EDITORIAL POLICY

Studies in Second Language Acquisition is a refereed journal of international scope devoted to the scientific discussion of acquisition of the use of non-native and heritage languages. Each volume contains four issues, one of which is devoted to a special topic in the field. The other three issues contain research articles of either a quantitative or qualitative nature in addition to essays on current theoretical matters. Other rubrics include shorter articles such as Replication Studies, Squibs, and Research Reports.

Language Variation and Change

The official journal of the annual New Ways of
Analyzing Variation (NWAY) conference

Editors

Rena Torres Cacoullos, *Pennsylvania State University, USA*
William Labov, *University of Pennsylvania, USA*

Language Variation and Change is the only journal dedicated exclusively to the study of linguistic variation and the capacity to deal with systematic and inherent variation in synchronic and diachronic linguistics. Sociolinguistics involves analysing the interaction of language, culture and society; the more specific study of variation is concerned with the impact of this interaction on the structures and processes of traditional linguistics. *Language Variation and Change* concentrates on the effects of linguistic structure in actual speech production and processing (or writing), including contemporary or historical sources.

STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the SSLA website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 11,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are shorter empirical studies motivated by a previously published study (not necessarily one published in SSLA). The background and motivation sections will necessarily be shorter compared to research articles as the maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in SSLA.
