

READING THE ISOTOPIC CLOCKS

IF YOU NEED ¹⁴C DATES, COME TO THE EXPERTS

For the reliable data and custom service that your research demands, come to Teledyne Isotopes. Our labs have the staff, the equipment, the *experience* to handle all your research needs in radiocarbon and related analyses.

Reliability of data is assured through:

- Sample analysis done in modern, efficient labs
- Inter-calibration with major university and government labs
- Use of N.B.S. standards and internationally recognized reference materials

D.E. Stuart & R.P. Gauthier's

Prehistoric New Mexico 2nd Edition

Background for Survey

459 pp. 8½ x 11 Paper

Available - Spring 1984

\$1700

postage paid

"...Masterful" -- *The American Scientist*

"...State-of-the-art" -- *Early Man*

"...Thought-provoking..." -- *American Antiquity*

Not widely available in the 1981 edition published by the State of New Mexico, this volume has, nonetheless, achieved the status of an "underground classic." The authors reviewed nearly a century of research, and thousands of original site survey records, to produce the first in-depth overviews of New Mexico's archeology. The New Mexico Archeological Council is proud to offer this affordable edition of the single most useful technical reference on New Mexico's archeology.

THOSE WHO CAME BEFORE **Southwestern Archeology** **In the National Park System**

Robert H. Lister & Florence C. Lister
Foreword by Emil W. Haury

This panoramic overview of Southwestern archeology describes prehistoric cultures and reviews the features of 28 National Park Service areas. The Hohokam, Mogollon, Anasazi, and other peoples are viewed from a "Pan-Southwest" perspective that synthesizes features common to all. The volume features photographs by George A. Grant, first official photographer for the National Park Service, plus color plates by David Muench.

184 pp. (10 × 9), illus. \$32.50 clothbound. February.

ANIMAL USE BY **THE COZUMEL MAYA**

Nancy L. Hamblin

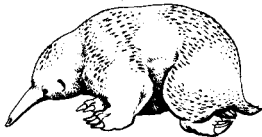

More than 20,000 faunal elements recovered from ten sites on Cozumel Island yield a wealth of information about Mayan food gathering and preparation, use of bones and teeth, and domestication or ceremonial use of animals—as well as about prehistoric ecology and trade. Hamblin's work represents an important contribution to our understanding of Mayan behavior, particularly in the Late Postclassic Period (A.D. 1250–1519), as it shows Cozumel to have been a major center of religion and trade. Her analysis of differences in animal use through time and among different population segments also provides a model for the reconstruction of prehistoric diets.

About 200 pp., \$23.00 clothbound. June.

QUATERNARY EXTINCTIONS **A Prehistoric Revolution**

Paul S. Martin & Richard G. Klein, eds.

Why did so many large animals and birds become extinct during the Late Pleistocene? Some scientists cite climatic change, while others argue that prehistoric man killed them off. The latest evidence for both viewpoints is presented in *Quaternary Extinctions*, the first major book to address the controversy so thoroughly in seventeen years. Findings from major sites around the world are presented by 45 international contributors drawn from a range of disciplines.

About 855 pp. (7 × 10), illus. \$65.00 clothbound. May.

DORSEY

- **THOSE WHO HAVE VANISHED: An Introduction to Prehistory**

RONALD L. WALLACE, University of Central Florida

The objective of this new text is to explain our distant past to those who are encountering prehistory for the first time. It has been written from the theoretical standpoint of cultural evolutionism. It includes descriptions of artifactual materials and discussions of human social evolution. Several biographical sketches illustrate the development of Archaeology as a social science.

- **AN INTRODUCTION TO ANTHROPOLOGY, 4th Edition**

Volume I: Physical Anthropology and Archaeology

Volume II: Ethnology

VICTOR BARNOUW, University of Wisconsin, Milwaukee

- **ANTHROPOLOGY: A General Introduction**

VICTOR BARNOUW

- **CULTURE AND PERSONALITY, 3rd Edition**

VICTOR BARNOUW

- **THE DEVELOPMENT OF ANTHROPOLOGICAL IDEAS**

the late JOHN J. HONIGMANN, the University of North Carolina

Examination copies for adoption consideration available upon request.

Please indicate course title and text presently used.

**50th ANNUAL MEETING
SOCIETY FOR AMERICAN ARCHAEOLOGY**

The Denver Hilton Hotel
Denver, Colorado

Wednesday, May 1–Saturday, May 4, 1985

Annual Meeting Chair: Dee F. Green, USDA Forest Service, 517 Gold Ave., S.W. Albuquerque, N.M. 87102.

GUIDELINES FOR CONTRIBUTIONS

The Executive Committee has ruled that the privilege of presenting papers at the annual meeting of the Society will be restricted to paid-up members of the Society. The Committee further decided that a person may not deliver more than one paper although that person may, at the same meeting, chair a session or serve as junior co-author of a paper presented by someone else.

Completed symposia proposals, abstracts of symposium papers, abstracts of contributed papers, abstracts of research reports, and abstracts for poster sessions must reach the program chairperson no later than October 15, 1984. *All proposals and abstracts should be submitted on appropriate SAA forms.* These forms are mailed in March to all SAA members with the ballot. Additional forms may be obtained from the Society at the address below. Authors of papers and symposia organizers will be notified of the Program Committee's decision as soon as possible. Abstracts of all papers and research reports accepted for presentation will be published in the final program. Long abstracts are no longer required.

SYMPOSIA

A symposium consists of a group of papers on a common theme. The symposium topic and the individual papers within it will be reviewed. Changes, such as consolidation of two symposia or changes in the individual papers, may be recommended.

Symposia organizers should contact the Program Chair no later than September 15, 1984 in order that the *Guidelines for Symposium Organizers* and a special symposium form can be sent to them.

Complete symposia proposals must be submitted *as a package* by the symposium organizer(s) and must be received by October 15, 1984. The package must include for every paper presented in the symposium:

- 2 copies of the SAA Short Abstract Form and
- 1 copy of the SAA Contributor Index Form.

CONTRIBUTED PAPERS (20 minutes)

Contributed papers are to be distinguished from Research Reports in that they generalize, synthesize, or compare and are addressed to problems of theory, method, culture history, or culture process. Contributed papers must follow the same format as the symposia papers, and each proposed presentation must include:

- 2 copies of the SAA Short Abstract Form and
- 1 copy of the SAA Contributor Index Form.

RESEARCH REPORTS (10 minutes) AND POSTER SESSIONS

A research report is a description of the results of a recent field or laboratory research project. This year the research report section will be divided into oral presentation and poster sessions: the author may choose which form to use. The poster session is especially appropriate for research results that can be described better graphically than verbally. Research reports will be reviewed. If the number submitted exceeds the space and time available, they will be accepted *in the order of submission*. Each proposed presentation must include:

- 2 copies of the SAA Short Abstract Form and
- 1 copy of the SAA Contributor Index Form.

Please follow these instructions carefully. Incorrect or late submissions can only be considered if space and time allow.

All other requests for scheduling and rooms or committee meetings, promotional booths, etc. should be directed to Jerome A. Miller, 1511 K Street, N.W., #716, Washington, D.C. 20005.
