

The energy metabolism of sheep—the effect of infusing small amounts of chloroform into the rumen. By J. L. CLAPPERTON and J. W. CZERKAWSKI 55A

The effect of processing barley on its digestion in the rumen of growing steers. By A. PAVLIČEVIĆ, N. A. MACLEOD and M. KAY 56A

The value of different cereals in diets for growing steers. By M. KAY, N. A. MACLEOD and A. PAVLIČEVIĆ 57A

The chemical composition and dilution rate of rumen fluid in sheep receiving a diet of barley, hay and flaked maize. By J. C. HODGSON and P. C. THOMAS 57A

Partition of energy and nitrogen digestion in sheep given fresh pasture species. By J. C. MACRAE and M. J. ULYATT 58A

Estimation of food and microbial protein in duodenal digesta. By D. G. HARRISON, D. E. BEEVER and D. J. THOMSON 60A

Determination of the quantities of food and microbial nitrogen in duodenal digesta. By D. E. BEEVER, D. G. HARRISON and D. J. THOMSON 61A

Changing patterns of fermentation and mineral absorption in the large intestine of lambs weaned from milk to concentrates. By M. G. ROBSON and R. N. B. KAY 62A

Factors influencing the total time spent chewing by sheep given diets containing long, dried forages. By S. B. CAMMELL and D. F. OSBOURN 63A

The utilization of starch in the small intestine of sheep and the possible long-term adaptation. By R. W. MAYES and E. R. ØRSKOV 64A

Faecal magnesium output and plasma Mg concentration in sheep. By T. F. ALLSOP and J. A. F. ROOK 65A

The digestion and utilization of grass processed by wafering or by grinding and pelleting. By D. J. THOMSON and D. E. BEEVER 66A

Measurement of volatile fatty acid production in cattle: distribution of infusates in the rumen. By J. D. SUTTON, G. K. MACLEOD, J. W. SISSONS and V. W. JOHNSON 67A

Utilization of salts of acetic, propionic and butyric acids by growing lambs. By F. D. DeB. HOVELL and J. F. D. GREENHALGH 68A

*Two Hundred and Forty-third Scientific Meeting
Edward Lewis Lecture Theatre, The Middlesex Hospital Medical School,
Cleveland Street, London, 17 MARCH 1972*

Energy and protein digestion of spring- and autumn-harvested rye-grass by sheep. By D. E. BEEVER, C. R. LONSDALE and D. J. THOMSON 69A

Intake and absorption of essential fatty acids by the sheep. By W. M. F. LEAT and F. A. HARRISON 70A

The effect of fasting on plasma insulin after repeated glucose loading in pigs. By D. M. ANDERSON 71A

Mammary and whole-body metabolism of glucose, acetate and palmitate in the lactating horse. By J. L. LINZELL, E. F. ANNISON, R. BICKERSTAFFE and L. B. JEFFCOTT 72A

The influence of dietary cadmium concentration on liver copper in ewes and their lambs. By C. F. MILLS and A. C. DALGARNO 73A

The effect of zinc deficiency on the activity of the adrenal glands. By J. QUARTERMAN 74A

Availability of some iron compounds to the veal calf. By I. BREMNER and A. C. DALGARNO 75A

Copper status of the veal calf. By I. BREMNER and A. C. DALGARNO 76A

Seven generations of protein-calorie deficiency in rats. By R. J. C. STEWART, R. F. PREECE and HILDA G. SHEPPARD 77A

A further observation on urea-cycle enzymes in rats during alteration in dietary protein intake. By T. K. Das 78A

Progesterone—the hormone of protein anabolism in early pregnancy. By D. J. NAISMITH and R. B. FEARS 79A

Nutritional value of a protein isolate from the Throws M.S. variety of field beans (*Vicia faba* L.) grown in the UK. By I. F. DUTHIE, P. D. PORTER and B. GADSBY 80A

Nutrient intake of students in various types of accommodation. By B. JACQUELINE STORDY and J. R. COWHIG 81A

Consumption of major food groups by students over a 3-month period. By SUSAN J. ATKINSON, P. NICHOLAS and CHRISTINE WYN-JONES 82A

Nutrient intake by students over a 3-month period. By CHRISTINE WYN-JONES, SUSAN J. ATKINSON and P. NICHOLAS 83A

Observations on ascorbic acid and iron concentrations in the blood of students. By P. NICHOLAS, SUSAN J. ATKINSON and CHRISTINE WYN-JONES 84A

A survey of school meals. By A. E. BENDER, PAMELA MAGEE and A. H. NASH 85A

INDEX OF AUTHORS

Proceedings of the Nutrition Society

CONTENTS OF VOL. 31, No. 2, SEPTEMBER 1972

SYMPOSIUM PROCEEDINGS

Two Hundred and Fortieth Scientific Meeting
Edward Lewis Lecture Theatre, The Middlesex Hospital Medical School,
Cleveland Street, London
 3 DECEMBER 1971

ALCOHOL IN NUTRITION

Chairman: PROFESSOR SIR CHARLES DODDS, Bt, MVO, MD, DSc, FRCP, FRIC, FRS,
 49 Sussex Square, London W2

	PAGE
Alcohol consumption in its different forms. By F. AYLWARD	77
Metabolism of alcohol (ethanol) in man. By G. L. S. PAWAN	83
The pharmacological actions of alcohol in relation to nutrition. By C. W. M. WILSON	91
Social implications of alcohol consumption. By J. C. MCKENZIE	99
Metabolic effects of ethanol. By J. TRÉMOLIÈRES, R. LOWY and G. GRIFFATON	107
Nutritional aspects of alcohol consumption. By H. M. SINCLAIR	117

Two Hundred and Forty-second Scientific Meeting

Ninety-sixth Scottish Meeting
The Hannah Research Institute, Ayr
 10 MARCH 1972

MANIPULATION OF RUMEN FERMENTATION

Chairman: PROFESSOR J. A. F. ROOK, BSc, PhD, DSc, FRIC,

The Hannah Research Institute, Ayr

Chairman's introduction. By J. A. F. ROOK	125
Physical form of the diet in relation to rumen fermentation. By D. J. THOMSON	127
Physiological characteristics of rumen microbes and relation to diet and fermentation patterns. By P. N. HOBSON	135
Fate of metabolic hydrogen in the rumen. By J. W. CZERKAWSKI	141
The control of fermentation of carbohydrate. By A. G. SINGLETON	147
Control of nitrogen metabolism in the ruminant. By K. HUTTON and E. F. ANNISON	151
The protection of dietary components from rumen fermentations. By A. T. PHILLIPSON	159
Significance to the host of changes in fermentation activity. By P. C. THOMAS and J. L. CLAPPERTON	165

Two Hundred and Forty-fourth Scientific Meeting

Joint Meeting with the Society for Endocrinology
University of Southampton
 21 AND 22 APRIL 1972

PROTEIN METABOLISM AND HORMONES*

Chairman: PROFESSOR K. A. MUNDAY, PhD, FIBiol, University of Southampton

Intestinal absorption of amino acids and peptides. By D. M. MATTHEWS	171
Hormonal and adaptive control of amino acid transport in muscle. By G. G. GUIDOTTI	179

Chairman: PROFESSOR F. G. YOUNG, PhD, DSc, FRS, Department of Biochemistry,
 University of Cambridge

Insulin and the regulation of protein synthesis in muscle. By IRA G. WOOL	185
Control by insulin of protein synthesis in muscle. By D. R. LONDON	193
Secretion of human growth hormone. By W. M. HUNTER	199
Dietary effects on the secretion and actions of growth hormone. By M. R. TURNER	205

Chairman: PROFESSOR H. N. MUNRO, MB, DSc, FIBiol, FRSE, Clinical Research Centre,
 Northwick Park, Harrow, Middlesex and Department of Nutrition and Food Science,
 Massachusetts Institute of Technology, Cambridge, Mass., USA

Insulin secretion and food intake. By W. J. MALAISSE	213
Insulin secretion in human protein-calorie deficiency. By R. D. G. MILNER	219
Protein synthesis and breakdown and amino acid catabolism in protein-calorie malnutrition. By W. P. T. JAMES	225
Insulin and muscle amino acid balance. By G. F. CAHILL JR, T. T. AOKI, M. F. BRENNAN and W. A. MÜLLER	233

REPORT OF THE ROYAL SOCIETY'S BRITISH NATIONAL COMMITTEE FOR NUTRITIONAL SCIENCES

Metric Units, Conversion Factors and Nomenclature in Nutritional and Food sciences: Report of the Subcommittee on Metrication of the British National Committee for Nutritional Sciences	239
--	-----

ABSTRACTS OF COMMUNICATIONS

Two Hundred and Forty-first Scientific Meeting
Ninety-fifth Scottish Meeting
The Hannah Research Institute, Ayr, 9 MARCH 1972

Energy metabolism in sheep receiving diets of barley, hay and flaked maize. By P. LAWRENCE and P. C. THOMAS	49A
The nutritive value of field beans (<i>Vicia faba</i> L.) for laying hens. By J. DAVIDSON	50A
The distribution of free amino acids between plasma and blood cells of chicks fed on different proteins. By A. G. STEPHENS and R. A. EVANS	50A
The free amino acids in the blood of a variety of warm-blooded animals. By LUCYNA BURACZEWSKA, M. V. TAS, R. F. E. AXFORD, R. A. EVANS and A. G. CHAMBERLAIN	52A
Blood flow, oxygen consumption and thermogenesis in the portal-drained viscera of conscious sheep. By A. J. F. WEBSTER and F. WHITE	52A
Evaluation of a rumen fermentation balance, corrected for cell synthesis. By D. DEMEYER, H. HENDERICKX and C. VAN NEVEL	54A

[Continued on p. iii of wrapper]

CAMBRIDGE UNIVERSITY PRESS

Bentley House, 200 Euston Road, London NW1 2DB
 American Branch: 32 East 57th Street, New York, N.Y. 10022
 Single parts £4.00 net in U.K. (\$12.00 in U.S.A.)
 Subscription price £9.00 net in U.K. (\$27.50 in U.S.A.)

Lampport Gilbert Printers Ltd, Reading, England

* Copies of this complete symposium may be obtained from: The Nutrition Society, Chandos House, 2 Queen Anne Street, London W1. The cost is £1.00 (\$2.50) each. Remittance should be sent with order. Cheques or Postal Orders should be made payable to "The Nutrition Society".
