# The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTANT EDITOR

R. SCOTT STEVENSON

WITH THE COLLABORATION OF

G. H. BATEMAN      V. E. NEGUS      R. G. MACBETH

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *J. Laryng.*, 65, 33.

It is most important that authors should verify *personally* the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added.

4. Authors will be expected to pay for the cost of illustration blocks. An estimate of the cost will be provided.

5. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Authors of original communications on Oto-Laryngology in other journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

7. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS LTD, 109 Kingsway London WC 2.

8. The annual subscription is three guineas sterling (U.S.A. \$10,) post free, and is payable in advance.

9. Single copies will be on sale at 7s. 6d. each; copies of parts up to Vol. LXIII may be purchased at 4s. each.

10. All subscriptions, advertising and business communications should be sent to the publishers, HEADLEY BROTHERS LTD, 109 Kingsway London WC 2.

#### *United States of America*

Orders for this *Journal* may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or they may be sent direct to the publishers, HEADLEY BROTHERS LTD, 109 Kingsway London WC2, England.

# ENDOSCOPIC INSTRUMENTS

as designed for V. E. NEGUS, M.S., F.R.C.S.

Tracheoscope

Bronchoscope, with combined distal and proximal lighting. (9 sizes)

Oesophagoscope with detachable Suction Tube and Proximal Lighting. (5 sizes)

*Introducing to Doctors...*

THE FIRST  
*Silent*  
AURAL AID

into the perfecting of which  
has gone £30,000  
in Ardenite Research

From the Ardenite Research Unit, working under the scientific direction of Dr. S. C. Ghose, now comes the very first completely 'silent' Aural Aid. Embodying an entirely new approach to the problem of 'noise' elimination, the Ardenite 'Phoenix' represents a major advance in aural aid technique and makes a valuable contribution to the rehabilitation of the hard-of-hearing.

*The Ardenite 'Phoenix' offers these advantages:*

- ★ **EXCEPTIONAL SUPPRESSION OF 'CLOTHES-RUBBING'** and all unwanted background sounds.
- ★ **VARIATION OF FREQUENCY CHARACTERISTICS** in accordance with the Medical Research Council's recommendations.
- ★ **AUTOMATIC VOLUME LIMITATION (A.V.C.)** for protection against sudden loud sounds.
- ★ **Unique PRINTED WIRING** for stable characteristics over long periods of use.
- ★ **IMMEDIATE SERVICING** by the simple interchange of plugged-in parts.

— THE MICROPHONE IS ON TOP—CLEAR OF ALL CONTACT WITH CLOTHING

— 'FLOATING' CHASSIS IS FREE OF ALL METAL-TO-METAL CONTACT

The **ARDENTE**  
**SILENT PHOENIX**

For further particulars of the Ardenite 'Phoenix' and of our well-known '7-Days Home Trial' scheme, please apply to:

The Secretary, The Ardenite Hearing Rehabilitation Unit,  
Ardenite House, 309 Oxford Street, London, W.1. MAYfair 7917

## BINDING

Journal of  
Laryngology  
& Otology

Subscribers wishing to have their Journals bound can do so by sending them to the Publishers.

Volumes are strongly bound in whole dark blue buckram cases, with gold lettering on spine. The cost of binding is 25s. per volume, including postage.

Some missing parts can be supplied at 7s. 6d. each, or the whole volume, complete in the above binding, for 88s.

Publishers' cases can be supplied for 10s., including postage.

## AMPLIVOX MODEL 61 THE CLINICAL AUDIOMETER OF INTERNATIONAL REPUTE

*"Messrs. Amplivox were among the first firms to produce an audiometer in this country, and their larger model is one of the best instruments of the kind now made in the world at a competitive price."*—The LANCET, 23-12-50.

- Eleven exact test frequencies 125-12,000 c.p.s.
- Simplified hearing loss dial. The same set of figures is read for both bone and air conduction at all frequencies, and for speech.
- Bone conduction tests can be made from 125-4,000 c.p.s.
- Masking Tone calibrated in decibels, permitting accurate control of masking.
- Double Air receivers enable test tones to be switched instantly from ear to ear.
- Speech test circuit monitors speech level, permitting accurate measurement of hearing loss for speech.
- Loudness Balance Control establishes presence of recruitment in monaural deafness.
- Automatic voltage compensator.

Recruitment Test Set accessory establishes presence of recruitment by amplitude modulation, enabling each ear to be tested independently.

Speech Turntable and English-made Harvard Spondee records also available.

Full details are available from the manufacturers who will gladly arrange demonstrations if required.

## POST-TONSILLECTOMY COMFORT

**Immediate pain relief—Speedier Convalescence**

The pain of traumatized tissues following tonsillectomy, demands its own relief—and points the need for analgesia that quickly reaches the irritated area.

ASPERGUM provides 'salivary analgesia' through the simple act of chewing — it brings pain-relieving acetylsalicylic acid into *intimate* and *prolonged* contact with the tonsillar

region, seldom reached even intermittently by gargling. The rhythmic stimulation of muscular action also aids in relieving local spasticity & stiffness: more rapid tissue repair is promoted. Each pleasantly flavoured chewing gum tablet provides  $3\frac{1}{2}$  grains acetylsalicylic acid, permitting frequent use. Particularly suitable for children.

# Aspergum

**for more than two decades a dependable  
and welcome aid to patient-comfort**

*Ethically promoted in packages of 16 tablets and moisture proof bottles of 36 and 250*

WHITE LABORATORIES LTD., 428, SOUTHCROFT ROAD, LONDON, S.W.16

# THE LARYNGOSCOPE

A Monthly Journal  
devoted to the Diseases of the  
EAR, NOSE AND THROAT

*Official organ for the American Laryngological,  
Rhinological and Otological Society*

Price \$14.00 per year

# ŒSOPHAGUS

by **Eddy D. Palmer, M.D.** and its **DISEASES**

*Head of the Gastrointestinal Section, Walter Reed Hospital, Washington*

**T**HE technical advances of œsophageal surgery are fast out-stripping clinical understanding of the organ and its diseases. Modern treatment creates a demand for more accurate diagnosis, for better knowledge of the pathological characteristics of observed lesions, and for better clinical judgement in the application of surgical techniques.

In this book will be found the latest clinical practice relating to œsophageal disorders. *To be published in February.*

562 pages 125 Illus. 24 colour plates 93s. 0d.

## DISEASES OF THE NOSE AND THROAT

A Textbook for Students and Practitioners

by **Sir St Clair Thomson, M.D., F.R.C.S.** and **V. E. Negus, M.S., F.R.C.S.**

1,024 pages Illustrated 70s. 0d. net
