

FRANK D. McCANN, Jr.

## THE BRAZILIAN AMERICAN ALLIANCE IN WORLD WAR II

Frank D. McCann has used previously inaccessible Brazilian archival material to discuss the events during the Vargas regime which brought about a close alliance between Brazil and the United States and resulted in Brazil's economic, political, and military dependence on her powerful North American ally. He shows that until 1940 the drive for closer union came largely from Brazil, which wanted to offset the shifting alliances of the Spanish-speaking countries and escape from British economic domination.

## LIBERAL AMERICA AND THE THIRD WORLD

*Political Development Ideas in Foreign Aid and Social Science*

Despite the difference in results of aid to Europe and the Third World, American conceptions of political development have remained largely constant: democracy, stability, anti-communism. Robert A. Packenham accounts for how the objectives and theories of the U.S. aid officials and social scientists have remained the same in spite of negative results and the seeming inappropriateness of their ideas in the Third World context, and offers suggestions for future policy.

## PERUVIAN EXPERIMENT

*Continuity and Change under Military Rule*

This volume will be a welcome and valuable addition to Latin American politics in general and especially to our understanding of events in Peru since 1968. Every chapter without exception is based on extensive familiarity with Peru and on first-hand knowledge of the country. This book should appeal to scholars generally interested in such diverse areas as Latin American politics, political development and models of modernization, the role of the military in political development, the political aspects of economic development, and the like.

# CRIMINAL JUSTICE IN EIGHTEENTH CENTURY MEXICO

A Study of the Tribunal of the Acordada

*Colin M. MacLachlan*

The Tribunal of the Acordada was the most important law enforcement agency in eighteenth-century Mexico, and appears now to have been a major advance in the administration of justice in New Spain. Freed of direct political functions, the Acordada concentrated on those crimes that could not be dealt with effectively by local officials in the traditional *ad hoc* manner. It placed centralized police authority in the hands of the Viceroy, and actively sought out malefactors and brought them to justice through a system of volunteer agents. Thus, with a relatively insignificant investment of state funds, the vice-regal government was able to hold criminal activity throughout New Spain to an acceptable level. In this study Mr. MacLachlan describes functional law at the enforcement level and indicates the direction and evolution of law in Mexico.

# BUREAUCRATIC POLITICS AND ADMINISTRATION IN CHILE

*Peter S. Cleaves*

This is a study of the housing, public works, financial, and agricultural sectors of the national government of Chile. It spans both the Frei and Allende regimes, and is based on a large body of data gathered in open-ended interviews with 150 persons, including many high-level administrators.

The author is critical of the literature on comparative and "development" administration, believing it to be ethnocentric and imprecise. In this study he relies on classical theories of administrative behavior, and on the literature of political economy. Thus, he proceeds chapter by chapter to study five functional processes, budgeting, planning, organizational reform, coordination, and client relations. He gives particular attention to the ministries of Housing and Public Works, and to their client contractors and shantytown dwellers.

## NOTES FOR CONTRIBUTORS

*Journal of Latin American Studies* is published twice a year under the academic sponsorship of the Centres or Institutes of Latin American Studies at the Universities of Cambridge, Glasgow, Liverpool, London and Oxford.

The scope of the journal is the study of Latin America from the standpoint of the social sciences, including anthropology, archaeology, economics, geography, history, international relations, politics, sociology, etc., though it is not concerned with linguistic or literary studies.

Editorial policy avoids commitment to any political viewpoint or ideology, but welcomes free discussion of such issues in the Latin American context, on the understanding that all responsibility for opinions expressed rests exclusively with the author concerned and not with either the journal or its editors.

Contributions are invited from all parts of the world. Articles should generally not be more than 8,000 words long, and two copies, typed with double-spacing, should be submitted. Diagrams and maps may be included by arrangement with the editors. The journal is published in English, but articles written in other languages may be considered, and arrangements made as required for translation into English. Contributors should keep one copy of the typescript for use in correcting proofs.

All contributions and editorial correspondence should be addressed to *Journal of Latin American Studies*, Institute of Latin American Studies, 31 Tavistock Square, London, WC1H 9HA.

Each contributor will receive, free of charge, 25 offprints of his article and a copy of the issue of the journal in which it appears.
