CONTENTS

PART I (JANUARY 1971)

J. C. Hoyle: Preliminary Investigations into the use of Systemics for	
Control of Red Ring Disease of Coconuts	I
Z. Dor, R. Carmeli, D. Lachover and M. Zur: Spacing and Space-	_
planting Experiments on Sugar Beet in Israel S. Sinnadurai and S. K. Amuti: Dormancy of Shallots in Ghana	9
N. K. Jain, D. P. Maurya and H. P. Singh: Effects of Time and Method	17
of Applying Nitrogen to Dwarf Wheats P. H. Haynes and D. W. Wholey: Variability in Commercial Sweet	21
Potatoes (<i>Ipomoea batatas</i> —L. Lam) in Trinidad P. C. Owen: Responses of a Semi-dwarf Wheat to Temperatures Repre-	27
senting a Tropical Dry Season. I. Non-extreme Temperatures P. C. Owen: Responses of a Semi-dwarf Wheat to Temperatures Repre-	33
senting a Tropical Dry Season. II. Extreme Temperatures	43
C. N. Williams: Growth and Productivity of Tapioca (Manihot utilissima).	
II. Stomatal Functioning and Yield M. G. R. Cannell: Effects of Fruiting, Defoliation and Ring-barking on	49
the Accumulation and Distribution of Dry Matter in Branches of Coffee	
arabica L. in Kenya	63
P. C. Whiteman: Distribution and Weight of Nodules in Tropical	
Pasture Legumes in the Field	75
Kwanchai A. Gomez and S. K. De Datta: Border Effects in Rice Experimental Plots. I. Unplanted Borders	87
•	07
Book Review:	
Pest Control in Rice, Pans Manual No. 3: J. H. Stapley	93
PART 2 (APRIL 1971)	
R. R. W. Folley: Mechanized Harvesting of Tree Crops	97
D. H. Khan and G. H. Rashid: Losses of Nitrogen from Urea in Some	•
Soils of East Pakistan	107
A. Pinkerton: Some Micronutrient Deficiencies in Sisal (Agave sisalana)	113
G. B. Masefield: The Root Nodulation of Tall and Dwarf Peas and Beans	123
R. H. V. Corley, B. S. Gray and Ng Siew Kee: Productivity of the Oil	
Palm (Hings dunggnes lacd) in Walaysia	
Palm (Elaeis guineensis Jacq.) in Malaysia	129
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry	
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry Organic Matter on Growth and Yield of Beans (<i>Phaseolus vulgaris</i> L.)	129
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry	137
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry Organic Matter on Growth and Yield of Beans (<i>Phaseolus vulgaris</i> L.) A. Bolton: Analysis of a Diallel Cross of Maize Varieties Grown at Three	
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry Organic Matter on Growth and Yield of Beans (<i>Phaseolus vulgaris</i> L.) A. Bolton: Analysis of a Diallel Cross of Maize Varieties Grown at Three Altitudes in Tanzania D. K. Das Gupta: Effects of Cycocel on Lodging and Grain Yield of Upland and Swamp Rice in Sierra Leone	137 145 157
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry Organic Matter on Growth and Yield of Beans (<i>Phaseolus vulgaris</i> L.) A. Bolton: Analysis of a Diallel Cross of Maize Varieties Grown at Three Altitudes in Tanzania D. K. Das Gupta: Effects of Cycocel on Lodging and Grain Yield of Upland and Swamp Rice in Sierra Leone Lloyd A. Downey: Water Use by Maize at Three Plant Densities	¹ 37
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry Organic Matter on Growth and Yield of Beans (Phaseolus vulgaris L.) A. Bolton: Analysis of a Diallel Cross of Maize Varieties Grown at Three Altitudes in Tanzania D. K. Das Gupta: Effects of Cycocel on Lodging and Grain Yield of Upland and Swamp Rice in Sierra Leone Lloyd A. Downey: Water Use by Maize at Three Plant Densities R. Fordham: Effects of Soil Moisture on Growth of Young Tea in	137 145 157 161
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry Organic Matter on Growth and Yield of Beans (Phaseolus vulgaris L.) A. Bolton: Analysis of a Diallel Cross of Maize Varieties Grown at Three Altitudes in Tanzania D. K. Das Gupta: Effects of Cycocel on Lodging and Grain Yield of Upland and Swamp Rice in Sierra Leone Lloyd A. Downey: Water Use by Maize at Three Plant Densities R. Fordham: Effects of Soil Moisture on Growth of Young Tea in Malawi	137 145 157
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry Organic Matter on Growth and Yield of Beans (Phaseolus vulgaris L.) A. Bolton: Analysis of a Diallel Cross of Maize Varieties Grown at Three Altitudes in Tanzania D. K. Das Gupta: Effects of Cycocel on Lodging and Grain Yield of Upland and Swamp Rice in Sierra Leone Lloyd A. Downey: Water Use by Maize at Three Plant Densities R. Fordham: Effects of Soil Moisture on Growth of Young Tea in Malawi F. A. Bliss and D. C. Arny: Breeding Tomatoes for Resistance to Leaf	137 145 157 161
A. C. Magalhães, J. C. Montojos and S. Miyasaka: Effect of Dry Organic Matter on Growth and Yield of Beans (Phaseolus vulgaris L.) A. Bolton: Analysis of a Diallel Cross of Maize Varieties Grown at Three Altitudes in Tanzania D. K. Das Gupta: Effects of Cycocel on Lodging and Grain Yield of Upland and Swamp Rice in Sierra Leone Lloyd A. Downey: Water Use by Maize at Three Plant Densities R. Book Reviews:	
The Role of Nitrogen in Grassland Productivity: D. C. Whitehead Farming Systems of the World: A. N. Duckham and G. B. Masefield Sorghum: H. Doggett	190 191
Sorgham. II. Doggett	191
Part 3 (July 1971)	
A. Bolton: Response of Maize Varieties in Tanzania to Different Plant	
Populations and Fertilizer Levels	193
P. A. Huxley and J. M. Waller: A Simple Wetness Recorder	205
A. Marani and A. Amirav: Effects of Soil Moisture Stress on Two Varieties	
of Upland Cotton in Israel. I. The Coastal Plain Region D. Shimshi and A. Marani: Effects of Soil Moisture Stress on Two	213
Varieties of Upland Cotton in Israel. II. The Northern Negev Region	225
H. K. Pande and B. N. Mittra: Effects of Depth of Submergence,	5
Fertilization and Cultivation on Water Requirement and Yield of Rice	241
T. P. Abraham, A. Hoobakht and Parvin Aryan Nejad: Statistical	
Studies of Experimental Techniques with the Apple Crop in Iran	249
A. Wild: The Potassium Status of Soils in the Savanna Zone of Nigeria	257
Book Review:	
Rice Fertilization: FAO/IAEA	271
	·
Part 4 (October 1971)	
Sir Joseph Hutchinson: Changing Concepts in Crop Plant Evolution	273
J. L. Palmer and P. R. Goldsworthy: Fertilizer Trials with Sprayed	
and Unsprayed Cotton in Nigeria	281
A. Marani and A. Amirav: Effects of Soil Moisture Stress on Two Varieties of Upland Cotton in Israel. III. The Bet-She'an Valley	289
J. M. Waller: The Incidence of Climatic Conditions Favourable to Coffee	209
Berry Disease in Kenya	303
E. G. B. Gooding: Effects of Fertilizing and Other Factors on Yams in	
Barbados	315
G. Lockwood: Early Results from a Trial of Upper Amazon Cocoa Clones	
in Ghana H. K. Pande and N. K. Adak: Leaching Loss of Nitrogen in Submerged	321
Rice Cultivation	329
D. Hopkinson: Leguminous Cover Crops for Maintaining Soil Fertility in	J -J
Sisal in Tanzania. II. Effects on Moisture Status of Soil and Sisal	337
I. S. Cornforth: Nitrogen Mineralization in West Indian Soils	345
F. Weller: A Method for Studying the Distribution of Absorbing Roots of	
Fruit Trees	351
Book Reviews:	
Plant Agriculture: Jules Janick et al.	363
Plant Diseases of Fiji: K. M. Graham	364
Proteins as Human Food: Ed. R. A. Lawrie	365
Insect Pollination of Crops: J. B. Free	367

tion. It is particularly important, for example, that the title should contain references, where relevant, to the crop, the character of the investigation, the factors under review, and the climatic or geographic area in which the work was done.

Headings. The following details should be given at the head of the first sheet: the full title of the paper; a short title for running headlines, not exceeding 48 characters, counting each letter and space as one character; the name(s) of the author(s); the address at which the work was carried out; the present address(es) of author(s), it different from the previous item; and the address (normally of the senior author or his proxy) to which proofs should be sent.

Summary. A short but accurate and informative summary must be included. The preparation of the summary, which requires much care, is not an Editorial responsibility. Papers received without adequate summaries will be returned to the author.

Experimentation. This journal specialises in the presentation of data based on up-to-date methods of experimentation. It is therefore important that, where appropriate, papers should include: an adequate account of lay-outs; description of treatments and general management; and assessments of experimental variability (e.g. coefficient of variation) and of the statistical significance of the results, specifying the methods used for the analysis (but without showing any details of the calculations). Authors are urged to give the dates when experiments were carried out.

Plates. These should only be included where they are essential to the understanding of the paper, and will only be accepted if of high quality. Photographs should be provided as unmounted glossy black-and-white prints (colour prints, but not colour transparencies, are acceptable for reproduction in black-and-white; they can only be reproduced in colour if a financial subsidy is provided). If lettering is to be inserted on a print, this should be shown on a spare copy or an overlay, and an unmarked print provided for marking by the printer. Please do not write heavily on the back of prints or use clips that mark them.

Diagrams. Diagrams should be drawn in Indian ink on white drawing paper, and the precise position of all lettering should be indicated. Each illustration should bear the name of the author(s) and the figure number, written clearly in the margin or on the back. On no account should any diagram be submitted on a sheet larger than foolscap size.

Dating the work. Dates should be given for the beginning event of each experiment. The editors are reluctant to accept papers submitted more than three years after the end of the relevant experimental work.

Legends. The legends for all illustrations should be given on a separate sheet of paper, clearly marked with the number of each plate or diagram. The ideal position for each diagram should be marked in the text, although it may not always be possible to put the illustration exactly in that place. Plates will normally be bound immediately after the end of the paper.

Tables Each table should be typed on a separate sheet of paper, and its preferred position indicated on the typescript. Each table should be numbered and bear an appropriate title, along the lines normally used for tables in this publication. Contributors are specially asked to avoid presenting tables that are too large to print across the page.

Units. After 1972 papers will only be accepted if data are presented in metric units. A leaflet giving full details of the S.I. system is available from the Editor.

References. The Harvard system of citation is used throughout as follows: name and initial(s) of author(s); year of publication in parentheses, further distinguished by the addition of small letters a, b, c, etc., where there are citations to more than one paper published by the same author(s) in one year; contracted title of periodical as given in the World List of Scientific Periodicals; volume number in arabic figures; number of the first page of the paper. In the text, references should be denoted by giving the name of the author(s) with the date of publication in parentheses, e.g. Brown (1937) ..., (Brown, 1937a; Jones and Smith, 1942a, b). In the list of references all names should be given in full, but where more than two collaborating authors are quoted in the text, only the first name is normally shown, followed by st of.

Referees. All manuscripts are critically reviewed by expert referees, on whose advice the Editor accepts or rejects contributions, or returns them to authors for reconsideration.

Proofs. Two sets of single-sided page proofs will be sent to each author, but it is the responsibility of the senior author to collate the views of his co-author(s) and submit a consolidated set of corrections to the Editor, by returning to him the printers' marked proof (identified by the words 'marked copy') with all required corrections. No further corrected proof will be sent to the author, unless this is specially requested. Excessive alterations, other than corrections of printers' errors, may be disallowed or charged to the author. Corrections should be made using the symbols in British Standard 1219: 1958, or its shortened version B.S. 1219c: 1958, obtainable from the British Standards Institution, 2 Park Street, London, W.1.

Offprints. Fifty offprints will be sent free of charge to the author. Where there are two or more authors, all fifty offprints will be sent to the senior author, unless the Printer is asked to divide them. Additional offprints may be ordered on the form sent out with the proofs (to the senior author only if there is more than one) provided this is returned to the Printer within seven days of its receipt by the author.

The Editor will be pleased to send on request:—
Notes on the choice of titles and preparations of
summaries (based on a paper by G. V. Jacks).
Suggestions on the use of English for scientific
papers (based on a paper by A. S. Kirkman).
Details on the use of metrical units in scientific
journals (as agreed by the Royal Society Conference
of Editors—see note on Units above).
