

Conservation of the Southern Polar Region

These books are the published proceedings of a series of environmental workshops held jointly by the Scientific Committee on Antarctic Research (SCAR) and the World Conservation Union (IUCN). They summarize a wide spectrum of international expertise on a variety of environmental aspects of the Antarctic and Subantarctic region.

The Biology of the Southern Ocean

GEORGE A. KNOX

The first comprehensive, single-author synthesis of the current state of knowledge of the biota of one of the world's most important oceans. Following a description of the physico-chemical environment, the plants, microbes, animals and habitats of the Southern Ocean are considered in a logical sequence.

'a magnum opus that draws together a vast amount of useful data in a single, easily read volume, and offers interesting and informed comment.'

Studies in Polar Research

Southern Ocean Ecology

the BIOMASS Perspective

SAYED Z. EL-SAYED

A collection of authoritatively written articles which summarise and review the findings of the first long-term international research programme into the ecology of the Southern Ocean.

'I recommend this book as a useful guide to anyone wanting an introduction to the ecology of the southern oceans.'

Skua and Penguin

Predator and Prey

EUAN YOUNG

A detailed study of the feeding ecology and breeding biology of two associated Antarctic birds which provides evidence that the two species occur together as a consequence of limited breeding space rather than because of a distinct predator-prey relationship.
