

# THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

The Association is maintained by subscriptions and donations from private members, universities, scientific societies and other public bodies; a generous annual grant has been made by the Fishmongers' Company since the Association began. Practical investigations upon matters connected with sea-fishing are carried on under the direction of the Council, and from the beginning a Government Grant in aid of the maintenance of the laboratory has been made; in recent years this grant has been greatly increased in view of the assistance which the Association has been able to render in fishery problems and in fundamental work on the environment of marine organisms. Accounts of the laboratory and aquarium and the scope of the researches will be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281) of this *Journal*.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found at the beginning of this number. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by two research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

## TERMS OF MEMBERSHIP

	<i>£</i>	<i>s.</i>	<i>d.</i>
Annual Members . . . . . per annum	1	1	0
Life Members . . . . . Composition fee	15	15	0
Founders . . . . .	100	0	0
Governors . . . . .	500	0	0

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they receive the *Journal of the Association* free by post; they are admitted to view the laboratory at Plymouth, and may introduce friends with them; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc.; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill Plymouth.

# CONTENTS

PAGE

G. W. COMITA, S. M. MARSHALL, F.R.S., and the late A. P. ORR. On the biology of <i>Calanus finmarchicus</i> . XIII. Seasonal change in weight, calorific value and organic matter . . . . .	I
P. G. W. JONES. Comparisons of several methods of determining inorganic phosphate in sea water . . . . .	19
R. H. BAIRD. Notes on an scallop ( <i>Pecten maximus</i> ) population in Holyhead harbour . . . . .	33
JOHN GAGE. Observations on the bivalves <i>Montacuta substriata</i> and <i>M. ferruginosa</i> , 'commensals' with spatangoids . . . . .	49
JOHN GAGE. Experiments with the behaviour of the bivalves <i>Montacuta substriata</i> and <i>M. ferruginosa</i> , 'commensals' with spatangoids . . . . .	71
MICHAEL J. TYNEN. A new species of <i>Lumbricillus</i> , with a revised check-list of the British Enchytraeidae [Oligochaeta] . . . . .	89
JOHN B. BUCHANAN. The biology of <i>Echinocardium cordatum</i> [Echinodermata: Spatangoidea] from different habitats . . . . .	97
CLYDE MANWELL, E. C. SOUTHWARD and A. J. SOUTHWARD. Preliminary studies on haemoglobin and other proteins of the Pogonophora . . . . .	115
D. B. CARLISLE. The ciliary current of <i>Phallusia</i> [Ascidiacea] and the squirting of sea squirts . . . . .	125
C. EDWARDS. The hydroid and the medusa <i>Bougainvillia principis</i> , and a review of the British species of <i>Bougainvillia</i> . . . . .	129
✓ L. CHUECAS and J. P. RILEY. The component fatty acids of some sea-weed fats . . . . .	153
✓ T. B. BAGENAL. The ecological and geographical aspects of the fecundity of the plaice . . . . .	161
✓ F. E. ROUND. A new diatom species from the river Avon . . . . .	187
✓ F. E. ROUND and J. D. PALMER. Persistent, vertical-migration rhythms in benthic microflora. II. Field and laboratory studies on diatoms from the banks of the river Avon . . . . .	191
ABSTRACTS OF MEMOIRS . . . . .	215
BOOK REVIEW . . . . .	217

The subscription price of the Journal to non-members of the Association is £11 a volume of three parts, post free, or \$35.00 in U.S.A., payable in advance. Subscriptions may be sent to any bookseller or to the Cambridge University Press, and in U.S.A. to the Cambridge University Press American Branch.
