CONTENTS

	PAGE
Allen, J. F. and Misener, A. D. The surface tension of liquid helium	299
— and Shire, E. S. Thermal equilibrium at temperatures below 1° absolute	301
Babbage, D. W. The resolution of monoidal Cremona transformations of three-dimensional space	22
Banerji, D. P. The expansion of an arbitrary function in a series of conal or toroidal functions	30
Bartlett, M. S. Further aspects of the theory of multiple regression	33
Bennett, W. E. The internal conversion electrons of actinon	282
Bosworth, R. C. L. The evaporation of concentrated films of sodium	262
Bower, J. C. Variation of ionization with range of α -particles, protons, deuterons and ^3H particles	450
—, Bretscher, E. and Gilbert, C. W. The disintegration of boron by slow neutrons	290
Bretscher, E., Gilbert, C. W. and Bower, J. C. The disintegration of boron by slow neutrons	290
Budden, K. G. An apparatus for recording the strength of wireless signals from a Morse sender	470
Cernuschi, F. Contributions to the statistical theory of adsorption. I. The elementary theory of adsorption in a first and second layer	392
Chang, T. S. Superlattice formation of the type AB in alloys with applications to the theory of adsorption	224
Corben, H. C. The straggling of electrons due to radiation and ionization loss	540
Coulson, C. A. Self-consistent field for molecular hydrogen	204
Daniels, H. E. The effect of departures from ideal conditions other than non-normality on the t and z tests of significance	321
Davenport, H. Note on an identity connected with diophantine approximation	27
Ditchburn, R. W. and Roulston, K. I. The sputtering of oxide-covered magnesium surfaces	620
Dube, G. P. The electrical resistance of a metal at low temperatures and Matthiessen's rule	559
— Contributions to the statistical theory of adsorption. II. The theory of two-layer adsorption with correlation in the first layer	587
Dunworth, J. V. and Feather, N. Note on the production of positron-electron pairs during the passing of β -particles through matter	435
— — Absorption and coincidence experiments on the radiations from the radioactive sodium, Na^{24}	442
Du Val, P. The fixed part of the canonical system on an algebraic surface	1
Easterfield, T. E. An extension of a theorem of Kulakoff	316

	PAGE
Easthope, C. E. The critical ordering temperature in alloys. II. The existence of a two-phase region	68
Edge, W. L. Determinantal representations of $x^4 + y^4 + z^4$	6
Erdélyi, A. The Hankel transform of Whittaker's function $W_{k,m}(z)$	28
Feather, N. Note on the absorption limits for the primary β -particles of mesothorium 2 and uranium X_2	115
— Further possibilities for the absorption method of investigating the primary β -particles from radioactive substances	599
— and Dunworth, J. V. Note on the production of positron-electron pairs during the passing of β -particles through matter	435
— and Dunworth, J. V. Absorption and coincidence experiments on the radiations from the radioactive sodium, Na^{24}	442
Fejér, L. Zur Summabilitätstheorie der Fourierschen und Laplaceschen Reihe	503
Fowler, R. H. A modernized version of Gibbs' use of the grand canonical ensemble	382
— and Jones, H. The properties of a perfect Einstein-Bose gas at low temperatures	573
Fuchs, K. The conductivity of thin metallic films according to the electron theory of metals	100
Fuchs, W. H. J. and Weiss, P. Uniqueness theorems and the maximum-minimum principle for a type of non-linear partial differential equations	527
Gilbert, C. W., Bower, J. C. and Bretschler, E. The disintegration of boron by slow neutrons	290
Gillis, J. Corrigendum	502
Goldstein, S. On the velocity and temperature distributions in the turbulent wake behind a heated body of revolution	48
— Note on the velocity and temperature distributions behind a heated body of revolution	351
Green, A. E. The moment of the fluid forces acting on a plate which is gliding on the surface of a stream	167
— The mean value of the fluctuations in pressure and pressure gradient in a turbulent fluid	534
Hall, A. A. and Hislop, G. S. Velocity and temperature distributions in the turbulent wake behind a heated body of revolution	345
Hardy, G. H. A further note on Ramanujan's arithmetical function $\tau(n)$	309
Hartree, D. R. and Hartree, W. Wave functions for negative ions of sodium and potassium	550
Hartree, W. and Hartree, D. R. Wave functions for negative ions of sodium and potassium	550
Heilbronn, H. On Euclid's algorithm in real quadratic fields	521
Hirschlaff, E. The velocity of sound in liquid nitrogen	296

Hislop, G. S. and Hall, A. A. Velocity and temperature distributions in the turbulent wake behind a heated body of revolution	345
Howarth, L. Concerning the velocity and temperature distributions in plane and axially symmetrical jets	185
— Concerning secondary flow in straight pipes	335
Jánossy, L. The penetrating power of cosmic-ray shower particles	614
Jeffreys, H. The use of minimum χ^2 as an approximation to the method of maximum likelihood	156
Johnston, J. E. and Skinner, H. W. B. Soft X-ray bands from dilute alloys	109
Jones, H. A discussion of the thermal expansion and conductivity in liquid helium II	253
— and Fowler, R. H. The properties of a perfect Einstein-Bose gas at low temperatures	573
Kara-Michailova, E. The total energy of the γ -radiation emitted from the active deposit of actinium	429
Kemmer, N. The charge-dependence of nuclear forces	354
Makinson, R. E. B. The thermal conductivity of metals	474
Massey, H. S. W. and Mohr, C. B. O. Anomalous scattering of α -particles and long-range nuclear forces	498
Michailova, E. Kara- , <i>see</i> Kara-Michailova, E.	
Misener, A. D. The "overshoot phenomenon" in superconductivity	465
— and Allen, J. F. The surface tension of liquid helium	299
Mohr, C. B. O. and Massey, H. S. W. Anomalous scattering of α -particles and long-range nuclear forces	498
Monroe, E. On the energies associated with the two-centre problem. I. General features of the energy surface	375
Mott, N. F. Note on the contact between a metal and an insulator or semiconductor	568
Moullin, E. B. A note on the melting point of paraffins and fatty acids	459
Nagendra Nath, N. S. , <i>see</i> Nath, N. S. N.	
Nath, N. S. N. The diffraction of light by supersonic waves in solids	213
Pitt, H. R. Mercierian theorems	510
Roberts, J. K. Some properties of mobile and immobile adsorbed films	399
— The theory of adsorption when each particle occupies more than one site	577
Roulston, K. I. and Ditchburn, R. W. The sputtering of oxide-covered magnesium surfaces	620
Rowland, E. N. Note on fluctuations and the shot effect	329
Rushbrooke, G. S. A note on an assumption in the theory of cooperative phenomena	424

	PAGE
Segal, I. E. Fiducial distribution of several parameters with application to a normal system	41
Shire, E. S. and Allen, J. F. Thermal equilibrium at temperatures below 1° absolute	301
Skinner, H. W. B. and Johnston, J. E. Soft X-ray bands from dilute alloys .	109
Sosnowski, L. and Westcott, C. H. Further experiments on the slow neutrons transmitted by cadmium: influence of the temperature of the slowing down medium	272
Stansfield, R. G. A search for ionization of hydrogen by diffusion through palladium	120
— Suitability of a diamagnetic crystal for the measurement of magnetic fields .	625
Tibbs, S. R. Electronic energy bands in metallic copper and silver	89
Todd, J. A. Birational transformations possessing fundamental curves . . .	144
Turan, P. Über die monotone Konvergenz der Cesàro-Mittel bei Fourier- und Potenzreihen	134
Val, P. du, see Du Val, P.	
Viktorin, O. Production of the long-lived radioactive cobalt isotope from nickel bombarded by fast neutrons	612
Wang, J. S. Statistical theory of adsorption with long-range interaction . . .	238
— The kinetics of adsorption with long-range interaction between adsorbed particles	412
Weiss, P. and Fuchs, W. H. J. Uniqueness theorems and the maximum-minimum principle for a type of non-linear partial differential equations	527
Westcott, C. H. and Sosnowski, L. Further experiments on the slow neutrons transmitted by cadmium: influence of the temperature of the slowing down medium	272
Whittaker, J. M. The shot effect with space charge	158
Wilson, A. H. Lattice changes associated with the formation of superlattices in alloys	81
— The binding energies of the hydrogen isotopes	365
Zygmund, A. Proof of a theorem of Paley	125
PROCEEDINGS	635

Now Ready

The second volume in the new series

THE CAMBRIDGE LIBRARY OF MODERN SCIENCE

Background to Modern Science

Edited by J. NEEDHAM & W. PAGEL. 7s. 6d. net

Here, in one volume, is a complete survey of the development of science in the last forty years, each section being the work of an expert: Professor F. M. Cornford, Sir William Dampier, the late Lord Rutherford, Professor W. L. Bragg, Dr F. W. Aston, Sir Arthur Eddington, Professor J. A. Ryle, the late Professor G. H. F. Nuttall, Professor R. C. Punnett, and Professor J. B. S. Haldane.

The first volume in this series, *The Evolution of Physics* by *EINSTEIN & INFELD*, published at 8s. 6d. net in the spring, has met with an immediate success here and in America.

Stellar Dynamics

By W. M. SMART. 30s. net

This book presents the subject in its full mathematical and observational development. Contents: Introduction; A Single Star-Drift; The Solar Motion; The Two Star-Streams; The Ellipsoidal Theory; Statistical Parallaxes derived from Stellar Motions; The Space Distribution of the Stars derived from their Proper Motions; General Theorems of Stellar Statistics; Star Clusters; The Dynamics of Stellar Systems; Galactic Rotation; The Dynamics of the Galaxy; Appendix.

Cheap Edition

Sir Arthur Eddington

NEW PATHWAYS IN SCIENCE

5s. net

“A fine book which no scientifically minded man or woman can neglect.”

WALTER G. BELL *in the Daily Telegraph*

CAMBRIDGE UNIVERSITY PRESS

CONTENTS

	PAGE
FEJÉR, LEOPOLD. Zur summabilitätstheorie der Fourierschen und Laplace-schen Reihe	503
PITT, H. R. Mercerian theorems	510
HEILBRONN, H. On Euclid's algorithm in real quadratic fields	521
FUCHS, W. H. J. and WEISS, P. Uniqueness theorems and the maximum-minimum principle for a type of non-linear partial differential equations	527
GREEN, A. E. The mean value of the fluctuations in pressure and pressure gradient in a turbulent fluid	534
CORBEN, H. C. The straggling of electrons due to radiation and ionization loss. (With 3 Figures in the Text)	540
HARTREE, D. R. and HARTREE, W. Wave functions for negative ions of sodium and potassium	550
DUBE, G. P. The electrical resistance of a metal at low temperatures and Matthiessen's rule	559
MOTT, N. F. Note on the contact between a metal and an insulator or semiconductor. (With 1 Figure in the Text)	568
FOWLER, R. H. and JONES, H. The properties of a perfect Einstein-Bose gas at low temperatures	573
ROBERTS, J. K. The theory of adsorption when each particle occupies more than one site. (With 5 Figures in the Text)	577
DUBE, G. P. Contributions to the statistical theory of adsorption. II. The theory of two-layer adsorption with correlation in the first layer. (With 4 Figures in the Text)	587
FEATHER, N. Further possibilities for the absorption method of investigating the primary β -particles from radioactive substances. (With 7 Figures in the Text)	599
VIKTORIN, OTAKAR. Production of the long-lived radioactive cobalt isotope from nickel bombarded by fast neutrons	612
JÁNOSSY, L. The penetrating power of cosmic-ray shower particles. (With 2 Figures in the Text)	614
DITCHBURN, R. W. and ROULSTON, K. I. The sputtering of oxide-covered magnesium surfaces. (With 1 Figure in the Text)	620
STANSFIELD, R. G. Suitability of a diamagnetic crystal for the measurement of magnetic fields. (With 4 Figures in the Text)	625
PROCEEDINGS	635
