Sixth Subrata Chakrabarti International Conference
on Fluid Structure Interaction

Fluid Structure Interaction 2011

9 - 11 May 2011
Orlando, USA

Fluid Structure Interaction 2011 aims to promote international exchange of information and knowledge, giving experts from different application fields the opportunity to interact with one another and to provide valuable cross breeding of ideas and techniques. New research for the advancement of interaction problems will be the main focus of the conference, where a wide range of topics and types of fluids will be considered.

Conference topics include:

- Fluid pipeline interactions
- Structure response to severe shock and blast
- Hydrodynamic forces
- Acoustics and noise
- Computational methods
- Flow induced vibrations
- Response of structures, including fluid dynamics
- Experimental studies and validation
- Bioengineering applications
- Offshore structures and pipelines
- Subsea systems
- Soil structure interaction
