

## GENERAL NOTES

### CONGRÈS FRANÇAIS D'OTO LARYNGOLOGIE.

THIS will be held on October 15th-19th, at the Faculty of Medicine in Paris under the Presidency of Dr. Chavanne of Lyons. The subjects for discussion are: (1) The General Medical Treatment of Acute Infections and of Septicæmia in Oto-rhino-laryngology. This will be opened by M. Lafitte-Dupont; (2) Deep-seated osteitis of the petrous bone. To be opened by M. Ramadier.

### ITALIAN SOCIETY OF OTO-LARYNGOLOGY.

The twenty-ninth Annual Congress of the Società Italiana di Laryngologia, Otologia e Rinologia will be held from September 9th-12th at Bolzano. We might remind readers that though this is stated to be in the district of the "Alto Adige" it is situated in what we used to know as the Tyrol, under the name of Bozen. During the Congress a visit will be paid to the neighbouring Merano, where the "grape cure", at that time of year, should be in full swing. The weather at this time is generally perfect in the Tyrol.

This year the President is Professor Bilancioni, well known as head of the University Clinic in Rome. The set discussion will be on "Traumatism of the Ear, Nose, Accessory Cavities and Larynx." This year the exceptional reductions on railways fares, amounting to 50 per cent, and even 75 per cent, are being given. Full particulars can be obtained from the Secretary:—Professor Mario Silvagni, 58 via Cavour, Roma (122), Italy.

### OBITUARY.

George Fetterolf (1869-1932).

Visitors to Philadelphia from this side will be sorry to hear of the death of Dr. George Fetterolf, on December 29th last.

He was Professor of Oto-laryngology at the University of Pennsylvania; an active member on the staff of the Annals of Otology and of the Archives of Oto-laryngology.

He was not only a Fellow, but also a Vice-President of that exclusive body—The American Laryngological Association—and his turn for President would have come this year.

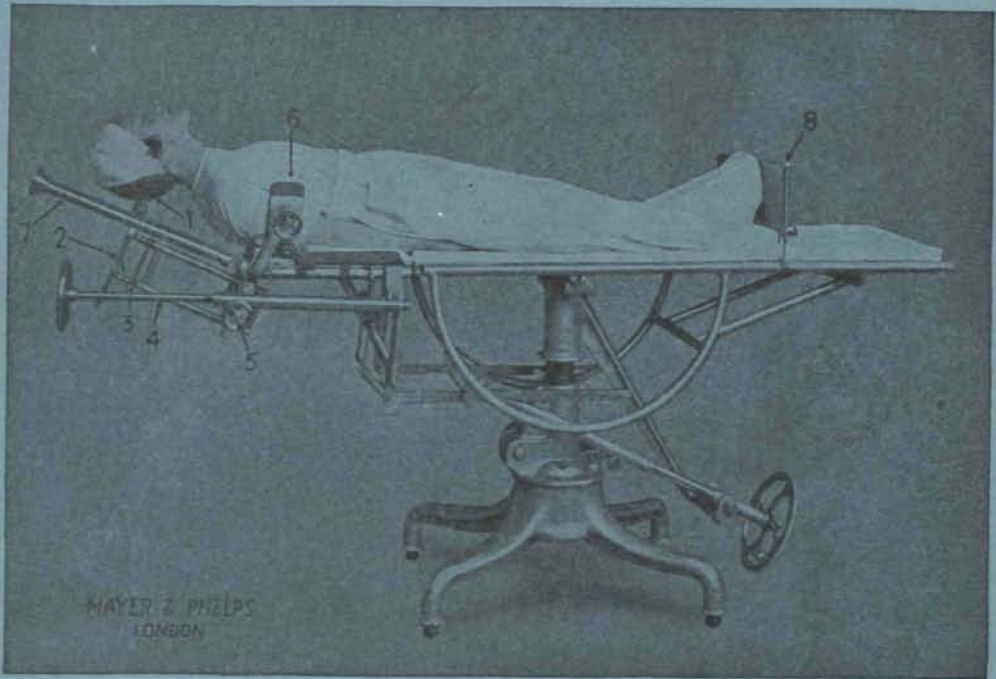

He was a great worker and always extended a warm welcome to visitors from this side of the Atlantic.

# Peroral Endoscopy Table

Fitted with Head Rest for BRONCHOSCOPY, ŒSOPHAGOSCOPY,  
NASAL OPERATIONS Etc.

Designed by V. E. NEGUS, M.B., B.S., F.R.C.S.

The head rest enables the operator himself to place the patient in the desired position for a variety of operations. All parts touched by the operator are sterilisable.

The apparatus is an elaboration of Haslinger's Bronchoscopic head rest, but its range of utility is extended to enable the patient to be supported with the shoulders beyond the end of the table for œsophagoscopy, and to be kept in the correct attitude during operations performed in the sitting or semi-sitting position.
