

**Where could you get a  
Varitint-Waddler?**

**How should you name a  
new H-2 mutant?**

**Which mutant genes have  
neurological effects?**

The answers to these and many more questions on mouse genetics can be obtained with the help of

## **Mouse News Letter**

This provides a continuing source of information on all aspects of mouse genetics and allied research. Each issue gives a complete list of known mouse mutants, and there are contributions from laboratories throughout the world on research progress.

Included in Mouse News Letter is Mouse Membrane Allo-antigen News – essential reading for immunogeneticists.

A comprehensive bibliography of current literature on the mouse (biochemistry, cancer, genetics, etc.) is included in the subscription price.

Mouse News Letter may be obtained from either:

MRC Laboratory Animals Centre, Woodmansterne Road,  
Carshalton, Surrey, England  
(by those in Europe, Africa, Asia and Australia at a cost  
of £2 per annum), or

The Jackson Laboratory, Bar Harbor, Maine, 04609, USA  
(by those in North and South America and Japan, at a cost  
of \$5 per annum).

Mouse News Letter must now be self-supporting. Your active participation in the form of a subscription is therefore invited.

# International ABSTRACTS of Biological Sciences

HONORARY EDITOR: DR C C N VASS

Published for the council of Biological and Medical Abstracts, this journal covers the more important papers in experimental biology. Subjects are approached from a fundamental viewpoint with an emphasis placed on anatomy, odontology, biochemistry, microbiology, pharmacology, experimental pathology, immunology, physiology, experimental zoology, cytology, genetics and animal behaviour. More than 500 journals are surveyed annually and some 50,000 abstracts are published in four volumes each of 3 issues containing an author index. A subject index is included with each quarterly issue.

Published monthly

## 1973 Annual Subscription Price

*Complete edition, including all author and subject indexes:*

(A) Government and public libraries, and industrial organisations	£115.00	(\$315)
10% reduction for two-year subscription (1973–74), coupled with protection against any price increases during the period	£207.00	(\$567)
(B) University and hospital libraries	£100.00	(\$275)
10% reduction for two-year subscription, coupled with protection against any price increases for the period	£180.00	(\$495)

*Back volumes available:*

Volumes 1–67; years 1954 to 1972

Prices on request

## CONTENTS

SCOWCROFT, W. R. The genetic analysis of the direct and correlated response to selection for chaetae in <i>Drosophila melanogaster</i>	page 1
BULMER, M. G. The maintenance of the genetic variability of polygenic characters by heterozygous advantage	9
STANISICH, VILMA A. Isolation and properties of mutants of the FP2 sex factor of <i>Pseudomonas aeruginosa</i>	13
CONNOLLY, V. and SIMCHEN, G. Two-environment selection with inbreeding in <i>Schizophyllum commune</i>	25
HILLMAN, RALPH. Genetic and environmental control of a continuous trait, <i>Abnormal abdomen</i> , in <i>Drosophila melanogaster</i>	37
LÓPEZ-FANJUL, C. and HILL, W. G. Genetic differences between populations of <i>Drosophila melanogaster</i> for a quantitative trait. I. Laboratory populations	51
LÓPEZ-FANJUL, C. and HILL, W. G. Genetic differences between populations of <i>Drosophila melanogaster</i> for a quantitative trait. II. Wild and laboratory populations	69
VALENTI, ROBERT J. and KALLMAN, KLAUS D. Effects of gene dosage and hormones on the expression in Dr in the platyfish, <i>Xiphophorus maculatus</i> (Poeciliidae)	79
PHILLIPS, RITA J. S., HAWKER, S. G. and MOSELEY, H. J. Bare-patches, a new sex-linked gene in the mouse, associated with a high production of XO females. I. A preliminary report of breeding experiments	91
STAMBERG, JUDITH and KOLTIN, Y. Genetic control of recombination in <i>Schizophyllum commune</i> : evidence for a new type of regulatory site	101
LAMB, B. C. and WICKRAMARATNE, M. R. T. Corresponding-site interference, synaptonemal complex structure, and 8+ :0m and 7+ :1m octads from wild-type x mutant crosses of <i>Ascobolus immersus</i>	113
JURAND, M. K. and KEMP, R. F. O. An incompatibility system determined by three factors in a species of <i>Psathyrella</i> (Basidiomycetes)	125
