Probability density function approach for modelling multi-phase flow with ganglia in porous media
M. Tyagi, & P. Jenny

258 Dynamic roughness perturbation of a turbulent boundary layer
I. Jacobi & B. J. McKeon

297 Influence of confinement on a two-dimensional wake
L. Biancofiore, F. Gallaire & R. Pasquetti

321 CO_2 migration in saline aquifers. Part 2. Capillary and solubility trapping
C. W. MacMinn, M. L. Szulczewski & R. Juanes

352 Modelling bubble clusters in compressible liquids
D. Fuster & T. Colonius

390 Viscous irrotational analysis of the deformation and break-up time of a bubble or drop in uniaxial straining flow
J. C. Padrino & D. D. Joseph

422 The role of Stewartson and Ekman layers in turbulent rotating Rayleigh–Bénard convection
R. P. J. Kunnen, R. J. A. M. Stevens, J. Overkamp, C. Sun, G. J. F. van Heijst & H. J. H. Clercx

443 Bounding the scalar dissipation scale for mixing flows in the presence of sources
A. Alexakis & A. Tzella

S 461 The large-scale flow structure in turbulent rotating Rayleigh–Bénard convection
S. Weiss & G. Ahlers

493 Transition to turbulence through steep global-modes cascade in an open rotating cavity
B. Viaud, E. Serre & J.-M. Chomaz

507 Rayleigh–Taylor mixing in an otherwise stable stratification
A. G. W. Lawrie & S. B. Dalziel

528 Numerical computation of solitary waves in a two-layer fluid
H. C. Woolfenden & E. I. Părău

551 A numerical study of an inline oscillating cylinder in a free stream
J. S. Leontini, D. Lo Jacono & M. C. Thompson

569 Linear stability of compressible flow in a streamwise corner
O. T. Schmidt & U. Rist

591 Scaling the circulation shed by a pitching panel
J. H. J. Buchholz, M. A. Green & A. J. Smits

602 Book review
