

**JOURNAL OF  
PLASMA PHYSICS**

**JOURNAL OF PLASMA PHYSICS** exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

**EDITOR**

**DR J. P. DOUGHERTY**

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,  
Silver Street, Cambridge CB3 9EW, England*

**ASSOCIATE EDITORS**

**PROF. D. BERSHADER**

*Department of Aeronautics and Astronautics,  
Stanford University, Stanford, California 94305, USA*

**DR E. INFELD**

*Institute of Nuclear Research, Hoza 69, PL-00-681, Warsaw, Poland*

**PROF. P. K. KAW**

*Institute for Plasma Research, Bhat, Gandhinagar 382 424, India*

**PROF. W. B. THOMPSON**

*Department of Physics, University of California, La Jolla, California 92093, USA*

Authors wishing to have papers published in the **JOURNAL** should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the **JOURNAL** free of charge, and additional offprints can be purchased if ordered in advance.

*Copying*

This journal is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/89 \$5.00 + 00.

*ISI Tear Sheet Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

*For all other use*, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

**JOURNAL OF PLASMA PHYSICS** (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, NY 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 41 and 42 (1989) is £99.50 net per volume (US \$221.00 in the USA and Canada) for institutions: £49.50 (US \$166.50) per volume for individuals. Single parts cost £35.00 each (US\$78.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. **POSTMASTER**: send address changes in USA, and Canada to *Journal of Plasma Physics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573.

# CONTENTS TO VOLUME 41

## PART 1 FEBRUARY 1989

Dynamical evolution of three-dimensional kinetic electron-beam instabilities. H. I. ABDEL-GAWAD	1
OTSI of lower-hybrid waves in large- and small-size devices. V. K. TRIPATHI and P. V. SIVA RAMA PRASAD	13
Leakage of MHD surface waves in structured media. V. M. CADEŽ and V. K. OKRETIĆ	23
Generation and radiation of third harmonics by <i>s</i> -polarized electromagnetic waves incident on a narrow inhomogeneous magnetoactive plasma layer. A. M. HUSSEIN	31
Wavenumber shift of an obliquely propagating ion-cyclotron whistler. S. N. PAUL, A. K. SUR and G. PAKIRA	37
Drift-kinetic stability analysis of Z-pinchs. H. O. ÅKERSTEDT	45
A quasi-static equilibrium model of the rotamak. W. K. BERTRAM	61
Forced Alfvén-wave turbulence and subgrid-scale closure. Y. ZHOU and G. VAHALA	67
Nonlinear ion-acoustic waves in a magnetized plasma and the Zakharov-Kuznetsov equation. B. K. SHIVAMOGGI	83
A cosmic-ray-driven plasma instability. G. P. ZANK	89
Resonance absorption of energy by a cold inhomogeneous plasma. Z. SEDLÁČEK and B. ROBERTS	97
Absolute stability in a collisionless electron-heat-conducting plasma in strong magnetic fields. A. DE LA TORRE and S. DUHAU	107
Lower-hybrid wave generation in an electron beam of finite transverse dimension. G. B. CREW	119
Ion-acoustic solitons in magnetized multi-component plasmas including negative ions. K. P. DAS and F. VERHEEST	139
Asymptotic state of the finite-Larmor-radius guiding-centre plasma. G. KNORR and H. L. PÉCSELI	157
Three-dimensional stability of solitary shear kinetic Alfvén waves in a low-beta plasma. K. P. DAS, L. P. J. KAMP and F. W. SLUIJTER	171
Propagation characteristics and reflection of an ion-acoustic soliton in an inhomogeneous plasma having warm ions. S. SINGH and R. P. DAHIYA	185

Three-wave coupling coefficients for magnetized plasmas with pressure anisotropy. G. BRODIN and L. STENFLO	199
PART 2 APRIL 1989	
The effect of light filamentation on uniformity of energy deposition in laser plasmas. D. J. NICHOLAS and S. G. SAJJADI	209
Acoustic-like modes in a two-ion quasi-neutral plasma: linear and nonlinear analysis. C. B. DWIVEDI, R. S. TIWARI, V. K. SAYAL and S. R. SHARMA	219
Whistler instability in a magnetospheric duct. I. TALUKDAR, V. K. TRIPATHI and V. K. JAIN	231
Nonlinear frequency shift of finite-amplitude electrostatic surface waves. L. STENFLO and M. Y. YU	239
Reflection of ion-acoustic waves from bipolar potential structures. Y. NAKAMURA and J. CHUTIA	243
Nonlinear magnetic electron drift waves in magnetized plasmas. G. MURTAZA, P. K. SHUKLA, M. Y. YU and L. STENFLO	257
Two-dimensional hydrodynamic models of laser-produced plasmas. G. J. PERT	263
Ion- and electron-acoustic waves in sheet plasmas. M. B. CHAUDHRY and M. D. TAHIR	281
Influence of dispersion on the modulational instability of a whistler wave. V. I. KARPMAN and A. G. SHAGALOV	289
Electrostatic whistler-mode conversion at plasma resonance. J. E. MAGGS and G. J. MORALES	301
Convective plasma transport modelled with propagators. W. N. G. HITCHON	323
On the power law for the wave spectrum. H. I. ABDEL-GAWAD	333
Arbitrary-amplitude theory of ion-acoustic solitons in warm multi-fluid plasmas. S. BABOOLAL, R. BHARUTHRAM and M. A. HELLBERG	341
The flow field induced by spherical blast waves propagating into perfect and imperfect dusty gases. Z. RAKIB, M. MOND, G. BEN-DOR and O. IGRA	355
Stochastic acceleration and heating of ions by a non-sinusoidal magnetosonic wave. H. VARVOGLIS and V. BASIOS	381
Rosby-type electrostatic electron plasma waves. J. F. MCKENZIE and K. NAIDU	395

## PART 3 JUNE 1989

Weakly relativistic nonlinear orbit dynamics for intense ordinary-mode propagation near electron cyclotron resonance. R. C. DAVIDSON, T.-Y. YANG and R. E. AAMODT	405
Finite-Larmor-radius effects on Z-pinch stability. J. SCHEFFEL and M. FAGHIHI	427
Self-focusing of nonlinear ion-acoustic waves and solitons in magnetized plasmas. Part 3. Arbitrary angle perturbations, period doubling of waves. P. FRYCZ and E. INFELD	441
On the higher-order corrections to the ion-acoustic cnoidal waves in a relativistic plasma with cold ions and two-temperature electrons. A. ROY CHOWDHURY, G. PAKIRA and S. N. PAUL	447
An analytical solution to the Boltzmann-Fokker-Planck equation for multi-component non-homogeneous plasmas. D. ZOLER and S. CUPERMAN	457
Coupling between Varma, modified convective cell and Alfvén modes in an inhomogeneous plasma. P. K. SHUKLA, U. DE ANGELIS and D. JOVANOVIĆ	469
Dynamics of correlation functions with Elsässer variables for inhomogeneous MHD turbulence. E. MARSCH and C-Y. TU	479
Large-Debye-distance effects in a homogeneous plasma. J. SCHEFFEL and B. LEHNERT	493
Investigation into the localized co-interchange instabilities in a rotamak plasma. W. K. BERTRAM	517
A perturbation theory for the solitary-drift-vortex solutions of the Hasegawa-Mima equation. G. E. SWATERS	523
Nonlinear gyrokinetic Maxwell-Vlasov equations using magnetic coordinates. A. BRIZARD	541
A stable stationary solution of compressible magnetohydrodynamics associated with conservation of modified kinetic helicity. J. NORWOOD	561
Corrigendum. S. H. KIM	573
BOOK REVIEWS	
<i>Instabilities in Space and Laboratory Plasmas</i> by D. B. Melrose	575
<i>Cosmic Magnetism</i> by Percy Seymour	576
AUTHOR INDEX TO VOLUME 41	578

## JOURNAL OF PLASMA PHYSICS

Volume 41 Part 3 June 1989

### CONTENTS

- Weakly relativistic nonlinear orbit dynamics for intense ordinary-mode propagation near electron cyclotron resonance  
RONALD C. DAVIDSON, TSER-YUAN YANG AND RICHARD E. AAMODT page 405
- Finite-Larmor-radius effects on z-pinch stability  
JAN SCHEFFEL AND MOSTAFA FAGHIHI 427
- Self-focusing of nonlinear ion-acoustic waves and solitons in magnetized plasmas. Part 3. Arbitrary-angle perturbations, period doubling of waves  
P. FRYCZ AND E. INFELD 441
- On the higher-order corrections to the ion-acoustic cnoidal waves in a relativistic plasma with cold ions and two-temperature electrons  
A. ROY CHOWDHURY, G. PAKIRA AND S. N. PAUL 447
- An analytical solution to the Boltzmann–Fokker–Planck equation for multi-component non-homogeneous plasmas  
D. ZOLER AND S. CUPERMAN 457
- Coupling between Varma, modified-convective-cell and Alfvén modes in an inhomogeneous plasma  
P. K. SHUKLA, U. DE ANGELIS AND D. JOVANOVIĆ 469
- Dynamics of correlation functions with Elsässer variables for inhomogeneous MHD turbulence  
E. MARSCH AND C-Y. TU 479
- Large-Debye-distance effects in a homogeneous plasma  
JAN SCHEFFEL AND BO LEHNERT 493
- Investigation into the localized co-interchange instabilities in a rotamak plasma  
W. K. BERTRAM 517
- A perturbation theory for the solitary-drift-vortex solutions of the Hasegawa–Mima equation  
GORDON E. SWATERS 523
