# **DŌGEN'S MANUALS OF ZEN MEDITATION**

**CARL BIELEFELDT**

Zen Buddhism is perhaps best known for its emphasis on meditation, and probably no figure in the history of Zen is more closely associated with meditation practice than the thirteenth-century Japanese master Dōgen, founder of the Soto school. In recent years Dōgen has come to be recognized as one of the foremost philosophers of this form of Buddhism, but to date there has been little extended treatment of his meditation teachings and their place in the history of Zen contemplative tradition. Bielefeldt offers such an analysis. He examines the historical and religious character of the practice as it is described in Dōgen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization.

**In Search of Self in India and Japan**  
Toward a Cross-Cultural Psychology  
*Alan Roland*

Drawing on work with Indian and Japanese patients, a prominent American psychoanalyst explores inner worlds that are markedly different from the Western psyche. A series of fascinating case studies illustrates Alan Roland's argument: the "familial self," rooted in the subtle emotional hierarchical relationships of the family and group, predominates in Indian and Japanese psyches and contrasts strongly with the Western "individualized self."

In perceptive and sympathetic terms Roland describes the emotional problems that occur when Indians and Japanese encounter Western culture and the resulting successful integration of new patterns that he calls the "expanding self."

**Crisis and Compensation**  
Public Policy and Political Stability in Japan, 1949–1986  
*Kent E. Calder*

Why does Japan, with its efficiency-oriented technocracy, periodically adopt welfare-oriented, economically inefficient domestic policies? Why does Japanese rigidity in policy making alternate so strikingly with highly pragmatic innovation? This thorough analysis of nonindustrial domestic policies in Japan locates answers to these questions in policy dynamics set in motion by early Occupation reforms, in the political requisites of Japan's subsequent economic growth strategy, and in distinctive structural features of Japanese bureaucratic and party-political organization.

**Language–Paradox–Poetics**  
A Chinese Perspective  
*James J. Y. Liu*  
*Edited by Richard John Lynn*

In attempting to define a "poetics of paradox" from a traditional Chinese standpoint, James Liu explores through a comparative approach linguistic, textual, and interpretive problems of relevance to Western literary criticism. Liu's study evolves from a paradoxical view—originating from early Confucian and Daoist philosophical texts—that the less is "said" in poetry, the more is "meant." Such a view implied the existence of paradox in the very use of language and led traditional Chinese hermeneutics to a study of "metaparadox"—the use of language to explicate texts the meaning of which transcends language itself.

## Images of Human Nature

### A Sung Portrait

*Donald J. Munro*

In this volume Donald Munro, author of important studies on early and contemporary China, provides a critical analysis of the doctrines of the Sung Neo-Confucian philosopher Chu Hsi (1130–1200). For nearly six centuries Confucian orthodoxy was based on Chu Hsi's commentaries on Confucian classics. These commentaries were the core of the curriculum studied by candidates for the civil service in China until 1905 and provided guidelines both for personal behavior and for official policy. Munro finds the key to the complexities of Chu Hsi's thought in his mode of discourse: the structural images of family, stream of water, mirror, body, plant, and ruler. Furthermore, he discloses the basic framework of Chu Hsi's ethics and the theory of human nature that is provided by these illustrative images.

## The Artisans of Banaras

### Popular Culture and Identity, 1880–1986

*Nita Kumar*

Nita Kumar offers an evocative and sensitive portrayal of rarely explored aspects of Hindu culture through her analysis of the way leisure time is used by Hindu and Muslim artisans of Banaras—the weavers, metalworkers, and woodworkers. Music, festivals, the place of physical culture, and the importance of going “to the outer side” all are examined as Kumar looks at changes that have occurred in leisure-time activities over the last century. The discussion raises questions of the cultural and conceptual aspects of working-class life, the role of fun and play in Indian thought, the importance of public activities in terms of personal identity, and the meaning of an Indian city to its residents.

## BLACK RAIN

MASUJI IBUSE

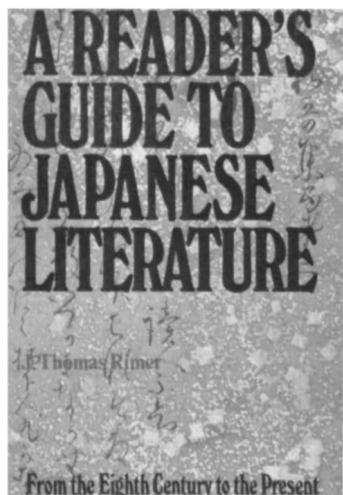

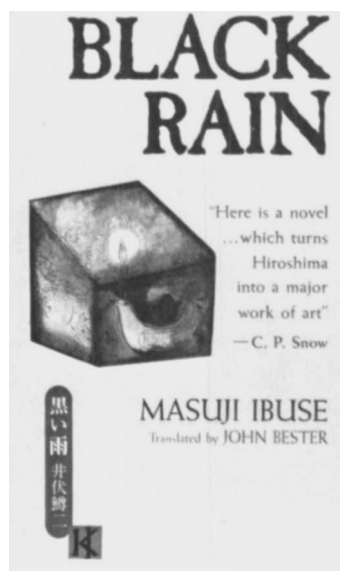

*Translated by John Bester*

A novel based on actual diaries of and interviews with survivors of Hiroshima, this literary masterpiece probes deeply into the personal and historical implications of nuclear attack. In this long-overdue reissue, Ibuse tells with almost intolerable poignancy the story of a family caught in the nuclear "black rain" whose lives became forever haunted by its physical and emotional effects. Written almost entirely in the epistolary form, BLACK RAIN's literary truthfulness creates a powerful tale free from sentimentalism, yet managing to reveal the magnitude of the human spirit.

"... a book deservedly a world classic for its oddly delicate evocation of the human suffering caused by the atomic bomb."—BOSTON GLOBE

"This painful and very beautiful book gives two powerful messages—of drastic warning, yet also of affirmation of life."—JOHN HERSEY

A classic text, *East Asia* has been updated to cover China's economic liberalization, Japan's industrial success, and the challenge to Japanese exports from Taiwan, South Korea, and Singapore. The authors have completely rewritten the three chapters covering the years since 1945. The final chapter in both the China and Japan volumes—now available in paperback editions—has been rewritten and updated.

Authoritative scholarship, comprehensiveness, and a graceful narrative style are the reasons the Fairbank/Reischauer/Craig text remains the finest introduction to East Asian history.

## The Culture of the Meiji Period

Irokawa Daikichi

Translation edited by Marius B. Jansen

"This book, a translation of Irokawa's 1969 classic *Meiji no Bunka*, is best described as an analysis of popular political consciousness in the Meiji period and its corruption by the Emperor System. . . . the translation is lucid and seamless, a remarkable achievement given the number of contributors who worked on it." —*Pacific Affairs*

## Kurozumikyō and the New Religions of Japan

Helen Hardacre

"What particularly characterizes her [Hardacre's] work is the harmonious blend of theory and concrete illustration. . . . Hardacre has lived with the members of the Kurozumikyō not only as a scholar but also as a human being—to be more precise, as a woman—who wants to share their joys and sorrows. This results in a deep empathy with the believers and also with their religion itself." —*Monumenta Nipponica*
