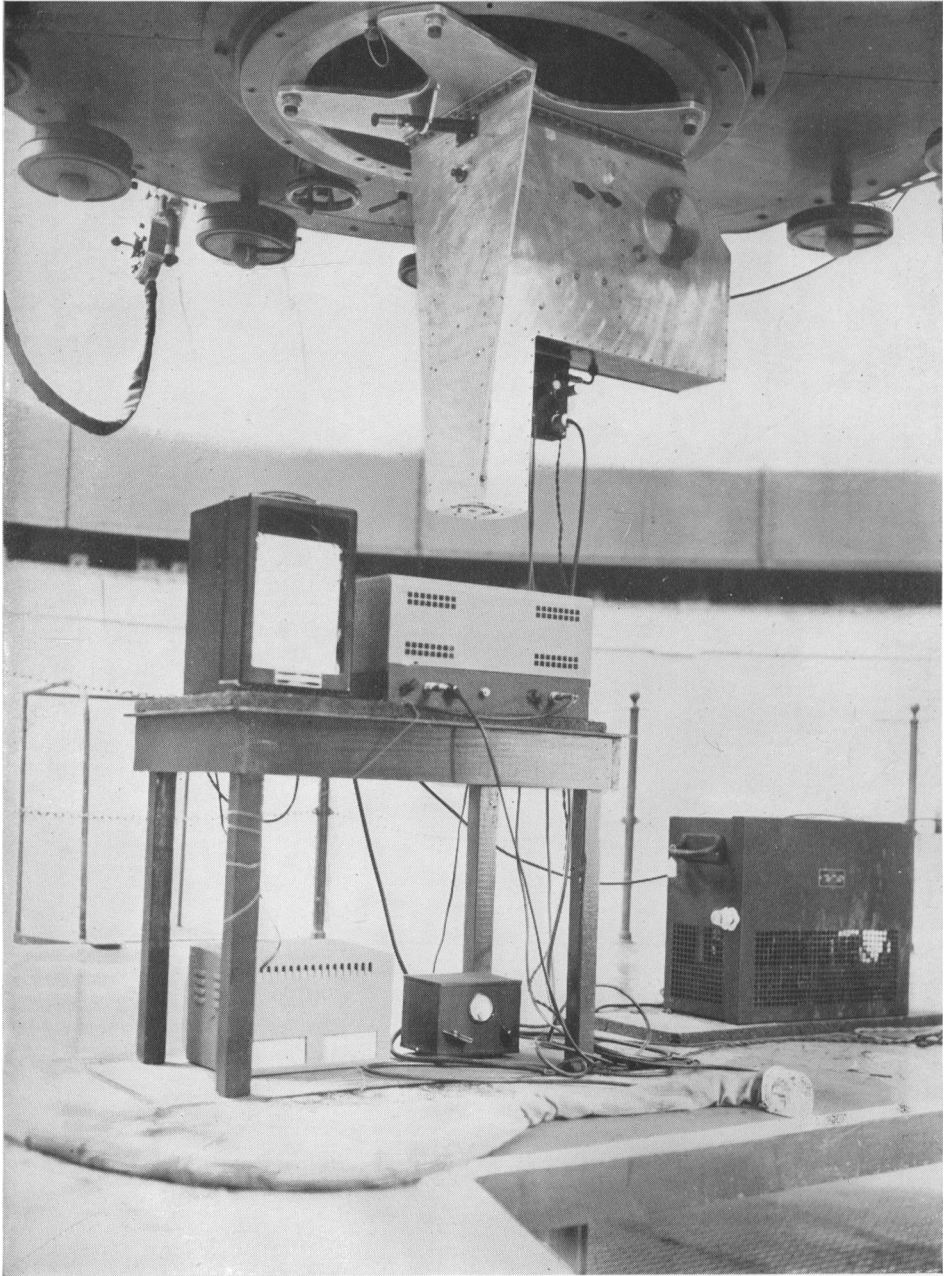

Fig. 1. *Infra-red equipment at McDonald Observatory.* Top: 82 in. cell + spectrometer and pre-amplifier. On table: amplifier (right) and recording meter. On floor (right): constant frequency unit with oscillating crystal; 60 cycles per sec. output, accurate to 1: 200,000. Under table: control box of above unit, and (left) condenser box, to lengthen period of recording meter at will from $\frac{1}{2}$ -6 sec.
