JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S002237780002345X Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge, CB3 9EW England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy, University of Manchester, Manchester M*13 9*PL, England*

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92093, *U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 92, London NW1 2DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 17 and 18 (1977) is £30.00 net per volume (US $75.00 in the U.S.A. and Canada) for institutions; £15.00 (US $40.00) per volume for individuals. Single parts cost £12.00 net (US $30.00 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS TO VOLUME 18

PART 1 AUGUST 1977

Obliquely propagating whistler mode waves in cold plasmas permeated by dilute low-β anisotropic plasmas. K. HASHIMOTO and I. KIMURA *page* 1

Resistive instability of a low-beta plasma cylinder without assumed mode localization. R. J. WRIGHT 15

Variational method for electromagnetic waves in a magnetoplasma. H. L. BERK and R. R. DOMINGUEZ 31

Renormalization method and singularities in the theory of Langmuir turbulence. G. PELLETIER 49

Heating and ionization in MHD switch-on shocks in partially ionized plasmas. L. BIGHEL, A. R. COLLINS and N. F. CRAMER 77

Modifications in the maximum convective growth rate of the electromagnetic proton-cyclotron instability due to the presence of thermal ions. L. GOMBEROFF and S. CUPERMAN 91

Multiple spatial scaling and the weak coupling approximation. Part 2. Homogeneous kinetic equation. P. E. KLEINSMITH 99

The test particle problem in the theory of bounded plasmas. R. TEGEBACK, A. S. USENKO, I. P. YAKIMENKO and A. G. ZAGORODNY 113

Determination of plasma density and temperature profiles using magnetoacoustic oscillations. M. H. BRENNAN, B. L. JESSUP and I. R. JONES 127

Solitary electrostatic ion cyclotron waves. M. Y. YU 139

A quantum field theoretical approach to plasmas. L. GOMBEROFF 145

Modulation of randomly phased whistler wave packets by kinetic Alfvén and ion quasi-modes in a magnetized plasma. P. K. SHUKLA 155

On the filamentation of large amplitude lower-hybrid waves. K. H. SPATSCHEK, P. K. SHUKLA and M. Y. YU 165

Two dimensional self-modulation of a whistler wave propagating along the magnetic field in a plasma. V. I. KARPMAN and H. WASHIMI 173

PART 2 OCTOBER 1977

Refraction of hydromagnetic shocks. A. R. BESTMAN *page* 189

Resistive effects on Alfvén wave heating. J. M. KAPPRAFF and J. A. TATARONIS 209

Self-generated magnetic fields in plasmas. G. J. PERT 227

Magnetic field aligned electric fields in an adiabatic plasma. A. HRUŠKA 243

https://doi.org/10.1017/S002237780002345X Published online by Cambridge University Press

Nonlinear propagation of high frequency plasma waves in a magnetized plasma. P. K. SHUKLA *page* 249

On reconnexion experiments and their interpretation. P. J. BAUM and A. BRATENAHL 257

Larmor radius effects on the gravitational instability of a two-component plasma. R. P. S. CHHONKAR and P. K. BHATIA 273

Overlooked perturbations and completeness. J. G. KRÜGER 287

Hydromagnetic stability of a jet of very high compressibility. H. K. S. IYENGAR and B. B. CHAKRABORTY 289

Self-focusing of electromagnetic waves as a result of relativistic electron-mass variation. K. H. SPATSCHEK 293

A note on the Lagrangian method for nonlinear dispersive waves. T. KAWAHARA 305

Wall stabilization in a collisionless bumpy θ-pinch. G. VAHALA and L. VAHALA 317

The ray velocity surface and the CMA diagram. A. D. M. WALKER 339

On the non-uniqueness of ideal MHD equilibria, with implications for tokomak calculations. J. J. FIELD and J. C. B. PAPALOIZOU 347

Effect of growth-rate modulation on the nonlinear mode coupling between stable and unstable plasma waves. D. ANDERSON, A. BONDESON and L. FALK 363

Drift waves in a turbulent plasma. I. MENDONCA and J. T. MENDONCA 373

PART 3 DECEMBER 1977

Ion-acoustic solitons in an electromagnetically irradiated magneto-plasma. L. A. PATEL *page* 381

Electromagnetic ion cyclotron instability *vs.* electrostatic ion-cyclotron instability in mixed (warm-cold) magnetospheric-like plasmas. S. CUPERMAN and L. GOMBEROFF 391

Electron oscillations of a collisionless plasma in a static electric field. C. WAHLBERG 415

Nonlinear propagation of the ordinary mode in a hot magnetoplasma. TU KHIET, Y. FURUTANI and Y. H. ICHIKAWA 433

Magnetic field-line reconnexion by localized enhancement of resistivity. Part 2. Quasi-steady process. T. TSUDA and M. UGAI 451

Non-spherical implosion of a dense thermonuclear plasma. F. WINTERBERG 473

Electromagnetic effects on the electrostatic ion-cyclotron instability. L. GOMBEROFF 487

https://doi.org/10.1017/S002237780002345X Published online by Cambridge University Press

Slowly varying nonlinear waves in a cold plasma stream. R. J. GRIBBEN and E. J. PARKES *page* 495

Acceleration of trapped particles by a Langmuir wave in an inhomogeneous plasma. K. B. DYSTHE and O. T. GUDMESTAD 509

Dynamics of four coupled plasma waves to second order. D. WALTERS and G. J. LEWAK 525

On nonlinear axisymmetric equilibria in the magnetohydrodynamic approximation. M. L. WOOLLEY 537

Effect of self-focusing on parametric back-scattering and absorptive instabilities in a plasma. M. S. SODHA, S. C. KAUSHIK and R. P. SHARMA 551

AUTHOR INDEX, VOLUME 18 563

https://doi.org/10.1017/S002237780002345X Published online by Cambridge University Press
