We have received the following letter from Italy which we gladly publish:

Dear Colleague, We have been entrusted by the Italian Society of Radiology to draw up a report for the coming National Congress on "Diagnosis and treatment of neoplasms of the head, pharynx and pharyngo-oesophagus".

We would be very grateful if any colleagues in the English School would send us any works connected with this subject, both for our own use and because we do not wish to omit any contributions in this field.

E. CONTE,
Istituto Radiologico Mauriziano,
Ospedale, Umberto I, Turin.

F. STOPPANI,
Istituto di Radiologia Ospedale,
San Giovanni, Turin.

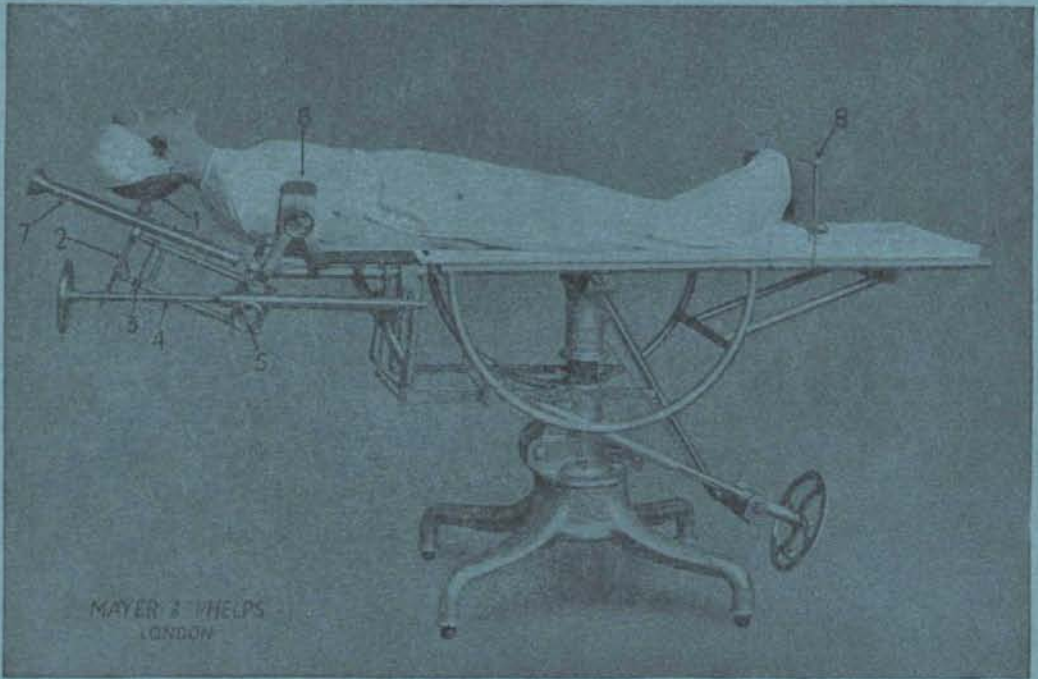

* * *

We regret to record the death of Dr. D. N. MacLennan of Toronto who was one of the best-known ear and throat specialists in Canada and was for very many years chief of the Eye, Ear and Throat Department of the Toronto General Hospital.

Peroral Endoscopy Table

Fitted with Head Rest for BRONCHOSCOPY, ŒSOPHAGOSCOPY,
NASAL OPERATIONS Etc.

Designed by V. E. NEGUS, M.S., F.R.C.S.

The head rest enables the operator himself to place the patient in the desired position for a variety of operations. All parts touched by the operator are sterilisable.

The apparatus is an elaboration of Haslinger's Bronchoscopic head rest, but its range of utility is extended to enable the patient to be supported with the shoulders beyond the end of the table for œsophagoscopy, and to be kept in the correct attitude during operations performed in the sitting or semi-sitting position.
